The Oxford Handbook of Applied Linguistics contains forty original chapters on a broad range of topics in applied linguistics by a diverse group of contributors. Its goal is to provide a comprehensive survey of the current state of the field, the many connections among its various sub-disciplines, and the likely directions of its future development. The Oxford Handbook of Applied Linguistics addresses a broad audience: applied linguists; educators and other scholars working in language acquisition, language learning, language planning, teaching, and testing; and linguists concerned with applications of their work. Early applied linguistics was predominantly associated with language-teaching. While this relationship continues, the field has long since diversified, becoming increasingly inter-related and multi-disciplinary. The volume addresses the diversity of questions facing applied linguists today: What is the place of applied linguistics in the architecture of the university? Where does applied linguistics fit into the sociology of knowledge? What are the questions that applied linguistics ought to be addressing? What are the dominant paradigms guiding research in the field? What kinds of problems can be solved through the mediation of applied linguistics? What aspects of linguistics can be empirically applied to language-based problems, and what spaces resist such application? What will new students of applied linguistics need to know in the coming years? Systematically encompassing the major areas of applied linguistics-and drawing from a wide range of disciplines such as education, language policy, bi- and multi-lingualism, literacy, language and gender, psycholinguistics/cognition, language and computers, discourse analysis, language and concordances, ecology of language, pragmatics, translation, psycholinguistics and cognition, and many other fields-the editors and contributors to The Oxford Handbook of Applied Linguistics provide a panoramic and comprehensive look at this complex and vigorous field. This second edition includes three new chapters, and the remaining chapters have been thoroughly revised and updated to give a clear picture of the current state of applied linguistics.

Scientific English is possibly the most rewarding area of EFL teaching. It differs from English for Academic Purposes (EAP) as it is directed to a much smaller audience: PhD and postdoc students. Courses on Scientific English are held in universities throughout the world, yet there is very little support for teachers in understanding what to teach and how to teach it. This guide is part of the English for Academic Research series. Part 1 of the book sheds light on the world of academia, the writing of research papers, and the role of journal editors and reviewers. Part 2 gives practical suggestions on how to help your students improve their presentation skills. In Part 3 you will learn how to teach academic skills using non-academic examples. Parts 1-3 are thus useful for anyone involved in teaching academic English, whether they have used the other books in the series or not. Part 4 suggests two syllabuses for teaching writing and presenting skills, based on the two core books: English for Writing Research Papers English for Presentations at International Conferences This book will help you i) understand the world of your students (i.e. academic research), ii) plan courses, and iii) exploit the What's the Buzz? sections in the books on Writing, Presentations, Correspondence and Interacting on Campus. Adrian Wallwork has written over 30 books covering General English (Cambridge University Press, Scholastic), Business English (Oxford University Press), and Scientific English (Springer). He has trained several thousand PhD students from all over the world to write and present their research. Adrian also runs a scientific editing service: English for Academics (E4AC).

This volume offers research-based studies on English for Specific Purposes in higher education from across the world. By drawing on international studies, the book brings together diverse ESP practices and aspects of relevant issues in the development of ESP programs, teachers and learners in a coherent fashion. There is a growing need for undergraduate students to develop their proficiency of ESP skills and knowledge in the increasingly globalized world. Knowledge of ESP is an important factor in subject matter learning by students, and also closely related to the performance of university graduates in the relevant sectors. Careful planning and efficient implementation are essential to ensure the quality of the language learning process. For a variety of reasons, it proves difficult to maintain ESP instruction in higher education. These reasons include the incompetence of teachers, lack of materials for that specific context, as well as lack of opportunities for ESP teachers to develop their skills. The chapters in this book, taken from a wide variety of countries, shed light on the diversity of current practices and issues surrounding ESP.

The analysis of academic genres and the use of corpus resources, methods and analytical tools are now central to a great deal of research into English for Academic Purposes (EAP). Both genre analysis and corpus investigations have revealed the patterning of academic texts, at the levels of lexicogrammar and discourse, and have led to richer understandings of the variations in such patterning between genres and between disciplines. The thirteen contributions included in this volume address issues in academic discourse studies from a range of perspectives: namely, corpus-based research into EAP at the lexicogrammatical and genre levels (Section 1); intercultural EAP research (Section 2); English as a Lingua Franca in academic communication (Section 3); and the relationships between corpus, genre and pedagogy in EAP, with an emphasis on implications and applications (Section 4). The collection is aimed primarily at teachers, students and researchers of EAP and applied corpus linguistics, but will also interest applied linguists in general. The emphasis of the contributions varies from studies with predominantly linguistic orientations to those focussing on practical applications.
