"Over 1,111 answers to everything"--Cover.

National Geographic spins off its best-selling Little Kids First Big Book series into engaging new board books to introduce even the littlest kids to high-quality nonfiction. These sturdy pages explore the basics of the solar system with amazing photographs, super-simple facts, and lively, age-appropriate language to keep babies and toddlers--and their grown-ups--fascinated by every colorful page. With stunning photos of the Earth and other planets, this beautiful book introduces the very youngest explorers to the wonders of the space, beginning right here on Earth and expanding into the universe beyond. Designed to be the stepping stone to the Little Kids First Big Book series, the National Geographic Little Kids First Board Books take similar subjects and drill them down to the simplest nonfiction concepts for the youngest audience. Not only will readers learn about planets and our solar system, they can also find recurring shapes and patterns in the design; occasional callouts will add humor for adults, and sidebar text offers additional learning for older siblings or those ready for more complex information. With their square shape, bright and playful design, awesome photography, clear text, and cues to encourage interactive learning, the Little Kids First Board Books mirror the beloved First Big Books while taking a fresh new approach to excite a baby's sense of wonder and make learning about nature and science fun.

Dig into the amazing past of ancient Egypt in this new Level 3 Reader from National Geographic Kids. Access Free National Geographic Kids Readers Planets National Geographic Kids Readers Level 2

Collects four books about planet Earth, covering storms, weather, rocks and minerals, and volcanoes.

Words, photos, charts, and illustrations combine to explain the mysteries of space. All these are arranged in short bursts of information that will ease comprehension for learners of all kinds.

The cool story of volcanoes will intrigue kids and adults alike. Hot melted rock from the middle of our planet forces its way up through cracks in the Earth's crusts, exploding violently and sometimes unexpectedly in volcanic fury that can terrorize populations for months, even years. Anne Schreiber's narrative gives readers a little of the science, a little of the history, and a lot of the action. National Geographic photography fires the imagination on dramatic spreads alive with vivid images of lava, ash, molten rock, weird rocks, and steaming seawater.

Powerful weather, bursting volcanoes, sparkling gemstones, and more will fascinate science and fact-hungry kids. Experience the whirl of a hurricane, dig deep and learn about the rocks that make up our planet, and discover the amazing feeling of a rainstorm. National Geographic Kids brings readers some of their reader's favorite science topics in one convenient package. Fascinating science information is accompanied by wonderful photographs to ensure that kids' natural curiosity is both satisfied AND inspired.

Introduces basic concepts about outer space, from the sun and the moon to the planets and space exploration.

Collects four books about planet Earth, covering storms, weather, rocks, minerals, and volcanoes.

Introduces young readers to each part of our solar system, including the sun, every planet, moons, the asteroid belt, and the Kuiper belt.

The world is full of mind-blowing marvels and this book uncovers our planet's most peculiar phenomena, puzzles from the past, eye-opening inventions, astonishing animals, and so much more! Did you know that caterpillars liquefy when they turn into butterflies? That humans shed eight pounds of skin every year? That there's a funky forest in Poland where all the trees are mysteriously crooked? That space smells like burnt plastic? Our world is filled with strange, bizarre, and weird realities. But what do they mean? WHY are they important? And what exactly is the secret behind them? National Geographic Kids presents a jam-packed new series perfect for fans of *Weird But True!* and *5,000 Awesome Facts*. With cool, action-packed photos, tons of awesome information, and filled to the brim with the weirdest facts ever, this book takes readers behind the scenes of the world of the truly bizarre, to reveal the truth behind our planet's wildest and wackiest. Meet the bizarre bacteria that make Yellowstone National Park's Morning Glory Pool pop with radiant color, discover the mysteries behind the Sphinx of ancient Egypt, learn why the beaches of the Maldives glow bright blue, how tornadoes are so powerful, and so much more! And with Q&As with in-the-field experts, fantastic infographics, exciting stories, and more, this book presents a fresh way of looking at our bizarre planet. So, get ready to experience our not-so-secret world.

Introduces facts about the planets, distinguishing between the inner, gas, and dwarf planets, and discusses how scientists learn about the planets and outer space.

???????,???????.??-???(Theodor Seuss Geisel,1904~1991)

Provides information about the planet, including its location in the solar system, size, geology, temperature, atmosphere, and the technology used in Mars exploration.
