This book will help you in advancing with developing the solutions for your customers ...

This book constitutes the refereed proceedings of the Third International Conference on Subject-Oriented Business Process Management, S-BPM ONE 2011, held in Ingolstadt, Germany, in September 2011. The papers feature the analysis, modeling, implementation, execution and management of interaction patterns with an explicit stakeholder focus and also embrace themes pertaining to the engineering and management of systems and organizations, particularly with respect to the areas of interaction culture, process-aware information systems, strategic alignment, and governance structures.

Looks at the application framework and development environment of Microsoft Dynamics AX 4.0.

Projekte rücken vor allem im IT-Sektor immer mehr in den Hauptfokus der Unternehmen. Viele Aufgaben des Projektmanagements lassen sich durch Werkzeuge wie SAP R/3® professionell unterstützen. Das Buch erläutert praxisorientiert die Anwendung von R/3® als effizientes Werkzeug für das Projektmanagement. Ein praktisches Beispiel begleitet den Leser durch das gesamte Buch. Um die Nachvollziehbarkeit zu gewährleisten, werden für die verwendete Beispielfirma exemplarisch alle notwendigen Organisationsstrukturen vorgestellt und angelegt.

Book Description
Microsoft Dynamics 365 Business Central is a complete business management solution that can help you streamline business processes, connect individual departments in your company, and enhance customer interactions. Ok. That first part was really professional sounding, right? Now, let's get into what this cookbook is going to do for you: put simply, it's going to help you get things done. This book will help you get to grips with the latest development features and tools for building applications using Business Central. You'll find recipes that will guide you in developing and testing applications that can be deployed to the cloud or on-premises. For the old-schoolers out there, you'll also learn how to take your existing Dynamics NAV customizations and move them to the new AL language platform. Also, if you haven't figured it out already, we're going to be using very normal language throughout the book to keep things light. After all, developing applications is fun, so why not have fun learning as well! What you will learn
Build and deploy Business Central applications
Use the cloud or local sandbox for application development
Customize and extend your base Business Central application
Create external applications that connect to Business Central
Create

automated tests and debug your applications Connect to external web services from Business Central Who this book is for This book is for Dynamics developers and administrators who want to become efficient in developing and deploying applications in Business Central. Basic knowledge and understanding of Dynamics application development and administration is assumed. This book brings together examples of leading thinking and international practice in the rapidly developing area of environmental management accounting (EMA) The authors include academics and practitioners from industry and the subjects covered range from individual company experiences with implementing EMA to national experiences regarding the adoption and diffusion of EMA practices.

Implementing ERP Systems About This Book Solve common business problems with the valuable features and flexibility of Dynamics NAV Design software that is maintainable outside the ecosystem of their creators Create configuration packages and perform data migration on your own Who This Book Is For This book is for Dynamics NAV partners, developers, consultants, and end users who want to know everything about Dynamics NAV implementations and development. What You Will Learn Create reusable data migration packages Successfully upgrade your installation to the latest version Manage and expand your existing installation with additional functionalities Apply object-oriented practices to C/AL programming Refactor legacy code and avoid anti-patterns Build relationships with COM technologies Clone codes and their application in Dynamics NAV Automate deployment into Dynamics NAV In Detail Microsoft Dynamics NAV is an Enterprise Resource Planning (ERP) application used in all kinds of organizations around the world. It provides a great variety of functionality, out-of-the-box, in different topics such as accounting, sales, purchase processing, logistics, and manufacturing. Microsoft Dynamics NAV also allows companies to grow their applications by customizing solutions to meet specific requirements. This course is a hands-on tutorial on working with a real Dynamics NAV implementation. It begins by providing an insight into the different tools available to migrate data from client legacy systems into Microsoft Dynamics NAV. If you are already live with Microsoft Dynamics NAV, you will learn about upgrades and what to expect from them. We'll also show you how to implement additional or expanding functionalities within your existing Microsoft Dynamics NAV installation, perform data analysis, debug error messages, and implement free third-party add-ons to your existing installation. From here, you will be introduced to integrated development tools to make you a highly productive developer in the NAV environment. The course will serve as a comprehensive reference guide, complementing NAV's Help files. You will find this course really useful if you want to evaluate Microsoft Dynamics NAV's development capabilities or need to manage NAV-based projects. Additionally, you will also learn about the NAV application structure, the C/SIDE development environment, the C/AL language, the construction and uses of each object type, and how it all fits together. Moving on, you will be guided through the NAV way of solving problems. You will be introduced to patterns and the software NAV architecture and will then build an example application. Then, you will walk through the details of architectural patterns, design patterns, and implementation patterns and will also learn about anti-patterns and handling legacy code. You will learn how to build solutions using patterns. The course offers premium, highly practical content on this recently released version of Dynamics NAV, and includes material from the following Packt books : Implementing Microsoft Dynamics NAV - Third Edition Programming Microsoft Dynamics™ NAV Learning Dynamics NAV Patterns Style and approach This course is for Dynamics NAV partners, developers, consultants, and end users who want to know everything about Dynamics NAV implementations and development.

Create real-world enterprise solutions with NAV, Cloud, and the Microsoft stack About This Book Integrate NAV with various offerings of the Microsoft stack to create enterprise-ready and service-oriented solutions Use Power BI and Universal Windows Platform for effective data analysis and real-time tracking with NAV Discover the services offered by Microsoft Azure and implement them in different industries using real-world case scenarios Who This Book Is For This book is for NAV developers and solution architects who need to implement real-world enterprise solutions based on Microsoft Dynamics NAV. Knowledge of the NAV programming language (C/AL) and C# language is recommended. Knowledge of ASP.NET and Visual Studio development would help, but is not necessary. What You Will Learn Configure NAV Web Services and create external applications with Visual Studio, .NET, and .NET Core Solve technical architectural problems by implementing enterprise solutions with NAV Develop applications and solutions with Microsoft Dynamics NAV and the Microsoft technology stack Create a Power BI dashboard for rich reporting and NAV data analysis Find out how to transmit your device location from a UWP application to NAV in order to implement a distributed solution for managing couriers in a sales company Make the most of Microsoft Azure and its services Create enterprise solutions with NAV by using Azure App Service Use Azure Service Bus for managing distributed NAV applications In Detail Implementing Microsoft Dynamics NAV in the real world often requires you to integrate the ERP with external applications or solve complex architectural tasks in order to have a final successful project. This book will show you how to extend a Microsoft Dynamics NAV installation to the enterprise world in a practical way. The book starts with an introduction to Microsoft Dynamics NAV architecture and then moves on to advanced topics related to implementing real-world solutions based on NAV and external applications. You will learn how an enterprise distributed architecture with NAV at the core can be implemented. Through a series of real-world cases on every topic and every industry (sales, retail, manufacturing, distribution, healthcare, and so on), you'll see step by step how to efficiently solve a technical problem. These common problems encountered in a NAV implementation will be solved using the entire technology stack that Microsoft offers. By the end of the book, you will have the knowledge to efficiently solve certain scenarios, you will know which is the best solution architecture to propose to a customer and how to implement it. Style and approach Taking you through a variety of real-world use cases, the book will show you step by step all you need to know to tackle these problems and give you creative ideas to implement in related problems you might come across in the real world.

In diesem Schulungshandbuch zu Microsoft Dynamics NAV 2018 RapidStart wird systematisch erklärt, wie mit Hilfe dieses Programms Daten exportiert oder importiert werden können. Prozesse werden nur dann erfolgreich gestaltet, wenn sie allen Handelnden verständlich sind und von Ihnen gemeinsam getragen werden. Dies gilt für Geschäftsprozesse, Organisationsabläufe und die Entwicklung geeigneter IT-Lösungen. Mit diesem Buch wird sichergestellt, dass Anwender, Entwickler, Berater und das Management dieselbe Sprache sprechen, um Geschäftsprozesse erfolgreich zu realisieren. Entscheidend ist dabei, dass das handelnde Subjekt in den Mittelpunkt gestellt wird. So werden Modellierung, Visualisierung, Validierung und Implementierung der Prozesse gleichermaßen am Menschen ausgerichtet. Durchgängige Beispiele und eine umfassende Fallstudie stellen ein Höchstmaß an Verständlichkeit und Praxisbezug sicher. Zusätzlich werden geeignete Modellierungs-Werkzeuge online zur Verfügung gestellt.

Die Produktionswirtschaft gehört nicht erst seit Erich Gutenberg zu den klassischen Säulen der Betriebswirtschaftslehre, sondern besitzt darüber hinaus auch grosse Aktualität, denn es gilt unter den Bedingungen globalen Standortwettbewerbs die Produktion in Abhängigkeit von den ökonomischen Rahmenbedingungen so zu gestalten, dass nachhaltige Wettbewerbsvorteile entstehen. Das Handbuch versteht sich vor diesem Hintergrund als aktuelles Lehr- und Nachschlagewerk, das einen wissenschaftlich fundierten Überblick über Produktionstheorie, Produktionsmanagement, Produktionslogistik und Produktionscontrolling vermittelt. Für jeden dieser Bereiche werden neben aktuellen Entwicklungen grundlegende Zusammenhänge und wichtige Lösungsverfahren aufgezeigt.

Dieses Buch wird von MBS Academic Alliance empfohlen! Leicht und konkret zeigt es, wie Sie selbst das Maximale aus Ihrer ERP Lösung herausholen. Optimieren Sie die Abläufe Ihres Unternehmens mit Microsoft Navision, indem Sie Masken, Berichte, Tabellenansichten und wichtige Meldungen auf Ihre individuellen Bedürfnisse anpassen. Anhand von vielen brauchbaren Beispielen erlernen Sie schnell und leicht wichtige Konzepte und Werkzeuge zur Entwicklung Ihres eigenen Systems.

Promoting the design, application and evaluation of visually and electrically effective LED light sources and luminaires for general indoor lighting as well as outdoor and vehicle lighting, this book combines the knowledge of LED lighting technology with human perceptual aspects for lighting scientists and engineers. After an introduction to the human visual system and current radiometry, photometry and color science, the basics of LED chip and phosphor technology are described followed by specific issues of LED radiometry and the optical, thermal and electric modeling of LEDs. This is supplemented by the relevant practical issues of pulsed LEDs, remote phosphor LEDs and the aging of LED light sources. Relevant human visual aspects closely related to LED technology are described in detail for the photopic and the mesopic range of vision, including color rendering, binning, whiteness, Circadian issues, as well as flicker perception, brightness, visual performance, conspicuity and disability glare. The topic of LED luminaires is discussed in a separate chapter, including retrofit LED lamps, LED-based road and street luminaires and LED luminaires for museum and school lighting. Specific sections are devoted to the modularity of LED luminaires, their aging and the planning and evaluation methods of new LED installations. The whole is rounded off by a summary and a look towards future developments.

Twelve Years a Slave (1853) is a memoir and slave narrative by Solomon Northup, as told to and edited by David Wilson. Northup, a black man who was born free in New York, details his kidnapping in Washington, D.C. and subsequent sale into slavery. After having been kept in bondage for 12 years in Louisiana by various masters, Northup was able to write to friends and family in New York, who were in turn able to secure his release. Northup's account provides extensive details on the slave markets in Washington, D.C. and New Orleans and describes at length cotton and sugar cultivation on major plantations in Louisiana.
