This book presents essential teaching skills and tools for nurse educators. It begins with a discussion of the trends in nursing education and the principles of teaching and learning. The book then explores topics such as classroom teaching, clinical experiences, teaching in the simulation laboratory, and online learning. Each chapter discusses the basics of teaching and learning in the specific environment, followed by scenarios that focus on the issues encountered by nursing faculty in these settings. The scenarios present the key issues under consideration, recommend actions that faculty members can institute to address the issues, and describe rationales and solutions based on best evidence. The book also includes specific tools designed to assist nurse educators in preparation for the teaching role, such as examples of course syllabi, program outcomes, clinical contracts, and action plans. Nurse Educator's Guide to Best Teaching Practice is a valuable resource for novice and experienced educators in managing the challenges inherent in nursing education.

Do you ever feel overwhelmed by concepts in Community Health Nursing? Do you ever feel that it is just a small part of the entirety of nursing concepts yet you need to pass the subject to finish your nursing program? Do you consider this as your Achilles' heel in passing NCLEX? Community nursing is not a small matter at all. With the adaptive nature of the NCLEX exam, it may happen that you may incorrectly answer 2 to 3 questions on this subject and subsequently find yourself lost answering many similar questions as the exam progresses. Don't get lost! Be ready and put on your best armor for success. This test bank will help you significantly because it highlights important concepts that will help you understand community nursing. The quality of this test bank is assured because community health nurses themselves compiled the questions. The test bank has undergone the strictest development and evaluation processes so that accuracy and significance are ensured. The test bank reveals concepts from the book, "Introduction to Community-Based Nursing, Fifth Edition by Roberta Hunt." The questions and rationales have been streamlined to include most important concepts to remember. It also includes the latest NCLEX question structure, the SATA (Select All That Applies) questions to further enhance your test-taking skills. The book itself develops clinical reasoning that will be helpful in these times when home health in the community setting gains momentum as stay in acute care settings is shortened. It also gives a fair emphasis on cross-cultural care. Furthermore, it provides a great insight into how the family influences individual care. Whether you are a student taking this subject, a graduate aspiring to be a professional or already a registered nurse looking into community nursing as a career path, this test bank is a powerful tool to help achieve your goals.
