This book covers the origin and archaeological development of selected categories of civilized elements identified as being “Jaredite” in origin. It is an attempt to elevate the Jaredite civilization into the light of day from the heretofore dark mists of history where science has forced it for the last 2,500 years. The Jaredite civilization spanned a possible 2,530 years, and its known achievements have far exceeded those of modern man’s in many regards. In c. 2800 BC, the Jaredites built a pair of concrete superhighways over 2,700 miles, complete with paved exits and a secondary road network, nearly the entire length of the South American continent. Their civilization could answer the riddles of the Sphinx, the questions of who built the pyramids and why, the mystery and likely origin of UFOs, prove whether or not George Lucas had the only ET, detail what Noah brought aboard the ark besides three sons and their families, and provide an answer to the question posed to Dr. J. Robert Oppenheimer by a student as to whether Alamogordo’s nuclear bomb in July 1945 was the first ever atomic bomb explosion in history. Many other possible but likely Jaredite achievements are incredibly fascinating and await only an honest archaeological effort to prove them. The historical facts exist; they are real and three-dimensional, but to date, standard classical science has relegated them to the dustbin of history’s forgotten basement closet. Satan has made a tremendous effort since mankind’s beginning to keep man blinded to the historical facts of our heritage, causing the deliberate destruction of millions of artifacts, scrolls, books, and whole libraries throughout the world to do so. This book is but a small effort to expose and make known a portion of mankind’s previously hidden but rightful heritage. Learn about different cultures around the world and how they have changed over time with this exciting collection. Bursting with engaging facts, primary sources, photographs, timelines, and more, readers won’t be able to let these books go! The titles include: Egypt; India; Rome; Greece; China; Sub-Saharan Africa; Mesopotamia; and Mayas, Incas, and Aztecs.

EDUCATION/ SOCIAL STUDIES "... a much-needed addition to elementary social studies that will move the field ahead." Keith C. Barton, University of Cincinnati "This text fills a valuable niche and should quickly become a leading reference for teachers and teacher educators." Linda S. Levstik, University of Kentucky This book, resulting from a collaboration among an educational psychologist, a social studies educator, and a primary teacher, describes in rich detail and illustrates with excerpts from recorded lessons how primary teachers can engage their students in social studies lessons and activities that are structured around powerful ideas and have applications to their lives outside of school. The teaching portrayed connects concepts and skills emphasized in national and state standards, taught in ways that build on students' prior experiences in their local communities and connect with their family backgrounds and home cultures. The analyses include rich descriptions of the teacher-student interactions that occur during lessons, detailed information about how and why the teacher adapted lesson plans to meet her students' background experiences and adjusted these plans to take advantage of teachable moments that emerged during lessons, and what all of this might imply concerning principles of practice. The principles are widely applicable in elementary schools across the country, as well as across the curriculum (not just in social studies) and across the elementary grades (not just the primary grades).

The text provides wide and historically informed coverage of key facets of Latin American and Caribbean societies and their cultural and historical development as well as the roles of power and inequality. Cymeme Howe, Visiting Assistant Professor of Cornell University writes, "The text moves well and builds over time, paying close attention to balancing both the Caribbean and Latin America as geographic regions, Spanish and non-Spanish speaking countries, and historical and contemporary issues in the field. I found the geographic breadth to be especially impressive." Jeffrey W. Mantz of California State University, Stanislaus, notes that the contents "reflect the insights of an anthropologist who knows Latin America intimately and extensively."

As the study of world history evolves from a Eurocentric perspective to a more global viewpoint, formerly marginalized groups are now the focus of discussion, revealing a background rich with important military, political, social, and economic achievements. This book examines the once prosperous and powerful native civilizations in Central and South America, discussing the key individuals, strategies, and politics that made these countries strong and indomitable. In spite of this, the author shows how, in only a few generations, Spain defeated these mini-empires, eventually dominating much of the Western Hemisphere. "Conflict in the Early Americas: An Encyclopedia of the Spanish Empire's Aztec, Incan, and Mayan Conquests" focuses primarily on the defeat of the Aztec, Incan, and Mayan civilizations, but also includes Spanish interactions with lesser-known native groups. Supporting documents including primary sources, maps, and visual aids provide necessary context to this once-untold story.

This Handbook outlines the current state of research in social studies education – a complex, dynamic, challenging field with competing perspectives about appropriate goals, and on-going conflict over the content of the curriculum. Equally important, it encourages new research in order to advance the field and foster civic competence; long maintained by advocates for the social studies as a fundamental goal. In considering how to organize the Handbook, the editors searched out definitions of social studies, statements of purpose, and themes that linked (or divided) theory, research, and practices and established criteria for topics to include. Each chapter meets one or more of these criteria: research activity since the last Handbook that warrants a new analysis, topics representing a major emphasis in the NCSS standards, and topics reflecting an emerging or reemerging field within the social studies. The volume is organized around seven themes: Change and Continuity in Social Studies Civic Competence in Pluralist Democracies Social Justice and the Social Studies Assessment and Accountability Teaching and Learning in the Disciplines Information Ecologies: Technology in the Social Studies Teacher Preparation and Development The Handbook of Research in Social Studies is a must-have resource for all beginning and experienced researchers in the field.
