A survey of violence in western Europe from the Reformation to the French Revolution.

This is the first volume to take a broad historical sweep of the close relation between medicines and poisons in the Western tradition, and their interconnectedness. They are like two ends of a spectrum, for the same natural material can be medicine or poison, depending on the dose, and poisons can be transformed into medicines, while

medicines can turn out to be poisons. The book looks at important moments in the history of the relationship between poisons and medicines in European history, from Roman times, with the Greek physician Galen, through the Renaissance and the maverick physician Paracelsus, to the present, when poisons are actively being turned into beneficial medicines.

Students and instructors alike praise *A History of Modern Europe* for its authoritative coverage from the Renaissance to the present day. Written in Merriman's signature narrative style, the book is brightened with humor and biographical sketches. The Fourth Edition reflects the latest scholarship while placing special emphasis on the theme of war and society. A new full-color design features a completely redrawn map program and new pedagogical and teaching tools.

This Handbook re-examines the concept of early modern history in a European and global context. The term 'early modern' has been familiar, especially in Anglophone scholarship, for four decades and is securely established in teaching, research, and scholarly publishing. More recently, however, the unity implied in the notion has fragmented, while the usefulness and even the validity of the term, and the historical periodisation which it incorporates, have been questioned. The *Oxford Handbook of Early Modern European History, 1350-1750* provides an account of the development of the subject during the past half-century, but primarily offers an integrated and comprehensive survey of present knowledge, together with some suggestions as to

how the field is developing. It aims both to interrogate the notion of 'early modernity' itself and to survey early modern Europe as an established field of study. The overriding aim will be to establish that 'early modern' is not simply a chronological label but possesses a substantive integrity. Volume I examines 'Peoples and Place', assessing structural factors such as climate, printing and the revolution in information, social and economic developments, and religion, including chapters on Orthodoxy, Judaism and Islam.

Themes in Modern European History 1780-1830 is an authoritative and lively exploration of a period dominated by events which have shaped modern Europe. In a series of articles, six leading academics present some controversial conclusions: the east/west contrast in Europe today has more to do with responses to the French Revolution of 1789 than the Russian Revolution of 1917 the conservative Europe of 1814 was the product of the Romantic imagination, not a `Restoration' of the old regimeSpanning political, social, economic and demographic facets of revolutions, this is an indispensable textbook for all students of the nineteenth century, and for all those interested in understanding the nature of Europe today.

Since its publication in 1987 early Modern Europe (1500 - 1789) has become a bestselling, well-loved classic. Opening at the climax of the Renaissance - when

an educated, city-based laity began to bring their special demands and sensibilities to bear on earlier traditions the book chronicles the dawning of a new age on the continent. Combining the freshness of an interpretive essay with the breadth of wide-ranging historical synthesis, Koenigsberger paints a detailed picture of the Reformation and its significance as increasingly powerful nations began to intrude on their subjects' public and private lives. The text ends with a discussion of the conflicts between personal freedom and the rights of authority that shattered forever the old European order. Early Modern Europe 1500 - 1789 was originally published as the central volume in the bestselling illustrated Series, 'A History of Europe', edited by H G Koenigsberger and Asa Briggs, charting Europe's history from the collapse of the Roman Empire to modern times. Modern European History brings together a unique selection of documents covering the period from 1871 to 2000. The collection is organised by topic, and a clear historical context and chronological chart provide background for each section. This second edition brings the book up to date and includes such key themes in European history as: * Bismarck and Imperial Germany * the Russian Revolution * the origins and aftermath of the First and Second World Wars * Fascist Italy and Nazi Germany * The Spanish Civil War * The Cold War * European Integration 1945-1999 Containing documents such as extracts from

Its sixteen thematic chapters - each written by an expert in the field - cover social and economic developments, the rise and fall of all the major political movements as well as the immense changes generated by war and international diplomacy across Europe.

Rosemary Wakeman's original survey text comprehensively explores European urban history in the modern period from 1815 to the present day. It provides a journey to cities and towns across the continent, in search of the patterns of development that have shaped the urban landscape as indelibly European. The focus is on the built environment, the social and cultural transformations that mark the patterns of continuity and change, and the transition to modern urban society. Including 50 images and 15 maps that serve to illuminate the analysis, the book examines the questions: is there a European city, and if so, what are its characteristics?

Wakeman offers an interdisciplinary approach that incorporates concepts from cultural and postcolonial studies, as well as urban geography, and provides full coverage of urban culture and society not only in Western Europe, but also in Eastern and Southern Europe, using various cities and city types to inform the discussion. The book also provides hitherto neglected detailed coverage of European urbanization post-1945 which allows us to more clearly understand the modernizing arc the region has followed over the last two centuries.
