Technical and vocational education and training at technical schools are major contributing factors in combating poverty, unemployment, and inequality. The primary purpose of technical and vocational education and training is to prepare students and learners for the world of work and for a smooth transition from education institutions into the workplace. As the Fourth Industrial Revolution continues to create more radical changes in the labor market, experts are calling for a reform of education, including vocational education and training and adult and professional education. *New Models for Technical and Vocational Education and Training* is an essential scholarly research book that examines TVET and CET colleges and programs that provide intermediate skills to enhance students' chances of employability and entrepreneurship in Industry 4.0. The book explores knowledge in respect to workforce preparation, digital skills development, teaching and learning of TVET, flexibility and articulation of TVET to respond to work-integrated learning, and reskilling and upskilling to avoid skill mismatches. It is ideal for TVET schools, academicians, curriculum designers, managers, training officers, administrators, vocational professionals, researchers, and students.

This new edition of *The Woman Question* brings together the most influential analyses of women's position in society to have emerged in the past decade. The discussion encompasses both theoretical issues of identity and the economic and political status of women. It demonstrates the impact of gender not only on how the social world is organized but on how we understand and interpret that world.

Recognizing the diversity of women's experiences, it pays particular attention to the interactions of race, class, gender and sexuality. Leading feminists explore the concept of gender difference, its impact on women and its representation in culture. They discuss the material realities of women's lives and how these are
