NOTE: As the response to the coronavirus (COVID-19) continues to evolve rapidly around the world, Microsoft has announced that it's extending the retirement date of the current MCSA Windows Server 2016 certification until January 31, 2021. Pearson VUE has temporarily closed many of its testing centers worldwide in response to global government regulations to battle the spread of COVID-19. As an alternative to taking your exam at a testing center, online proctoring is available, which allows you to take your certification exam in the comfort of your own home or office. Instead of taking the required exams at a Pearson VUE testing center near you, Pearson VUE will be offering only online proctored exams for the foreseeable future. This means you will have more time to prepare for the current exams: 70-740: Installation, Storage, and Compute with Windows Server 2016 70-741: Networking with Windows Server 2016 70-742: Identity with Windows Server 2016 To help you prepare for the exams, our Study Guides are available for purchase. However, coverage is very comprehensive - a wide range of topics are presented in the official topic list. The exam does not ask you to answer hundreds of questions. In other words, only a small fraction of the official topics will be presented. To succeed in the exam, you need to read as many reference books as possible. There is no single book that can cover everything! This ExamFOCUS book focuses on the more difficult topics that will likely make a difference in exam results. The book is NOT intended to guide you through every single official topic. You should therefore use this book together with other reference books for the best possible preparation outcome. You should also download the evaluation copy of Server 2012 and play with it. Download the ISO image file and burn a DVD disc out of it, then perform installation accordingly. Although there is a VHD version available, we do not recommend that you use it for testing. There are some complicated steps involved which may not always go as smooth. If you use the current version of Virtual Box (which is 4.1.22 as of the time of this writing) to run Server 2012, be sure to choose "Windows 8 (64bit)" as the choice of OS.
