Includes Part 1, Number 1: Books and Pamphlets,
Including Serials and Contributions to Periodicals
(January - June)

Vols. for 1898-1968 include a directory of publishers.
The production of food and energy interfere with the
natural nitrogen cycle of the earth. Many of these
changes are beneficial, while others are detrimental to
societies and the environment. The changing nature of
nitrogen in the global environment crosses scientific
disciplines, geographical boundaries and political
divisions and challenges the creative minds of natural
and social scientists, economists, engineers, business
leaders and planners. The papers in this book give
readers a panoramic view of the changing nature of
reactive nitrogen in the global environment, enabling
them to make better choices about nitrogen
management in food production and consumption,
energy production and use, and environmental
protection.

Catalog of Copyright Entries. Third Series 1961: January-
June Copyright Office, Library of Congress

Monthly magazine devoted to topics of general
scientific interest.
