Organizational behaviour affects all of us, every single day. But do your students struggle to see the subject's relevance? Do they have difficulty going beyond its most commonplace theories? Do they wonder how it will help them in their future career? Then take a step into the lobby of Junction Hotel! We follow the experiences of its managers and employees as a new consortium tries to rebuild the success of a once-great establishment that has fallen on hard times. This fictional running case study helps students see how theory translates into practice in a familiar setting. For example, what kind of leadership styles do the new management team use? Are personality tests any use for hiring new staff for the gym? How do the staff on the receiving end of various management techniques feel and react? Follow the management dilemmas faced, and the techniques employed with varying rates of success, by a wide range of characters. The running case is interwoven throughout the book, encouraging students to make links between the different topic areas and gain a holistic view of organizational behaviour. The book covers all the core topics found on undergraduate modules, while also going a step further to consider alternative approaches and compare them with mainstream theories. Students are encouraged to develop a critical mindset and think about the context of the theories they come across and the values embedded within them. A wealth of real-life case studies, including those drawn from the public and not-for-profit sectors, bring the subject to life. If you understand organisations then you are more powerful, in that you are then able to further your own interests and/or those of the organisation. It then makes sense that all engineers as part of their undergraduate degrees, or their subsequent professional development, have to study organisational behaviour as part of their management training. This is a major requirement of Engineering Council UK (ECUK) for those wishing to become chartered engineers. This book aims to support courses that go towards meeting the ECUK requirements for management and business training, with coverage of team and group working, and further discussion of international cultural difference, which are major features of engineering degrees today. Chapters also cover key issues for maintaining a healthy working environment within an organisation, such as motivating employees, managing stress and dealing with organisational politics, as well as subjects to provide a greater understanding of company management including leadership and organizational structures. An Introduction to Organisational Behaviour for Managers and Engineers provides not only a practical introduction to OB for management students, but also a text that is specifically aimed at the needs of engineers and students of

Organisational Behaviour: Engaging People and Organisations uses an integrative model to teach a robust approach to OB by encompassing five levels of analysis: environment, individual, groups, leadership and organisation, and demonstrating how each relates to one another. It teaches a contemporary approach to Organisational Behaviour that aims to understand, rather than control, human behaviour in organisations. Unique to this local edition is the inclusion of a 'critical perspective' of Organisational Behaviour introduced through in-chapter features and the end-of-chapter case study. This complements courses that teach mainstream theory and advance through to critical examination of the subject area. This approach presents a side of management that reflects real-world experiences in the workplace by challenging the managerial perspective and discussing issues for employees.
