The sixth in a series of historical novels for children, *Danny and Life on Bluff Point: The Conflict* finds the Lee family engaged in a social conflict that will test their values. It is May 1895, and the Lee children greet the spring weather with jubilation. It's a time for picking wildflowers, awaiting the births of baby farm animals, and helping Pa and Ma with the chores. However, this idealistic world is about to change. While riding his horse one day, ten-year-old Danny Lee meets their new neighbor from Virginia, Robert Overhouser, never knowing how much this one man will change his life. Even though the Civil War happened thirty years ago, some members of the very Yankee community of Bluff Point, New York, isn't too happy about welcoming a Southerner into their midst. The friction between Mr. Overhouser and the rest of the town spills over to the Lee children, and Danny and his siblings soon find themselves coming to the defense of the Overhouser family in school. However, throughout the conflict between the town and the family, both sides learn valuable lessons about prejudice, forgiveness, and acceptance.

In this book, editors Karen E. Waldron and Robert Friedman have assembled a collection of essays that study the interconnections between literature and the environment to theorize literary ecology. The disciplinary perspectives in these essays allow readers to comprehend places and environments, and to represent, express, or strive for that comprehension through literature. Contributors to this volume explore the works of several authors, including Gary Snyder, Karen Tei Yamashita, Rachel Carson, Terry Tempest Williams, Chip Ward, and Mary Oliver. Other essays discuss such topics as urban fiction as a model of literary ecology, the geographies of belonging in the work of Native American poets, and the literary ecology of place in "new" nature writing. Investigating texts for the complex interconnections they represent, this book suggests what such texts might teach us about the interconnections of our own world.

The work that Maurice Merleau-Ponty planned to call *The Prose of the World*, or *Introduction to the Prose of the World*, was unfinished at the time of his death. The book was to constitute the first section of a two-part work whose aim was to offer, as an extension of his *Phenomenology of Perception*, a theory of truth. This edition's editor, Claude Lefort, has interpreted and transcribed the surviving typescript, reproducing Merleau-Ponty's own notes and adding documentation and commentary.

All churches like to think that theirs is the friendliest in town. But do visitors see it that way? Church consultant Gary McIntosh invites readers to take a look at their church through the eyes of visitors and potential visitors. His starting point, grounded in an understanding of God as a "welcomer," is that churches should see those who enter their doors as not merely visitors, but as guests, and themselves as gracious hosts. This practical book offers sound advice on assessing and improving the ways in which churches attract people, welcome them, do follow-up, and bring them into the church family. It also offers suggestions for making a welcoming attitude part of the very fabric of the local church.

In nine lively essays, bioethicist J. David Velleman challenges the prevailing consensus about assisted suicide and reproductive technology, articulating an original approach to the ethics of creating and ending human lives. He argues that assistance in dying is appropriate only at the point where talk of suicide is not, and he raises moral objections to anonymous donor conception. In their place, Velleman champions a morality of valuing personhood over happiness in making end-of-life decisions, and respecting the personhood of future children in making decisions about procreation. These controversial views are defended with philosophical rigor while remaining accessible to the general reader. Written over Velleman's 30 years of undergraduate teaching in bioethics, the essays have never before been collected and made available to a non-academic audience.

They will open new lines of debate on issues of intense public interest.

This book is the first in-depth investigation of the Goth subculture in Italy, focusing in particular on the city of Milan. It grows out of a three year research project - the first in Italy of this scope on the topic - based on the life histories of two dozen participants. In light of this, Simone Tosoni and Emanuela Zuccalà propose an innovative approach to the study of spectacular subcultures: contrarily to the most common accounts of the spectacular subcultures of the 80s, this book describes the experience of subcultural belonging as plural and internally diversified. In particular, three different variations - or 'enactments' - of goth are described in-depth: the politically engaged one; the one typical of the scene of the alternative music clubs spread all over northern Italy; and the one, common in the little towns surrounding Milan (but not limited to it), where participants used to 'enact' the dark subculture alone or in small groups. Their book argues that while these three different variations of goth shared the same canon of subcultural resources (music, style, patterns of cultural consumptions), they differed under relevant points of view, like forms of socialization, stance toward political activism, identity construction processes, and even their relationship with urban space. Yet, contrarily to the stress on individual differences in 'subcultural' belonging typical of post-subcultural theorists, the Milanese variations of goth appear to have been socially shared, as socially shared were the different 'practices of enactment' of the subculture that characterized each of them.

After completing my first book, I sat down and took notes of what was learned from what I did, and I must admit that I had learned an enormous amount of information about publishing. There were things to consider, like preparation of work, presentation of poetry, promotional strategies, etc., and still having Parkinson's Disease didn't do me any favours. But as I have always stated,

you can't keep a champion down, and with my God being so gracious in more ways than I am able to acknowledge, I press on with my quest, to try and give as many people as I am able, a solid, even chance of salvation. My style of poetry may be somewhat unusual, maybe a bit out of the ordinary, but I have always tried to make my work as appealing as I can to as many as there are who love the simplicity of my work. I have tried to reduce the introductions of each poem to a minimum, but I still value the introductions, as they help to bring clarity to the point that I am attempting to put across, and therefore, very few misunderstandings and upsets are made. It must be emphasized that my poetry expresses my point of view on subjects written about, how I actually see things from my angle, you may see differently, or may even disagree, but no matter what, I have designed my work specifically with the task of getting people to open up about the topics I write about, because there is nothing like a good, open debate to allow people the opportunity to communicate with each other, and so open up a door for an opportunity to present all with a chance of salvation. As I wrote in my last book, my primary objective is the saving of souls, and by presenting my work in such a simple way, I may assist people to realize that Jesus died for all, and so salvation is also for all who dare to believe.

Until she makes a terrible mistake that results in her friends stumbling into mortal danger. This fifth book in the 'Full Moon' series seriously ramps up the stakes for our heroes, taking them to new emotional highs and lows as they face increasingly powerful adversaries. A beautiful book to help young children explore the world around them. With charming illustrations and simple labels, My First Words encourages children to look, point and learn. From one of continental philosophy's most distinctive voices comes a creative contribution to spatial studies, environmental philosophy, and phenomenology. Edward S. Casey identifies how important edges are to us, not only in terms of how we perceive our world, but in our cognitive, artistic, and sociopolitical attentions to it. We live in a world that is constantly on edge, yet edges as such are rarely explored. Casey systematically describes the major and minor edges that configure the human and other-than-human realms, including our everyday experience. He also explores edges in high-stakes situations, such as those that emerge in natural disasters, moments of political and economic upheaval, and encroaching climate change. Casey's work enables a more lucid understanding of the edge-world that is a necessary part of living in a shared global environment.

More than a quarter-century ago, the last great wave of coeducation in the United States resulted in the admission of women to almost all of the remaining men's colleges and universities. In thirteen original essays, *Going Coed* investigates the reasons behind this important phenomenon, describes how institutions have dealt with the changes, and captures the experiences of women who attended these schools. Key issues covered include: the impact of the women's movement and the development of women's studies as an academic discipline, the pressures exerted on institutions by economic necessities and legal challenges, and the strategies women have utilized in adapting to formerly all-male environments.
