

Marcello Sonata No 1 In F For Tuba

The Venetian composer Benedetto Marcello (1686-1739) was preeminently important in reshaping musical thought and practice to suit values revived from classical antiquity. His music was widely known and respected throughout the eighteenth and nineteenth centuries. This is the first systematic inventory of the 700 musical works attributed to him. The catalog also lists the works of the composer's brother Alessandro (1668-1747) and other information about the literary and musical achievements of the Marcello family. Including an extended commentary on the composers and their music, as well as numerous appendices and indices, this reference provides information of interest to performers, editors, and students pursuing style-critical and source-critical studies.

W. Dean Sutcliffe investigates one of the greatest yet least understood repertoires of Western keyboard music: the 555 keyboard sonatas of Domenico Scarlatti. Scarlatti occupies a position of solitary splendour in musical history. The sources of his style are often obscure and his immediate influence is difficult to discern. Further, the lack of hard documentary evidence has hindered musicological activity. Dr Sutcliffe offers not just a thorough reconsideration of the historical factors that have contributed to Scarlatti's position, but also sustained engagement with the music, offering both individual readings and broader commentary of an unprecedented kind. A principal task of this book is to remove the composer from his critical ghetto (however honourable) and redefine his image. In so doing it will reflect on the historiographical difficulties involved in understanding eighteenth-century musical style.

Winston Morris, Mark A. Nelson, Timothy J. Northcut, Daniel Perantoni, Philip Sinder, Joseph Skillen, Kenyon Wilson, and Jerry A. Young.

A massive research effort by leading professional tubists in 36 countries presents a comprehensive picture of the tuba. The "baby" of the orchestra, the tuba was "born" in 1835. The first major solo compositions for the instrument appeared only in the 1950s, but in the next forty years the body of literature for the tuba increased at an amazing pace. The first several chapters of The Tuba Source Book identify that literature by ensemble type. They provide bibliographic data and descriptions of 1,900 pieces for tuba and keyboard, 234 for tuba and band, 1,056 for tuba ensemble, 106 for tuba and strings, and 258 for unaccompanied tuba, as well as hundreds of works in other categories and 456 methods and studies. The chapter entitled "Recommended Basic Repertoire" is subdivided by level, from high school through

professional, and "Orchestral Excerpts," in addition to listing 146 works that every tubist should know, includes advice on how to audition. The Tuba Source Book also offers an extensive discography (400 entries), a very complete bibliography, biographies of professional tubists, career advice, guidelines for composing and arranging music for the tuba, and lists of instrument builders and sources of tuba equipment. This encyclopedic volume fills a need for tubists at all levels of study and accomplishment. It is invaluable for composers, music educators, conductors, administrators, librarians, historians, and everyone who enjoys the art of tuba performance.

The Arban Complete Method for Tuba-334 pages in length-is the premier publication for tubists. Tubists no longer need to transpose a trombone or trumpet version of Arban because this edition-complete in every way-is made for tuba. The Arban Method covers practically every aspect of technique. Dr. Young's superb explanations add unique value to this edition. This comprehensive book is in a class by itself and it is one of the essential books for tubists. This edition, printed by Amazon, is exactly the same as the U.S. edition but is not spiral bound.

The variety and complexity of cadenceThe concept of closure is crucial to understanding music from the "classical" style. This volume focuses on the primary means of achieving closure in tonal music: the cadence. Written by leading North American and European scholars, the nine essays assembled in this volume seek to account for the great variety and complexity inherent in the cadence by approaching it from different (sub)disciplinary angles, including music-analytical, theoretical, historical, psychological (experimental), as well as linguistic. Each of these essays challenges, in one way or another, our common notion of cadence. Controversial viewpoints between the essays are highlighted by numerous cross-references. Given the ubiquity of cadences in tonal music in general, this volume is aimed not only at a broad portion of the academic community, scholars and students alike, but also at music performers. Contributors Pieter Bergé (KU Leuven), Poundie Burstein (City University of New York), Vasili Byros (Northwestern University), William Caplin (McGill University), Felix Diergarten (Schola Cantorum Basiliensis), Nathan John Martin (Yale University / KU Leuven), Danuta Mirka (University of Southampton), Markus Neuwirth (KU Leuven), Julie Pedneault-Deslauriers (University of Ottawa), Martin Rohrmeier (Massachusetts Institute of Technology), and David Sears (McGill University) (Woodwind Solo). A compilation of the most beautiful Baroque sonatas for treble recorder. Composers include Handel, Loeillet, Marcello, Telemann, Vivaldi and more.
