Who This Book Is For This course is meant for Java developers who are comfortable developing applications in Java, and now want to enter the world of data science or wish to build intelligent applications. Aspiring data scientists with some understanding of the Java programming language will also find this book to be very helpful. If you are willing to build efficient data science applications and bring them in the enterprise environment without changing your existing Java stack, this book is for you! What You Will Learn Understand the key concepts of data science Explore the data science ecosystem available in Java Work with the Java APIs and techniques used to perform efficient data analysis Find out how to approach different machine learning problems with Java Process unstructured information such as natural language text or images, and create your own search Learn how to build deep neural networks with DeepLearning4j Build data science applications that scale and process large amounts of data Deploy data science models to production and evaluate their performance In Detail Data science is concerned with extracting knowledge and insights from a wide variety of data sources to analyse patterns or predict future behaviour. It draws from a wide array of disciplines including statistics, computer science, mathematics, machine learning, and data mining. In this course, we cover the basic as well as advanced data science concepts and how they are implemented using the popular Java tools and libraries. The course starts with an introduction of data science, followed by the basic data science tasks of data collection, data cleaning, data analysis, and data visualization. This is followed by a discussion of statistical techniques and more advanced topics including machine learning, neural networks, and deep learning. You will examine the major categories of data analysis including text, visual, and audio data, followed by a discussion of resources that support parallel implementation. Throughout this course, the chapters will illustrate a challenging data science problem, and then go on to present a comprehensive, Java-based solution to tackle that problem. You will cover a wide range of topics – from classification and regression, to dimensionality reduction and clustering, deep learning and working with Big Data. Finally, you will see the different ways to deploy the model and evaluate it in production settings. By the end of this course, you will be up and running with various facets of data science using Java, in no time at all. This course contains premium content from two of our recently published popular titles: Java for Data Science Mastering Java for Data Science Style and approach This course follows a tutorial approach, providing examples of each of the concepts covered. With a step-by-step instructional style, this book covers various facets of data science and will get you up and running quickly.

Do you want to learn how to use manipulation techniques and dark psychology secrets to analyze and influence people easily? If yes, then keep reading... NLP can be divided into three major components, making up its name: neuro, linguistic, and programming. Of course, these are not the only concepts that govern the use and practice of NLP. In addition to neuro, linguistic, and programming, concepts such as subjectivity, consciousness, and learning (also known as modeling) are essential to the art of NLP. Having a good understanding of these concepts is the key to mastering advanced NLP techniques and procedures to be used in everyday life, as they provide a solid foundation to build and develop your NLP skills on. While the basics will be touched

on in this section, more detailed techniques will be explained in the following section. Neuro refers to the body's nervous system, in particular, the most important part of the nervous system, the brain. While human beings receive information from the outside world by using the five senses, the brain is responsible for sorting through and organizing all of the information that is received and plays a vital role in how you decide to act based on that information. Everyone's brain has a slightly different method of filtering through information: some are faster, more efficient, and more observant, while other people have to take their time in sorting information, and are not able to maximize the value they receive from it, while still others are somewhere in between the two extremes. Of course, ideally, your brain would have a filtering process that is as quick and effective as possible. By utilizing NLP techniques, you can train your brain to handle the intake of information at a faster and more productive pace, and can better determine how to use that information to gain an edge over other people in the same environment. In NLP, your process for mentally filtering and sorting external information is crucial. After all, neuro is only the first step in the NLP process. Your first impression of the information gained from the filtering process is known as "First Access," and is comprised mainly of feelings, sounds, and images, all embedded within your subconsciousness. By being more attentive to the world around us, we can increase the strength of our First Access, and therefore have a better quality of information to feed our subconsciousness, which plays into how we make conscious decisions. Having a stronger First Access also impacts the ability to communicate with others, both on a conscious and subconscious level; if you have better access to information than another person, then you can better use that information to steer them in the direction that you want them to go. This book gives a comprehensive guide on the following: Hypnosis and NLP Different types of human predators & how to spot them The most effective ways to spot a predator of any kind Mind control techniques Don't say a word-body language Tactics to manipulate others The basics of brainwashing Neuro-linguistic processing: the art of manipulating yourself Traits of the dark and what dark psychology is How to know you are a victim of manipulation Discover your dark side and regain control of yourself ... ARE YOU READY TO DISCOVER THE TRUTH ABOUT THE SECRET ELIMINATION PROCESS? Do you know that airlines use hidden surveillance and undercover officers to eliminate 90% of unsuspecting candidates as early as possible? and do you know that you are up against a strict set of hidden criterion and secret discriminations? These are just a few of the tactics that airlines use to make sneaky elimination choices during the selection process. By understanding the process from the inside, you can avoid being slaughtered by the underhand tactics, and you can tip the balance of power in your favour, so that you become the one who is doing the screening, not the airline. Within this guide, you will not find pages of information informing you about the duties, history and roster structures, and neither will you find average advice that will have you looking and sounding like everyone else. This book is raw and will take you behind the scenes to reveal secrets that airlines don't want you to know. The information is universal, revealing how candidates are screened and hired all across the world, from the largest international carriers to the smallest national operators. The information is timeless, so you will not find outdated or irrelevant advice, and, most importantly, it is uncensored. For the first time, you be shown how to avoid the common traps and pitfalls, and the true reasons why no airline will ever tell you why you were unsuccessful in your pursuit. Whether you are a seasoned applicant who is finding yourself frustrated at another unsuccessful attempt or are a new candidate looking forward to your first interview, the insider secrets and step by step guidance will give you a huge lead over the competition.

This introduction to coaching, *Coaching Made Easy* uses a three-step process which aims to make the development tool accessible to all. The formula gives readers an understanding of what to do and when to do it, so that they can coach other staff easily and with confidence.
