researching interprofessional simulation-based education and simulation. It provides empirical findings from research on this topic and is informed by practice-oriented perspectives. It identifies critical features of the simulation practice and discusses how these can be used in reforming simulation pedagogy. The book is divided into three sections. Section 1 sets the scene for understanding the practices of interprofessional simulation-based education and simulation. It provides a theoretical and methodological framework for the conceptualisation of practices and for the empirical studies on which the book is based. Section 2 revisits the dimensions of the simulation process/exercise, i.e. the briefing, simulation, and debriefing, and provides empirical analyses of how the practice of simulation unfolds. Based on these analyses, section 3 identifies and discusses how pedagogies for simulation can be reformed to meet the demands of future healthcare and research.

This edition presents observation skills in conjunction with effective teaching practices. Presents observation skills according to eight areas related to positive outcomes in learners which include: learning climate, classroom management, lesson clarity, instructional variety, task orientation, student engagement, student success, and higher thought processes. Prepares pre-service teachers, student teachers, and first year teachers for classroom observation.

This handbook advocates a new approach to teacher evaluation as a cooperative effort undertaken by a group of professionals. Part 1 describes the need for changed teacher evaluation, and part 2 outlines ways to use multiple data sources, including student and parent reports, peer review of materials, student achievement results, teacher tests, documentation of professional activity, systematic observation, and administrator reports, as well as discussions of the teacher as curriculum designer and data sources to avoid. Part 3 describes tools for improved teacher evaluation, and the evaluation of other educators is outlined in part 4. School district responsibilities and activities are described in part 5. This edition adds new chapters on: (1) the role of the principal in changed teacher evaluation; (2) how districts can transform current practice; (3) use of national standards; (4) developments in using student achievement data; and (5) the development of sociologically sophisticated teacher evaluation systems. Emphasis is placed on the use of the Internet as a resource and other new resources for local development. A list of legal cases cited is included. (Contains 343 references.) (SLD)
