SHORTLISTED FOR THE GORDON BURN PRIZE Chosen as 'BOOK OF THE YEAR' by Observer, Guardian, Telegraph, Irish Times, New Statesman, Times Literary Supplement, Herald When Olivia Laing moved to New York City in her mid-thirties, she found herself inhabiting loneliness on a daily basis. Increasingly fascinated by this most shameful of experiences, she began to explore the lonely city by way of art. Moving fluidly between the works and lives of some of the city's most compelling artists, Laing conducts an electric, dazzling investigation into what it means to be alone, illuminating not only the causes of loneliness but also how it might be resisted and redeemed.

At a time when crime scene television shows are all the rage amongst the civilian population, knowledge of firearm forensics is of paramount importance to crime scene analysts, police detectives, and attorneys for both the prosecution and the defense. On October 24th, 1994, the pro-government German newspaper 'Die Welt' reported that the Minister of Family Affairs, Mrs. Hannelore Ransch, member of the ruling Christian Democratic Union (CD U), withdrew her candidacy for a second term after serving a four year term. While Chancellor Helmut Kohl and other party colleagues officially expressed their regret for this move, the conservative press openly announced their relief. A symbolic photo of Ransch was published together with the article: In the background, two direction indicators are discernable, one pointing to the 'emergency exit' and the other to the 'escape route'. What led up to this state of affairs? Some months before, Ransch had triggered off a storm of public indignation due to her proposal to partly re place the present German child-benefit system by 'tax fines for the childless'. To be exact, the minister's idea was to distinctly increase child allowance and child benefit, and to bill childless families for this measure, that is, childless couples and singles should have to payoff a tax surcharge christened 'Zu kunftsbeitrag' (,contribution to the future'). However, only the second part of her proposal, the tax fine, made it to the headlines (compare, for exam ple, 'Frankfurter Allgemeine Zeitung', February 19th, 1994, and 'Die Welt', March 28th, 1994).

published in 1958. This book has been prepared directly from the records of the Waffenfabrik Mauser, from reports and publications by directors of the Mauser Werke A.-G., (Firearms Factory), from the Mauser memorial and records of R. H. Korn, who was Paul Mauser's personal patent attorney, from the records of Ludwig Loewe and Co. of Berlin who were Mauser partners for many years, and from accounts of the Württembergische Vereinsbank of Stuttgart, financial partners and bankers for Mauser. All photographs and drawings and all specifications except as noted are from the original drawings, photographs and specifications prepared by the Mauser organization for their official reports or for their international sales organizations. Wherever possible direct translations from the pertinent German records have been retained in their essence, being expanded, edited and elaborated only where necessary to amplify the original text. This book, while essentially an historical hand book for gun enthusiasts and for the millions of soldiers who possess European Mauser rifles as trophies, also has a secondary purpose. That secondary purpose is to present a detailed study of the advance of German small arms development through the years, so politicians and economists and statesman will have available an integrated study of one facet of militaristic evolution which has never before been presented. This book is confined entirely to the facts of the Mauser history and of the arms

Mauser developed; but its implications in world affairs are there for any analysts who are in a position to use them. As a history of the rise and development of the Mauser line of weapons, this work is intended to satisfy all except the ultra-technical.

The idea that nature provides services to people is one of the most powerful concepts to have emerged over the last two decades. It is shaping our understanding of the role that biodiverse ecosystems play in the environment and their benefits for humankind. As a result, there is a growing interest in operational and methodological issues surrounding ecosystem services amongst environmental managers, and many institutions are now developing teaching programmes to equip the next generation with the skills needed to apply the concepts more effectively. This handbook provides a comprehensive reference text on ecosystem services, integrating natural and social science (including economics). Collectively the chapters, written by the world's leading authorities, demonstrate the importance of biodiversity for people, policy and practice. They also show how the value of ecosystems to society can be expressed in monetary and non-monetary terms, so that the environment can be better taken into account in decision making. The significance of the ecosystem service paradigm is that it helps us redefine and better communicate the relationships between

people and nature. It is shown how these are essential to resolving challenges such as sustainable development and poverty reduction, and the creation of a green economy in developing and developed world contexts.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public."

Twenty years ago, behavioral economics did not exist as a field. Most economists were deeply skeptical--even antagonistic--toward the idea of importing insights from psychology into their field. Today, behavioral economics has become virtually mainstream. It is well represented in prominent journals and top economics departments, and behavioral economists, including several contributors to this volume, have garnered some of the most prestigious awards in the profession. This book assembles the most important papers on behavioral economics published since around 1990. Among the 25 articles are many that update and extend earlier foundational contributions, as well as cutting-edge papers that break new theoretical and empirical ground. Advances in Behavioral

Economics will serve as the definitive one-volume resource for those who want to familiarize themselves with the new field or keep up-to-date with the latest developments. It will not only be a core text for students, but will be consulted widely by professional economists, as well as psychologists and social scientists with an interest in how behavioral insights are being applied in economics. The articles, which follow Colin Camerer and George Loewenstein's introduction, are by the editors, George A. Akerlof, Linda Babcock, Shlomo Benartzi, Vincent P. Crawford, Peter Diamond, Ernst Fehr, Robert H. Frank, Shane Frederick, Simon Gächter, David Genesove, Itzhak Gilboa, Uri Gneezy, Robert M. Hutchens, Daniel Kahneman, Jack L. Dennis Adler, award-winning author and photographer, and contributing editor to *Guns of the Old West* magazine, has woven together enthralling tales of the guns and gunmen who made the Wild West wild. Beginning with the early western expansion and the California Gold Rush, *Guns of the American West* takes you through the development of America's most legendary handguns, rifles, and shotguns and the roles they played in our nation's history. As the Civil War erupts, the author follows the politics of a country divided and how North and South chose to arm their soldiers. In the aftermath of this great conflagration, Adler takes you step-by-step through the evolution of loose powder cap-and-ball revolvers, rifles, and shotguns to the conversion to self-contained metallic cartridges and the sweeping changes that resulted in firearms design. With a nation intent on its belief in Manifest Destiny, the author follows legendary lawmen, soldiers, and outlaws as America moves west in the 1870s and 1880s. Skyhorse Publishing is proud to publish a broad range of books for hunters and firearms enthusiasts. We publish books about shotguns, rifles, handguns, target shooting, gun collecting, self-defense, archery, ammunition, knives, gunsmithing, gun repair, and wilderness survival. We publish books on deer hunting, big game hunting, small game hunting, wing shooting, turkey hunting, deer stands, duck blinds, bowhunting, wing shooting, hunting dogs, and more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to publishing books on subjects that are sometimes overlooked by other publishers and to authors whose work might not otherwise find a home. Colonel Askins is an adventurer. Whether it be fighting his way out of an ambush, hunting tiger in Asia or sniping along the Rhine, Askins has done it with gusto. Here he recounts his early days as a forest ranger, his decade of slinging lead on the Mexican border, his astounding success as a competitive pistol shot, his combat participation in World War II, his adventures as a paratrooper in Vietnam and his career as one of the world's leading big-game hunters. The book presents an overview of the International practices and state-of-the-art of LCA studies in the agri-food sector, both in terms of adopted methodologies and application to particular products; the final purpose is to characterise and put order within the methodological issues connected to some important agri-food products (wine, olive oil, cereals and derived products, meat and fruit) and also defining practical guidelines for the implementation of LCAs in this particular sector. The first chapter entails an overview of the application of LCA to the food sector, the role of the different actors of the food supply chain and the methodological issues at a general level. The other chapters, each with a particular reference to the main foods of the five sectors under study, have a common structure which entails the review of LCA case studies of such agri-food products, the methodological issues, the ways with which they have been faced and the suggestion of practical guidelines.

Originally published in 1974, *Waterfowl and Wetlands* analyses waterfowl hunting patterns in the late sixties in the hopes of protecting waterfowl resources such as wetlands. Wetlands are obviously an important resource for migratory waterfowl however they are often drained for agricultural purposes which can have dramatic effects on waterfowl population. This study aims to explore the issues surrounding waterfowl and wetlands in an attempt to determine their value to hunters, farmers and the general public. This study will be of interest to students of

Evidence-based, peer reviewed, best practice management guidelines for neurologists  
Diagnosis is only part of the puzzle. Effective treatment is what your patients really want. The European Federation of Neurological Societies has been publishing management guidelines in the European Journal of Neurology for many years. Developed by a consensus approach, using graded evidence, and then fully peer reviewed, these guidelines provide gold-standard, best-practice guidance to the treatment of neurological disorders. They help bridge the gap between what is done and what should be done for patients with neurological disorders. The basic guidelines have been expanded with 'Recommendations' based on strong evidence and 'Good Practice Points' where only weaker evidence is available. The Guidelines in this volume include, amongst others: Neurostimulation therapy for neuropathic pain Molecular diagnosis for a range of neurological conditions Intravenous immunoglobulin in the treatment of neurological diseases Sleep disorders in neurodegenerative disorders and stroke Management of low-grade gliomas Treatment of miscellaneous idiopathic headache disorders The European Handbook of Neurological Management provides a thoroughly rounded and grounded approach to best-practice neurological management using evidence-based principles.
