For centuries, business, political, and military leaders throughout Asia have had a secret weapon for success -- the philosophies and strategies found in an ancient game called Go. Now, Troy Anderson, an entrepreneur, knowledge management expert, Fortune 500 management consultant, and one of only five Americans to train at the Japanese Professional Go Academy, brings these philosophies and strategies to the West. Leaders and intellects such as Mao Tse-tung, Bill Gates, and John Nash (the game was featured in the movie A Beautiful Mind) as well as many CEOs and political leaders throughout Asia are among the 27 million people who have played this simple two-person board game known as the "game of geniuses." In this unique book, Troy Anderson shares the essential elements of strategy and competition that define the game of Go and shows how these principles can be applied wherever strategy is called for: How to make use of limited resources and time to produce the largest gain Which initiatives to continue and which to abandon When to lead and when to follow your opponent How to weigh competing interests among different units How to enter a market where the competition is already well established How to proceed to ensure success if the competition enters your market How to create a strategic plan when the market changes quickly How to go global but think locally Go provides experience and understanding regarding basic strategic problems that no other art, science, or field, other than war, can readily claim. In addition to an enriching account of how the game of Go has influenced Anderson's life, the valuable lessons imparted here add up to a powerful prescription for success -- whether you are seeking professional achievement, better competitive understanding, stronger personal relationships, or simply a more rewarding life.

ACE THE GMAT is based on a simple but powerful observation: Test-takers who score high on the GMAT exam do so primarily by understanding how to solve a finite number of the most important, recurring problems that appear on the GMAT. What are these important, recurring problems? The answer to this question is the basis of this book. This manual provides in-depth analysis of over 200 all-star problems that are key to mastering the seven major GMAT problem types including Problem Solving, Data Sufficiency, Sentence Correction, Critical Reasoning, Reading Comprehension, Analytical Writing, and Integrated Reasoning. Apart from providing readers with answers and full explanations, a special feature of this book is that each problem is categorized by type ("classification"), rated by difficulty level ("chili rating"), and supplemented with a problem-solving strategy ("snapshot"). "Chance favors the prepared mind." Whether you're a candidate already enrolled in a test-prep course or are undertaking self-study, this guidebook will serve as a rigorous skill-building study guide to help you conquer the math, verbal, analytical writing, and integrated reasoning sections of the exam. Studying for the math and verbal sections of the GMAT exam requires some 100 hours of study time. This book's content is conveniently divided into topics, which require two to three hours of study time per day. Total study time will vary between 80 to 120 hours for the entire 40 days. Solving (Official exam instructions for Problem Solving, Strategies and approaches, Review of basic math, Multiple-choice problems, Answers and explanations); Chapter 3 – Data Sufficiency (Official exam instructions for Data Sufficiency, Strategies and approaches, How are answers chosen in Data Sufficiency?
