

Oxford Dictionary 4th Edition

J.K. Rowling has drawn deeply from classical sources to inform and color her Harry Potter novels, with allusions ranging from the obvious to the obscure. "Fluffy," the vicious three-headed dog in Harry Potter and the Sorcerer's Stone, is clearly a repackaging of Cerberus, the hellhound of Greek and Roman mythology. But the significance of Rowling's quotation from Aeschylus at the front of Harry Potter and the Deathly Hallows is a matter of speculation. Her use of classical material is often presented with irony and humor. This extensive analysis of the Harry Potter series examines Rowling's wide range of allusion to classical characters and themes and her varied use of classical languages. Chapters discuss Harry and Narcissus, Dumbledore's many classical predecessors, Lord Voldemort's likeness to mythical figures, and magic in Harry Potter and classical antiquity--among many topics.

The Bloomsbury Companion to Lexicography offers the definitive guide to a key area of linguistic study. Each companion is a comprehensive reference resource featuring an overview of key topics, research areas, new directions and a manageable guide to beginning or developing research in the field. Lexicography, as the practice of compiling dictionaries, has a long tradition that has been, for much of the time, largely independent of linguistics. The direct influence of linguistics on lexicography goes back around 50 years, though longer in the case of learners' dictionaries. The present volume aims to reflect on the research that has been and is being done in lexicography and to point the way forward. It tackles, among other topics, the critique of dictionaries in the electronic medium, the future of historical lexicography in the electronic mode with special reference to the online Oxford English Dictionary, and e-lexicography in general.

Quotations are an essential part of the fabric of the language. In *And I quote*, Elizabeth Knowles draws on her experience editing the Oxford Dictionary of Quotations and employs a wide repertoire of examples, ranging from the classical canon to contemporary popular culture, to illuminate just how and why we quote. Her investigation focuses on how we find, choose, and use quotations in 21st century English, but it also leads her back in time to follow the journeys taken by individual quotes, as their meaning changes subtly - and sometimes not so subtly - over the decades and in many cases the centuries. In following the often-surprising stories of individual quotations, we gain an understanding of how they establish themselves, and to what degree they can develop a life independent of their original coinage. Everyone has their own quotations 'vocabulary', and each reader of the book will think of further items that they would use and wish to explore, but the journeys mapped here illuminate the many fascinating ways in which quotations have embedded themselves in the language, from the earliest dictionaries of quotations to the online world we experience today.

The Dictionary of Modern Written Arabic by Hans Wehr is widely regarded as the foremost Arabic-English bilingual or translation dictionary and has particular usefulness for students of Modern Standard Arabic. The morphology and syntax of written Arabic is essentially the same in all Arabic countries. Unlike many other Arabic-English dictionaries, it arranges each Arabic word according to its consonantal root. Foreign words are listed in straight alphabetical order by first letter (in the Arabic script). Arabicized loanwords, if they can clearly fit under some root, are entered both ways, often with the root entry giving reference to the alphabetical listing. Volume 2 of 2: Arabic-English Dictionary The Hans Wehr Dictionary of Modern Written Arabic. Fourth Edition.
