"Quality preschool programs to serve the needs of dual career families and of youngsters at risk need to be recorded and disseminated. This collection does just that. A wide variety of successful intervention, prevention and remediation programs for young children is described in a collection of research reports that are aimed at a more general audience, such as teachers and practitioners who will want to know about the research foundations and techniques and the program materials that they use. The researchers represent a variety of cultural backgrounds, including England, France and the USA. Work in training intervenors, and in implementing a wide variety of programmatic modes is presented. Some of the research reports present programs; others introduce new ideas in little-known programs."--BOOK JACKET. Title Summary field provided by Blackwell North America, Inc. All Rights Reserved

This book traces the early history of the Montessori movement in the United States through the lives and careers of four key American women: Anne George, Margaret Naumburg, Helen Parkhurst, and Adelia Pyle. Caught up in the Montessori craze sweeping the United States in the Progressive era, each played a significant role in the initial transference of Montessori education to America and its implementation from 1910 to 1920. Despite the continuing international recognition of Maria Montessori and the presence of Montessori schools world-wide, Montessori receives only cursory mention in the history of education, especially by recognized historians in the field and in courses in professional education and teacher preparation. The authors, in seeking to fill this historical void, integrate institutional history with analysis of the interplay and tensions between these four women to tell this educational story in an interesting—and often dramatic—way.
