

## Operation And Maintenance Manual For Roads

The purpose of this document is to provide information for the operation and maintenance of the Standard Hydrogen Monitoring System-D (SHMS-D) used in the 200E and 200W area tank farms on the Hanford Site. This provides information specific to the mechanical operation of the system and is not intended to take the place of a Plant Operating Procedure. However, it does provide more information on the system than a Plant Operating Procedure. The intent here is that the system is started up by a technician or engineer who has completed tank farms training course No. 351405, and then the only actions performed by Operations will be routine log taking. If any problems not addressed by the operating procedure are encountered with the unit, engineering should be contacted.

Operation and Maintenance Manual for Plessey MO 21 Recording Current Meter  
Operation and Maintenance Manual for Test Dummy SA103C  
Operation and Maintenance Manual for Model 4100  
Operation and Maintenance Manual for DWX-DWXL- Series Six Cylinder Engines  
Operation & Maintenance Manual 953B Track-Type Loader : 5MK1-Up  
Guidelines for Preparation of Operation and Maintenance Manual for Waste Water Treatment Plants  
HY-TEL Operation and Maintenance Manual  
Operation and Maintenance Manual for Electrostatic Precipitators  
Manual  
Operation and Maintenance Manual for the LDUA Operations Control Trailer (LDUA System 4100).

The OAS is a camera and laser system that will be used as an end effector on the LDUA to properly align the arm with the entry riser. It is attached to the LDUA by means of a Tool Interface Plat (TIP) which provides a feed through for all electrical and pneumatic utilities needed by the end effector to operate.

The Light Duty Utility Arm (LDUA) Operations Control Trailer(OCT) has completed testing and is ready for operation. This document defines the requirements applicable to the operation and maintenance of the OCT.

This manual has been prepared to serve as a guide for the operation and maintenance of Jester Park Campground Improvements located in Polk County, Iowa. Operations and maintenance instructions for the major features of the project are presented. The intent of the operating instructions is to provide information which allows orderly and efficient use of the constructed features. The intent of the maintenance instructions is to present preventative maintenance information consisting of systematic inspections and subsequent corrective actions which should ensure long-term utilization of equipment and features. Included are sections on historical summary, project features, operation and maintenance, and performance monitoring and assessment.

This manual provides descriptive, operating, and maintenance data for a computer data display system. The manual is intended for use primarily by technical personnel concerned with the operation and maintenance of the CDDS. (Author).

This manual is designed to help the user to achieve the best performance and longest life from the pumps.

This document defines the requirements for the operation, maintenance, and storage of the Common Video End Effector System (CVVE) used with the video end effectors as part of the Light Duty Utility Arm (LDUA) system.
