This book explores and illustrates the individuating characteristics - and the interrelationships - of love, poetry, and literary immortality (such immortality, that is, as writers may win, in the sense of being long remembered and appreciated by future readers). From the book's numerous quotations of glittering literary passages, it is evident that love is often expressed in poetry, and that many authors (especially those writing about love) have expressed the winsome hope that their works would be greatly cherished by later generations. Part One of the book illustrates by passages of matchless poetry the joys and perils of love and other outstanding features of love. Part Two outlines the history of expressions by writers in many cultures of their confidence or hope that their works will make them immortal.

shared British and Irish history, comparing the significance of events and outcomes across the Three Kingdoms. In doing so, the Handbook offers a broader context for the history of the Scottish Covenanters, the Irish Rising of 1641, and the government of Confederate Ireland, as well as the British and Irish perspective on the English civil wars, the English revolution, the Regicide, and Cromwellian period. The Oxford Handbook of the English Revolution explores the significance of these events on a much broader front than conventional studies. The events are approached not simply as political, economic, and social crises, but as challenges to the predominant forms of religious and political thought, social relations, and standard forms of cultural expression. The contributors provide up-to-date analysis of the political happenings, considering the structures of social and political life that shaped and were re-shaped by the crisis. The Handbook goes on to explore the long-term legacies of the crisis in the Three Kingdoms and their impact in a wider European context.

authoritative resources. Juhani Rudanko examines some of the most central prepositions in English; to, in, at, on/upon, and with, in constructions using an -ing clause. He depicts the common constructions used with the prepositions, focusing on matrix adjectives, matrix verbs, and in the case of to, the issue of alternation related to the infinitival pattern. He also provides a systematization of matrix verbs governing the pattern of eighteenth century English in each case. Then Rudanko focuses on the later development of the verbs identified by comparing the eighteenth century usage with present-day English. He draws on many sources for guidance on usage in each period along with the Oxford English Dictionary and H. Poutsma's unpublished dictionary which were sources throughout. For present-day English, he uses the intuitions of native speakers, along with the British National Corpus, and the COBUILD Direct Corpus. His source for nineteenth century examples is the Corpus of Nineteenth Century English. For the eighteenth century, he used the Chadwyck-Healy Corpus and the Century of Prose Corpus.
