

Open Tourism Open Innovation Crowdsourcing And Co Creation Challenging The Tourism Industry Tourism On The Verge

This book presents the latest research of the field of optimization, modeling and algorithms, discussing the real-world application problems associated with new innovative methodologies. The requirements and demands of problem solving have been increasing exponentially and new computer science and engineering technologies have reduced the scope of data coverage worldwide. The recent advances in information communication technology (ICT) have contributed to reducing the gaps in the coverage of domains around the globe. The book is a valuable reference work for researchers in the fields of computer science and engineering with a particular focus on modeling, simulation and optimization as well as for postgraduates, managers, economists and decision makers

Although there have been considerable technological advances over the past decade, particularly in terms of mobile applications, much remains unknown about their effect on societal progress. This book focuses on how inequality and entrepreneurship are both by-products of technological change. The book

Read Online Open Tourism Open Innovation Crowdsourcing And Co Creation Challenging The Tourism Industry Tourism On The Verge

provides insights into how society has shifted from consumer division to human centricity, and helps readers gain a better understanding of the positive and negative effects of entrepreneurship.

This book includes a selection of articles from The 2019 World Conference on Information Systems and Technologies (WorldCIST'19), held from April 16 to 19, at La Toja, Spain. WorldCIST is a global forum for researchers and practitioners to present and discuss recent results and innovations, current trends, professional experiences and challenges in modern information systems and technologies research, together with their technological development and applications. The book covers a number of topics, including A) Information and Knowledge Management; B) Organizational Models and Information Systems; C) Software and Systems Modeling; D) Software Systems, Architectures, Applications and Tools; E) Multimedia Systems and Applications; F) Computer Networks, Mobility and Pervasive Systems; G) Intelligent and Decision Support Systems; H) Big Data Analytics and Applications; I) Human–Computer Interaction; J) Ethics, Computers & Security; K) Health Informatics; L) Information Technologies in Education; M) Information Technologies in Radiocommunications; and N) Technologies for Biomedical Applications.

Business systems undergo a number of transitions as the needs and demands of

Read Online Open Tourism Open Innovation Crowdsourcing And Co Creation Challenging The Tourism Industry Tourism On The Verge

society change. With heightened connectivity driven by the development of the Internet, new opportunities for venture development and creation have become available to business owners and entrepreneurs. Crowdfunding for Sustainable Entrepreneurship and Innovation is a pivotal reference source for the latest scholarly research and business practices on the opportunities and benefits gained from the use of crowdfunding in modern society, discussing its socio-economic impact, in addition to its business implications. Featuring current trends and future directions for crowdfunding initiatives, this book is ideally designed for students, researchers, practitioners, entrepreneurs, and policy makers. New financing models such as crowdfunding are democratizing access to credit, offering individuals and communities the opportunity to support, co-create, contribute and invest in public and private initiatives. This book relates to innovation in its essence to anticipate future needs and in creating new business models without losing revenue. There are tremendous unexplored opportunities in crowdsourcing and crowdfunding; two sides of the same coin that can lead to a revolution of current social and economic models. The reading of this book will provide insight on the changes taking place in crowdfunding, and offer strategic opportunities and advantages.

Businesses are looking for methods to incorporate social entrepreneurship in

Read Online Open Tourism Open Innovation Crowdsourcing And Co Creation Challenging The Tourism Industry Tourism On The Verge

order to generate a positive return to society. Social enterprises have the ability to improve societies through altruistic work to create sustainable work environments for future entrepreneurs and their communities. Social Entrepreneurship: Concepts, Methodologies, Tools, and Applications is a useful scholarly resource that examines the broad topic of social entrepreneurship by looking at relevant theoretical frameworks and fundamental terms. It also addresses the challenges and solutions social entrepreneurs face as they address their corporate social responsibility in an effort to redefine the goals of today's enterprises and enhance the potential for growth and change in every community. Highlighting a range of topics such as the social economy, corporate social responsibility, and competitive advantage, this multi-volume book is ideally designed for business professionals, entrepreneurs, start-up companies, academics, and graduate-level students in the fields of economics, business administration, sociology, education, politics, and international relations. After two decades of reinvention, Japanese companies are re-emerging as major players in the new digital economy. They have responded to the rise of China and new global competition by moving upstream into critical deep-tech inputs and advanced materials and components. This new "aggregate niche strategy" has made Japan the technology anchor for many global supply chains. Although the

Read Online Open Tourism Open Innovation Crowdsourcing And Co Creation Challenging The Tourism Industry Tourism On The Verge

end products do not carry a "Japan Inside" label, Japan plays a pivotal role in our everyday lives across many critical industries. This book is an in-depth exploration of current Japanese business strategies that make Japan the world's third-largest economy and an economic leader in Asia. To accomplish their reinvention, Japan's largest companies are building new processes of breakthrough innovation. Central to this book is how they are addressing the necessary changes in organizational design, internal management processes, employment, and corporate governance. Because Japan values social stability and economic equality, this reinvention is happening slowly and methodically, and has gone largely unnoticed by Western observers. Yet, Japan's more balanced model of "caring capitalism" is both competitive and transformative, and more socially responsible than the unbridled growth approach of the United States.

This book explores the ways in which information and communication technologies (ICTs) offer a powerful tool for the development of smart tourism. Numerous examples are presented from across the entire spectrum of cultural and heritage tourism, including art, innovations in museum interpretation and collections management, cross-cultural visions, gastronomy, film tourism, dark tourism, sports tourism, and wine tourism. Emphasis is placed on the importance

Read Online Open Tourism Open Innovation Crowdsourcing And Co Creation Challenging The Tourism Industry Tourism On The Verge

of the smart destinations concept and a knowledge economy driven by innovation, creativity, and entrepreneurship. New modes of tourism management are described, and tourism products, services, and strategies for the stimulation of economic innovation and promotion of knowledge transfer are outlined. The potential of diverse emerging ICTs in this context is clearly explained, covering location-based services, internet of things, smart cities, mobile services, gamification, digital collections and the virtual visitor, social media, social networking, and augmented reality. The book is edited in collaboration with the International Association of Cultural and Digital Tourism (IACuDiT) and includes the proceedings of the Third International Conference on Cultural and Digital Tourism.

The book is made up of a unique collection of contributions of leading scholars from different research areas to provide a systematic overview of the research on crowdsourcing, based on a clear definition of the concept, its difference for innovation, and its value for both private and public sector.

??This book attempts to link some of the recent advances in crowdsourcing with advances in innovation and management. It contributes to the literature in several ways. First, it provides a global definition, insights and examples of this managerial perspective resulting in a theoretical framework. Second, it explores the relationship

Read Online Open Tourism Open Innovation Crowdsourcing And Co Creation Challenging The Tourism Industry Tourism On The Verge

between crowdsourcing and technological innovation, the development of social networks and new behaviors of Internet users. Third, it explores different crowdsourcing applications in various sectors such as medicine, tourism, information and communication technology (ICT), and marketing. Fourth, it observes the ways in which crowdsourcing can improve production, finance, management and overall managerial performance. Crowdsourcing, also known as “massive outsourcing” or “voluntary outsourcing,” is the act of taking a job or a specific task usually performed by an employee of a company or contractors, and outsourcing it to a large group of people or a community (crowd or mass) via the Internet, through an open call. The term was coined by Jeff Howe in a 2006 issue of *Wired* magazine. It is being developed in different sciences (i.e., medicine, engineering, ICT, management) and is used in the most successful companies of the modern era (i.e., Apple, Facebook, Inditex, Starbucks). The developments in crowdsourcing has theoretical and practical implications, which will be explored in this book. Including contributions from international academics, scholars and professionals within the field, this book provides a global, multidimensional perspective on crowdsourcing.?

The application of linguistic optimization methods in the tourism, travel, and hospitality industry has improved customer service and business strategies within the field. It provides an opportunity for tourists to explore another culture, building tolerance and overall exposure to different ways of life. Innovative Perspectives on Tourism Discourse

Read Online Open Tourism Open Innovation Crowdsourcing And Co Creation Challenging The Tourism Industry Tourism On The Verge

is a pivotal reference source for the latest research findings on the role of language and linguistics in the travel industry. Featuring extensive coverage on relevant areas such as intercultural communication, adventure travel, and tourism marketing, this publication is an ideal resource for linguists, managers, researchers, economists, and professionals interested in emerging developments in tourism and travel.

This book constitutes the refereed proceedings of the 4th International Conference on Online Communities and Social Computing, OCSC 2011, held in Orlando, FL, USA in July 2011 in the framework of the 14th International Conference on Human-Computer Interaction, HCII 2011 with 10 other thematically similar conferences. The 77 revised papers presented were carefully reviewed and selected from numerous submissions. The papers accepted for presentation thoroughly cover the thematic area of online communities and social computing, addressing the following major topics: on-line communities and intelligent agents in education and research; blogs, Wikis and Twitters; social computing in business and the enterprise; social computing in everyday life; information management in social computing.

This book is a practical handbook for entrepreneurship in tourism related industries. The book will provide students and prospective entrepreneurs with the knowledge, know-how and best practices in order to assist them in planning, implementing and managing business ventures in the field of tourism.

Globalization entails the world becoming a smaller place through political, socio-cultural

Read Online Open Tourism Open Innovation Crowdsourcing And Co Creation Challenging The Tourism Industry Tourism On The Verge

and economic processes. These processes have salient implications for tourism, and tourism itself is one of the driving forces behind globalization. This book is a collection of conceptual treatises by international scholars about the dynamics and reach of globalization and its relationships with tourism. It anatomizes and deconstructs the global forces, processes and challenges that face the world of tourism. It is international in scope, encyclopedic in its conceptual depth, empirically evocative, and contemporary in its coverage.

This book brings together multi-disciplinary research and practical evidence about the role and exploitation of big data in driving and supporting innovation in tourism. It also provides a consolidated framework and roadmap summarising the major issues that both researchers and practitioners have to address for effective big data innovation. The book proposes a process-based model to identify and implement big data innovation strategies in tourism. This process framework consists of four major parts: 1) inputs required for big data innovation; 2) processes required to implement big data innovation; 3) outcomes of big data innovation; and 4) contextual factors influencing big data exploitation and advances in big data exploitation for business innovation. Understanding the global hotel business is not possible without paying specific attention to hotel chain management and dynamics. Chains are big business, approximately 80 percent of hotels currently being constructed around the world are chain affiliated and, in 2014, the five largest brands held over a one million rooms. The high economic

Read Online Open Tourism Open Innovation Crowdsourcing And Co Creation Challenging The Tourism Industry Tourism On The Verge

importance of the hotel chains and their global presence justifies the academic research in the field however, despite this, there is no uniform coverage in the current body of literature. This Handbook aids in filling the gap by exploring and critically evaluates the debates, issues and controversies of all aspects of hotel chains from their nature, fundamentals of existence and operation, expansion, strategic and operational aspects of their activities and geographical presence. It brings together leading specialists from range of disciplinary backgrounds and regions to provide state-of-the-art theoretical reflection and empirical research on current issues and future debates. Each of the five inter-related section explores and evaluates issues that are of extreme importance to hotel chain management, focusing on theoretical issues, the expansion of hotel chains, strategic and operational issues, the view point of the individual affiliated hotel and finally the current and future debates in the theory and practice of hotel chain management arising from globalisation, demographic trends, sustainability, and new technology development. It provides an invaluable resource for all those with an interest in hotel management, hospitality, tourism and business encouraging dialogue across disciplinary boundaries and areas of study. This is essential reading for students, researchers and academics of Hospitality as well as those of Tourism, Marketing, Business and Events Management.

This book examines the concepts of open innovation, crowdsourcing and co-creation from a holistic point of view and analyzes them considering their suitability to the

Read Online Open Tourism Open Innovation Crowdsourcing And Co Creation Challenging The Tourism Industry Tourism On The Verge

tourism industry. Methods, theories and models are discussed and examined regarding their practical applicability in tourism. The book illustrates the theoretical mechanisms and principles of Open Innovation, Crowdsourcing and Co-creation with case studies and best practices examples. In addition to the scientific target group, the book is a useful resource for managers of the entire tourism industry. First, the book presents the theoretical fundamentals and concepts in 11 specific chapters. This basis is then enriched by three parts with case studies, focusing on information, creation and provision respectively. Finally in a concluding part the editors sum up the book and give an outlook on the implications, learnings and future perspectives of open innovation, crowdsourcing and collaborative consumption in the tourism industry.

Open Tourism Open Innovation, Crowdsourcing and Co-Creation Challenging the Tourism Industry Springer

This book explores the latest developments in the field of smart tourism, focusing in particular on the important cultural and sustainability synergies that have emerged during the digital era. The aim is to elucidate how ICTs can promote innovation and creativity in the tourism and leisure sector in ways that take into account cultural and social responsibilities, foster sustainable tourism management, and enhance cultural tourism, cultural heritage, and sustainable development. The book is based on the proceedings of the Fifth International

Read Online Open Tourism Open Innovation Crowdsourcing And Co Creation Challenging The Tourism Industry Tourism On The Verge

Conference of the International Association of Cultural and Digital Tourism (IACuDiT), attended by academics and industry practitioners from cultural, heritage, communication, and innovational tourism backgrounds, and is edited in collaboration with IACuDiT. It will have broad appeal to professionals from academia, industry, government, and other organizations who wish to learn about novel perspectives in the fields of tourism, travel, hospitality, culture and heritage, leisure, and sports within the context of a knowledge society and smart economy in which sustainability is becoming ever more important.

Cultural heritage is perceived as the glue that keeps individuals together and makes them feel a part of something larger. It is the past that allows individuals to understand their present and move towards the future. In networked society, it is impossible to think about cultural heritage and its preservation and maintenance without including the digital processes and ICT systems, as well as its impact on territorial innovation. The Handbook of Research on Cultural Heritage and Its Impact on Territory Innovation and Development is a critical and comprehensive reference book that analyzes how preservation and sustainability of cultural heritage occurs in countries, as well as how it contributes to territorial innovation. Moreover, the book examines how technological tools contribute to its preservation and sustainability, as well as its dissemination. Highlighting topics

Read Online Open Tourism Open Innovation Crowdsourcing And Co Creation Challenging The Tourism Industry Tourism On The Verge

that include public policies, spatial development, and architectural heritage, this book is ideal for cultural heritage professionals, government officials, policymakers, academicians, researchers, and students.

In an era of an economy based on knowledge and Web 2.0 technology, knowledge is the foundation for improving the decision-making processes and relations between people both in and outside of an organization. Providing new and unique sources of knowledge outside organizations enables innovation and shapes competitive advantage. Crowdsourcing and Knowledge Management in Contemporary Business Environments is a collection of innovative research on the methods and applications of crowdsourcing in collaboration, idea implementation, and organizational development. Highlighting a range of topics including data analytics, crowd computing, and open innovation, this book is ideally designed for business managers, business professionals, business and social researchers, graduate-level students, and academicians seeking current research on the mechanisms of knowledge management in crowdsourcing. Comprehensive and accessible, this Companion offers a thorough investigation into both traditional and fresh topics in tourist behaviour and experience. Arranged chronologically, the chapters examine tourist experience from the very idea of a tourist visit to the aftermath of returning home.

This book presents the latest research into the application of information and communication technologies within the travel and tourism sectors. Readers will find insightful contributions on a wide range of topics, including digital marketing, social media and online travel reviews, mobile computing, augmented and virtual reality, gamification, recommender systems, electronic distribution, online education and learning, and the sharing economy. Particular attention is devoted to the actual and potential impact of big data, and the development and implementation of digital strategies, including digital marketing and the digital economy. In addition to the description of research advances and innovative concepts, a number of informative case studies are presented. The contents of the book are based on the 2018 ENTER eTourism conference, held in Jönköping, Sweden. The volume will appeal to all academics and practitioners with an interest in the most recent developments in eTourism.

The European Journal of Tourism Research is an academic journal in the field of tourism, published by Varna University of Management, Bulgaria. Its aim is to provide a platform for discussion of theoretical and empirical problems in tourism. Publications from all fields, connected with tourism such as tourism management, tourism marketing, sociology, psychology, tourism geography, political sciences, mathematics, tourism statistics, tourism anthropology, culture, information

Read Online Open Tourism Open Innovation Crowdsourcing And Co Creation Challenging The Tourism Industry Tourism On The Verge

technologies in tourism and others are invited. The journal is open to all researchers. Young researchers and authors from Central and Eastern Europe are encouraged to submit their contributions. Regular Articles in the European Journal of Tourism Research should normally be between 4 000 and 20 000 words. Major research articles of between 10 000 and 20 000 are highly welcome. Longer or shorter papers will also be considered. The journal publishes also Research Notes of 1 500 – 2 000 words. Submitted papers must combine theoretical concepts with practical applications or empirical testing. The European Journal of Tourism Research includes also the following sections: Book Reviews, announcements for Conferences and Seminars, abstracts of successfully defended Doctoral Dissertations in Tourism, case studies of Tourism Best Practices. The European Journal of Tourism Research is published in three Volumes per year. The full text of the European Journal of Tourism Research is available in the following databases: EBSCO Hospitality and Tourism CompleteCABI Leisure, Recreation and TourismProQuest Research Library Individual articles can be rented via journal's page at DeepDyve. The journal is indexed in Scopus and Thomson Reuters' Emerging Sources Citation Index. The editorial team welcomes your submissions to the European Journal of Tourism Research.

Hospitality is an industry characterised by its complex nature and numerous sectors including hotels, hostels, B&Bs, restaurants, pubs, nightclubs and contract catering. However, despite its segmentation, there are key issues that are pertinent to all subsectors. The Routledge Handbook of Hospitality Management adopts a strategic approach and explores and critically evaluates current debates, issues and controversies to enable the reader to learn from the industry's past mistakes as well as future opportunities. Especially relevant at a time when many sectors of the industry have to re - evaluate and reinvent themselves in response to the economic downturn the Handbook brings together specialists from both industry and academia and from a range of geographical regions to provide state-of-the-art theoretical reflection and empirical research. Each of the five inter related sections explores and evaluates issues that are of extreme importance to hospitality organisations, many of which have not been adequately explored before: external and internal customers, debates surrounding finance, uncertainty risk and conflict, sustainability, and e-Hospitality and Technology. This book is an invaluable resource for all those with an interest in hospitality, encouraging dialogue across disciplinary boundaries and areas of study. It is essential reading for students, researchers & academics and managers of Hospitality as well as those of Tourism, Events, Marketing, and

Business Management.

This book presents a selection of papers from the 2017 World Conference on Information Systems and Technologies (WorldCIST'17), held between the 11st and 13th of April 2017 at Porto Santo Island, Madeira, Portugal. WorldCIST is a global forum for researchers and practitioners to present and discuss recent results and innovations, current trends, professional experiences and challenges involved in modern Information Systems and Technologies research, together with technological developments and applications. The main topics covered are: Information and Knowledge Management; Organizational Models and Information Systems; Software and Systems Modeling; Software Systems, Architectures, Applications and Tools; Multimedia Systems and Applications; Computer Networks, Mobility and Pervasive Systems; Intelligent and Decision Support Systems; Big Data Analytics and Applications; Human–Computer Interaction; Ethics, Computers & Security; Health Informatics; Information Technologies in Education; and Information Technologies in Radiocommunications.

Die Gestaltung von Erlebnissen ist seit Jahren eines der zentralen Themen im Tourismus. Die intensive Auseinandersetzung mit unterschiedlichen Konzepten der Erlebnisinszenierung, deren Anwendung in touristischen Bereichen oder der Einsatz von Erlebnismarketing und -vertrieb wirft dabei viele Fragen auf. Kann

Read Online Open Tourism Open Innovation Crowdsourcing And Co Creation Challenging The Tourism Industry Tourism On The Verge

ein Erlebnis überhaupt inszeniert werden? Wie ist es um die Authentizität bestellt? Rechtfertigt der Aufwand den Nutzen? Handelt es sich dabei um eine langfristige Entwicklung oder nur um einen kurzfristigen Hype? Das Fachbuch geht Fragen wie diesen nach. Experten aus unterschiedlichsten Disziplinen der Tourismusforschung vermitteln mit ihren Beiträgen die theoretischen Grundlagen der Erlebnisinszenierung. Projektsteckbriefe und Best-Practice-Beispiele geben einen Einblick in die Arbeit verschiedener Erlebnisplaner und Designexperten. Außerdem bietet das Buch eine ausführliche Methodenbeschreibung inklusive Toolbox zur Gestaltung von Erlebnissen.

Das essential stellt die Grundlagen und Gestaltungsfelder der Kreislaufwirtschaft in kompakter Form dar. Die Autoren erläutern, wie das Schließen der Wertschöpfungskette, beispielsweise durch Rückführung der Stoffströme (Recycling), und das Öffnen der Wertschöpfungskette, beispielsweise durch Integration von Nutzern in die Produktentwicklung (Open Innovation) oder gemeinsame Nutzung von Vorhandenem (Sharing Economy), als zentrale Faktoren der Kreislaufwirtschaft zu deren erfolgreicher Umsetzung beitragen. Dabei wird die besondere Bedeutung der Co-Creation zur Ausgestaltung von Wertschöpfungsprozessen und Geschäftsmodellen hervorgehoben.

Energy has a wide range of uses within a country, includin socially and

Read Online Open Tourism Open Innovation Crowdsourcing And Co Creation Challenging The Tourism Industry Tourism On The Verge

economically. Providing everything from warmth and light to raw materials for industrial production, energy is an essential need for countries. Due to the importance of energy for countries, energy policies are extremely vital, and energy needs to be affordable, eco-friendly, and continuous so countries can provide for their people and continue to develop industrially. Without the availability of energy that is cheap and continuous, the effectiveness in the energy supply process will be reduced, and society will experience difficulties in having its daily energy needs met. The Handbook of Research on Strategic Management for Current Energy Investments analyzes current trends in energy production and use and identifies energy investment strategies in order to support affordable and available energy for all. Chapters within the book cover technological developments that contribute to the reduction of price in energy production as well as renewable energy sources that provide continuity in energy production but do not emit carbon into the atmosphere. This book highlights topics that cover environmental pollution, energy pricing, economic growth, carbon dioxide emission, and energy management. It is ideal for engineers, technicians, managers, researchers, academicians, policymakers, government officials, and students in related fields.

This book consists of chapters based on selected papers presented at the

Read Online Open Tourism Open Innovation Crowdsourcing And Co Creation Challenging The Tourism Industry Tourism On The Verge

EcoDesign2015 symposium (9th International Symposium on Environmentally Conscious Design and Inverse Manufacturing). The symposium, taking place in Tokyo in December 2015, has been leading the research and practices of eco-design of products and product-related services since it was first held in 1999. The proceedings of EcoDesign2011 were also published by Springer. Eco-design of products and product-related services (or product life cycle design) are indispensable to realize the circular economy and to increase resource efficiencies of our society. This book covers the state of the art of the research and the practices in eco-design, which are necessary in both developed and developing countries. The chapters of the book, all of which were peer-reviewed, have been contributed by authors from around the world, especially from East Asia, Europe, and Southeast Asia. The features of the book include (1) coverage of the latest topics in the field, e.g., global eco-design management, data usage in eco-design, and social perspectives in eco-design; (2) an increased number of authors from Southeast Asian countries, with a greater emphasis on eco-design in emerging economies; (3) high-quality manuscripts, with the number of chapters less than half of that of the previous book.

This book brings together cutting edge research and applications of social media and related technologies, their uses by consumers and businesses in travel,

Read Online Open Tourism Open Innovation Crowdsourcing And Co Creation Challenging The Tourism Industry Tourism On The Verge

tourism and hospitality. The first section addresses topical issues related to how social media influence the operations and strategies of tourism firms and help them enhance tourism experiences: open innovation, crowdsourcing, service-dominant logic, value co-creation, value co-destruction and augmented reality. The second section of the book looks at new applications of social media for marketing purposes in a variety of tourism-related sectors, addressing crowd-sourced campaigns, customer engagement and influencer marketing. The third section uses case studies and new methodologies to analyze travel review posting and consumption behaviors as well as the impact of social media on traveller perceptions and attitudes, with a focus on collaborative consumption and sharing economy accommodation. Finally, the fourth section focuses on hot topics and issues related to the analysis, interpretation and use of online information and user-generated content for deriving business intelligence and enhancing business decision-making. Written by an international body of well-known researchers, this book uses fresh theoretical lenses, perspectives and methodological approaches to look at the practical implications of social media for tourism suppliers, destinations, tourism policy makers and researchers alike. For these reasons, it will be a valuable resource for students, managers and academics with an interest in information and communication technologies,

Read Online Open Tourism Open Innovation Crowdsourcing And Co Creation Challenging The Tourism Industry Tourism On The Verge

marketing for tourism and hospitality, and travel and transportation management. Filling a gap in the market, this new title approaches the field through a uniquely international angle, with increased emphasis on the impact of digital technology and supported by international case-studies.

The two-volume set LNCS 10271 and 10272 constitutes the refereed proceedings of the 19th International Conference on Human-Computer Interaction, HCII 2017, held in Vancouver, BC, Canada, in July 2017. The total of 1228 papers presented at the 15 colocated HCII 2017 conferences was carefully reviewed and selected from 4340 submissions. The papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. They cover the entire field of Human-Computer Interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The papers included in this volume cover the following topics: games in HCI; mobile and wearable interaction; HCI, children and learning; and HCI in complex human environments.

With the growth of information technology, many new communication channels and platforms have emerged. This growth has advanced the work of crowdsourcing, allowing individuals and companies in various industries to coordinate efforts on different levels and in different areas. Providing new and unique sources of knowledge

Technologien für Menschen und Organisationen? In dieser Einführung nimmt der Autor sowohl grundlegende Entwicklungen wie die Entgrenzung und Rationalisierung der Arbeit als auch hochaktuelle Phänomene wie die Sharing Economy, Crowdwork oder Data Economy in den Blick.

This book presents cutting edge research on the development of analytics in travel and tourism. It introduces new conceptual frameworks and measurement tools, as well as applications and case studies for destination marketing and management. It is divided into five parts: Part one on travel demand analytics focuses on conceptualizing and implementing travel demand modeling using big data. It illustrates new ways to identify, generate and utilize large quantities of data in tourism demand forecasting and modeling. Part two focuses on analytics in travel and everyday life, presenting recent developments in wearable computers and physiological measurement devices, and the implications for our understanding of on-the-go travelers and tourism design. Part three embraces tourism geoanalytics, correlating social media and geo-based data with tourism statistics. Part four discusses web-based and social media analytics and presents the latest developments in utilizing user-generated content on the Internet to understand a number of managerial problems. The final part is a collection of case studies using web-based and social media analytics, with examples from the Sochi Olympics on Twitter, leveraging online reviews in the hotel industry, and evaluating destination communications and market intelligence with online hotel reviews. The
