Versi PDF atau Pembayaran Lewat Paypal/BCA/Mandiri disini: <http://shop.vitraining.co> OpenERP / Odoo provides an application programming interface using it's XML-RPC webservice. The service is ready to be accessed by any programming language that is capable on communication through XML-RPC interface. This book explain in details on how to setup, configure, and do the integration of external system into OpenERP/ Odoo. Started with the OpenERP installation steps both for Linux and Windows, then PHP XAMPP installation for both operating systems, and the required preparation steps to take in order that the systems are ready to be integrated together. Taking PHP as the interfacing scripting language using it's XML-RPC library, this book explains how to create a PHP class that contains methods for login, search, read, create, delete, and update data stored on OpenERP. Then how to use that class for real life example on accessing a legacy MySQL database and importing the data into OpenERP, and managing the status of already imported data. PHP provides a wide variety of object oriented frameworks, so this book also explain on how to use the class from inside a PHP framework, taking Yii Framework as an example. At the end of the topics, it's explained on how to automate the integration process periodically. In Linux we utilize the cron job, and in Windows we use the Task Scheduler. The book is live, downloadable, and purchasable from Google Play store, but you can also purchase it directly from <http://vitraining.com/shop> where payment can be made in local Indonesian bank. Das Buch bietet einen umfassenden Überblick der am Markt angebotenen quelloffenen Unternehmenssoftware. Mit der praxisnahen Einführung in Open Source Unternehmenssoftware und dem enthaltenen Marktspiegel liefern die Autoren eine wertvolle Grundlage zur Softwareauswahl. Zum Hintergrund: Bei Open Source (OS) Software werden Software und zugehöriger Quellcode den Anwendern kostenlos bereitgestellt. Bei Infrastruktursoftware (z. B. Betriebssysteme, Firewalls usw.) ist OS Software bereits weit verbreitet und IT-Kosten können deutlich reduziert werden. Zunehmend wird auch OS Unternehmenssoftware angeboten. Diese ist ein idealer Ansatz zur Kostenminimierung im IT-Bereich. Dies gilt vor allem für Enterprise Resource Planning (ERP-) Systeme, Customer Relationship Management (CRM-) Systeme, Business Intelligence (BI-) Systeme, Business Process Modeling (BPM-) Systeme, Workflowmanagementsysteme und Projektmanagementsysteme. Noch ist die Durchdringung von OS Unternehmenssoftware in der betrieblichen Praxis gering. Ursache ist vor allem die Unübersichtlichkeit des Marktes. Hier schafft das Buch mit seiner Sammlung der derzeit am Markt angebotenen OS Enterprise Softwaresysteme Abhilfe.

In Unternehmen aller Art und Größe spielen betriebswirtschaftliche Anwendungssysteme oder Warenwirtschaftssysteme für die Bewältigung der aufkommenden Arbeiten eine zentrale Rolle. Für solche sogenannten ERP-Systeme (Enterprise Resource Planning Systeme) gibt es national und international eine Vielzahl an Anbietern. Eine ganz besondere Gruppe stellen die Open Source Systeme, also Systeme bei denen der Quelltext offen lesbar ist, dar. Diese besonderen Anwendungssysteme tauchen immer wieder aufgrund fehlender Lizenzkosten und absoluter Herstellerunabhängigkeit im zentralen Bewusstsein der IT-Entscheider auf. Um diesen Bereich objektiv zu durchleuchten wird in dieser Arbeit ein wissenschaftliches Konzept vorgestellt, das als Evaluationsschema die Anzahl der Systeme reduziert. Hierzu wird eine Methodik verwendet, die die Auswahl methodisch auf einige wenige Anbieter beschränkt. Insgesamt werden 85 Open Source ERP-Anbieter untersucht. Als Grundlage für die Evaluationen dienen dabei funktionale-technische und nichtfunktionale Anforderungen. Die funktional-technischen Anforderungen orientieren sich dabei an aktuellen Trends und Tendenzen moderner ERP-Systemanbieter auf Basis anderer wissenschaftlicher Ausarbeitungen und Studien. Nichtfunktionale Anforderungen dagegen werden in dieser Studie nach der gängigen ISO Norm zur Softwarequalität bestimmt. Zentraler Bestandteil der durchgeführten Evaluation ist dabei ein Anbieterverzeichnis, das im Laufe der Studie erstellt wurde. Dieses Verzeichnis enthält zusammenfassende lösungsneutrale Darstellungen und Informationen zu 38 aktuell relevanten Systemanbietern aus dem Bereich der Open Source ERP-Systeme. Demnach enthält es auch allgemeine, technische und funktionale Anforderungen und Trends. Die gewonnenen Informationen werden unter dem Aspekt der Leistungsfähigkeit und des Einsatzgebietes mit anderen wissenschaftlichen Arbeiten gegenübergestellt und verglichen. Auf diese Weise konnte ein praktischer Nutzen dieser Systeme nachgewiesen und eine Empfehlung auf Basis entscheidender Gewichtungsfaktoren ermittelt werden.

The goal of this Master Thesis project is to improve the process maturity, using CMMI and ITIL best practices, in two specific business processes like Marketing Expansion and Sales Order for NFV services (AS-IS). The two above processes were implemented using an open-source Enterprise Resource Planning (ERP) called Odoo/OpenERP. This powerful tool is a suite of enterprise management applications that offers several modules to use, in our case are sales and product modules. And that gave us the possibility to offer specific ICT services and designing our NFV service catalog. Once we finished to implement both business processes in Odoo, we take profit of ITIL for the service management adaptation to increase maturity level. ITIL was very useful in this case, because it is a powerful best practice for service management lifecycle. After reviewing all ITIL books and studying them, we found a valuable information in Service Strategy, Service Design and Service Operation Phases (that characterize ITIL itself) for process analysis. In this way, finally we could design the adopted processes and services (TOBE) in Odoo system in Sales Module, with the intention of increasing the process maturity level CMMI Level 3 using CMMI® best practice.

This book discusses the latest advances in manufacturing and process control, with a special emphasis on digital manufacturing and intelligent technologies for manufacturing and industrial processes control. The human aspect of the developed technologies and products, their interaction with the users, as well as sustainability issues, are covered in detail. Development of new products using rapid prototyping systems, remote fabrication, and other advanced techniques, is described in detail, highlighting the state-of-the-art and current challenges. Based on both the AHFE 2019 International Conference on Human Aspects of Advanced Manufacturing, and the AHFE 2019 International Conference on Advanced Production Management and Process Control, held on July 24-28, 2019, in Washington D.C., USA, this book also highlight important strategies for managing enterprise of the future.

Bisnis garment pada dasarnya menggunakan modul Manufacturing/ MRP namun banyak yang harus disesuaikan dengan spesifik produksi garment. Modul-modul Sales, Purchase, Warehouse, dan Accounting pada dasarnya sudah bisa langsung digunakan dengan konfigurasi yang benar. Pada buku ini dijelaskan secara detail bagaimana setup, konfigurasi, import data awal, input transaksi pada masing-masing modul yang diperlukan sampai sistem Odoo siap digunakan oleh user. Buku ini cocok bagi anda yang bergerak di industri garment secara langsung maupun untuk anda yang bergerak di bidang konsultasi IT dan hendak mengimplementasikan Odoo untuk client anda di bidang garment. Buku setebal sekitar 500 halaman ini merupakan panduan langkah implementasi praktis berdasarkan pengalaman penulis di beberapa perusahaan industri yang sangat berguna bagi anda untuk melakukan implementasi di perusahaan sendiri maupun bagi anda yang bergerak di bidang konsultasi IT khususnya OpenERP / Odoo. Dimulai dari import data saldo awal akuntansi dan barang di gudang, termasuk hutang piutang partner, pembahasan berlanjut dengan cara menggunakan modul Manufacturing, Sales, Purchase, Warehouse dan Accounting. Hal mengenai perpajakan di Indonesia, analytic dan budget per department, serta cara menggunakan email gateway, juga dibahas disini. Bahasa yang digunakan sengaja dibuat seringan mungkin mengingat pembahasan materinya sendiri sudah sangat berat. Penulis memiliki perusahaan konsultan IT yang salah satu bidang bisnisnya adalah konsultan implementasi OpenERP. Pada bidang ini, penulis telah banyak melakukan implementasi OpenERP baik di dalam maupun luar negeri, untuk berbagai jenis perusahaan seperti retail, e-commerce, distributor, manufaktur, dan oil trading. Semoga buku ini bermanfaat bagi kemajuan dunia bisnis retail dan IT di Indonesia. This guide consists of programming techniques that we faced often when implementing Odoo on our clients. Many of them are not well documented in the official Odoo documentation so we think that someone has to write them for use with others. The techniques covered here are mainly based on our field experience and some are taken from scattered online discussion forum.
