Mountain rescue in western Canada developed through the Canadian Pacific Railway's use of Swiss guides to enhance the climbing experience in the early 1900s. These guides brought their knowledge of mountain rescue to the Canadian Rockies. As climbing gained in popularity with the emerging middle classes after the Second World War, tragic accidents became more common. Two accidents in 1954/55 (the deaths of a group of female climbers from Mexico on Mt. Victoria and a group of Philadelphia schoolboys on Mt. Temple) forced the government to develop a professional mountain rescue team through the Park Warden Service under the tutelage of Walter Perren (a Swiss guide and the father of mountain rescue in Canada). Perren essentially turned cowboys into competent rescue personnel, and the story takes off from there. Following five principal men through the first 50 years of mountain rescue in Canada, Guardians of the Peaks also looks at all aspects of the rescue experience. It is the story of personal tragedy and the ability of individuals to cope with this stress-laced, demanding occupation.

Hermes on Two Wheels shows the dynamic world of the bicycle messenger through a sociological lens, based on a five-year participant observation study. Beginning with the experiences of messengers themselves and moving to describe the structural settings of those experiences, the research shows how messengers work within a political-economic system that devalues semi-skilled labor and strips people of emotional fulfillment. The voluntary risk-taking of messengers becomes a means of achieving such emotional fulfillment as well as making a living, while their stylistic expressions pay dividends in cultural scrip rather than money. Through their work, messengers help to reproduce and maintain the structures of society while also constructing a vibrant, rebellious, politicized subculture that has come to represent the new urban hipster, an image continually under threat of co-optation.

Since 2010 Tim Foley has been the driving force of a campaign to honour a man with a remarkable story. Tom Crean, the subject of the new book 'Crean -The Extraordinary Life of an Irish Hero,' was born and raised a few miles away from the author's father, on the breathtaking Dingle Peninsula in County Kerry, Ireland. Tim's narrative in this Special edition, standalone biography, is based on many years of research and study into the life of Crean, who joined the Navy at 16-years-old and who embarked upon a career that saw him become a member of three major, pioneering Polar expeditions of the 20th century. Much of the research undertaken for this biography sheds new light on Crean's story and the book challenges commonly held beliefs about the life and naval career of Tom Crean. The story commences in late 19th century Ireland under the governance of the British Empire and continues through Crean's career in the Royal

Navy whilst serving under the leadership of Captain Robert Falcon Scott and Sir Ernest Shackleton over the course of three Antarctic expeditions, Discovery, 1901-1904, Terra Nova, 1910-1913 and Endurance, 1914-1916. After serving an unhappy apprenticeship under the strict governance of the Navy at the age of 16, Able Seaman, Tom Crean found himself thrust into a major international incident on his first Naval assignment to Central America. It sparked another miserable period of his Naval career and resulted in demotions until an opportunity arose that would lead him to the place where he became most associated with – Antarctica. Crean found his true calling during the heroic age of exploration on the frozen continent. Four of the chapters in the book focus on documented tales of Crean's remarkable heroism that brought about the life-saving rescue of 25 of his colleagues over three separate occasions. We are then taken through to Crean's retirement and his return to a changed country in the aftermath of rebellion and in the midst of a War of Independence that came at a great personal loss to Tom Crean. The book goes on to question why and how Crean's story was largely forgotten during his lifetime and after his death and reveals the surprising source of the first ever documented account of Crean's Polar feats that was written in 1952. Continuing the story the author details the efforts now being made in a petition to earn him national recognition from the Irish Government. Born in 1877, the son of a farmer and into an impoverished life in County Kerry, Ireland, Tom Crean's tale is one of suffering, successes and sadness but above all, it's an inspirational story of an unassuming man who displayed unparalleled bravery to save the lives of many others whilst subject to the harshest conditions on the planet. This book version is a Special volume, second edition written to commemorate the centenary of Tom Crean's retirement from the Royal Navy in 1920. It features additional, freshly sourced information, new images and maps, added to assist readers through the journey of Tom Crean's life.
