The preparation of the National Register of Citizens (NRC) in Assam was an unprecedented exercise that sought to establish Indian citizenship of the state's 33 million residents. The process intersected with the already existing parallel mechanisms of citizenship determination in the state. The final list, published on 31 August 2019, left out around 1.9 million applicants who risk being rendered stateless after their appeals are heard by the state's Foreigners' Tribunals. The NRC's narrative is expansive and complex - a blend of history, politics, law, human rights, and administrative red tape. No Land's People documents the unfolding humanitarian crisis in Assam's citizenship tangle, juxtaposes it with the complications of the NRC process while exploring technical, social and legal aspects of the exercise.

The Indian Constitution is one of the world's longest and most important political texts. Its birth, over six decades ago, signalled the arrival of the first major post-colonial constitution and the world's largest and arguably most daring democratic experiment. Apart from greater domestic focus on the Constitution and the institutional role of the Supreme Court within India's democratic framework, recent years have also witnessed enormous comparative interest in India's constitutional experiment. The Oxford Handbook of the Indian Constitution is a wide-ranging, analytical reflection on the major themes and debates that surround India's Constitution. The Handbook provides a comprehensive account of the developments and doctrinal features of India's Constitution, as well as articulating frameworks and methodological approaches through which studies of Indian constitutionalism, and constitutionalism more generally, might proceed. Its contributions range from rigorous, legal studies of provisions within the text to reflections upon historical trends and social practices. As such the Handbook is an essential reference point not merely for Indian and comparative constitutional scholars, but for students of Indian democracy more generally.
