The Thematic Catalogue of the Musical Works of Johana Pachelbel provides scholars and performers with a survey of the breadth and variety of the repertoire of the composer described by Christoph Wolff as "one of the most seminal and influential musicians of the pre-Bach generation in Germany." Pachelbel composed the majority of his 527 works for keyboard instruments, as well as choral, vocal, and chamber music, and this Thematic Catalogue presents incipits for those that can be identified. The list of works is intended to determine the totality of the corpus and knowledge about it, establish the best means of identifying each work, and settle problems of identity among similarly titled works. An essay on authorities examines the controversies over the authenticity of Pachelbel's manuscripts. Meticulously compiled with copious notes and comments, this unique volume will be invaluable to those already familiar with Pachelbel's compositions and will create new interest among those who were aware only of the universally loved canon movement of his Canon and Gigue in D.

In October 1918, Jan Burgers, 23 years old, started as professor of 'aerodynamics, hydrodynamics, and their applications' at the Technical University in Delft. This can be regarded as the birth of fluid mechanics in the Netherlands, not only as an academic discipline but also as the start of the serious study of flow phenomena in engineering environments. During the period of Burgers' tenure in Delft (till 1955) three Dutch institutes were founded which to this day remain important centres of research in various fields of fluid mechanics: aerospace engineering, hydraulics, and naval engineering. Burgers and others developed mathematical, experimental, and numerical approaches of a broad range of fluid flows; some of their achievements have become well-known worldwide and can be seen as highlights of Dutch fluid mechanics. From the 1950s 'stromingsleer' (flow theory) attained a permanent and respected place in the curriculum and research of (technical) universities, at many old and new research institutes and also at several industrial research laboratories. In the 1980s fluid mechanics finally became 'recognized' as a serious branch of physics and an important field of (applied) science. This resulted in a close cooperation between academic groups, institutes and industry and the foundation of the Burgerscentrum, the Research School for Fluid Mechanics in the Netherlands. One hundred years after Burgers' appointment in Delft, Dutch fluid mechanics is still very much alive. This volume gives a full account of its rich history and also offers a view on the broad range of areas of application: transport, energy production, biology and medicine, production processes, etc. It has been written not only for those working in this field but also for those interested in the history of Dutch science and in the development of science and the fascinating world of fluid flow phenomena.

Every day newspapers in the Western world carry articles about illegal immigrants, asylum seekers and other migrants. The focus of these articles varies greatly from migrants as a threat to one or another important social or societal interest, to migrants as an important asset to those same interests. The tone is most often emotional - whichever way the focus goes. The overall impact is to confuse: is migration good or bad? In this book Guild and van Selm seek to investigate these value assessments regarding migrants in Europe, the USA, Canada and Australia. While looking at issues such as security, human rights, legal systems, identity, racism, welfare, health and labour, the authors also respond to critics of immigration.

Overall, our objective for this volume is to stimulate additional conceptualizations and research in the very broad area of international management. Hopefully, the insightful chapters presented here will show not only the challenges involved in understanding such a complex domain, but additionally show that substantial progress is being made to untangle the various complexities. As in the past, there are a number of individuals we wish to thank. First, we thank Susan Stearns for her tremendous help in making sure that all of the pieces fit together so well as we organized this volume.

This definitive text will bring a new level of professionalism to courses in International Management. Truly global in focus, it is a comprehensive primer on the challenges and prospects of international management, with a particular emphasis on developing global managers who are skilled in economics, strategy, and general management. In addition, the authors help readers develop an in-depth understanding of the role of cultural differences in managerial effectiveness. The text is divided into three parts: the emerging global economy; culture, organization, and strategy; and managing global operations. Management topics include: organizing for international business, global business strategy, building strategic alliances, international negotiations, global staffing, managing a competitive workforce, TQM and employee involvement, and managing multicultural teams. Throughout the text, the authors integrate current conceptual materials on global management with in-depth country analyses and real-world business examples. Each chapter begins with an opening case vignette (from countries around the world) and concludes with a list of key terms and in-depth exercises (Global Manager's Workbook). The text also provides country ratings for 50 countries on economic activity, political risk, and cultural differences, as well as a 35 item instrument for students to measure their own cultural awareness

Literary History: Towards a Global Perspective is a research project funded by the Swedish Research Council (Vetenskapsrådet). Initiated in 1996 and launched in 1999, it aims at finding suitable methods and approaches for studying and analysing literature globally, emphasizing the comparative and intercultural aspect. Even though we nowadays have fast and easy access to any kind of information on literature and literary history, we encounter, more than ever, the difficulty of finding a credible overall perspective on world literary history. Until today, literary cultures and traditions have usually been studied separately, each field using its own principles and methods. Even the conceptual basis itself varies from section to section and the genre concepts employed are not mutually compatible. As a consequence, it is very difficult, if not impossible, for the interested layperson as well as for the professional student, to gain a clear and fair perspective both on the literary traditions of other peoples and on one's own traditions. The project can be considered as a contribution to gradually removing this problem and helping to gain a better understanding of literature and literary history by means of a concerted empirical research and deeper conceptual reflection. The contributions to the four volumes are written in English by specialists from a large number of disciplines, primarily from the fields of comparative literature, Oriental studies and African studies in Sweden. All of the literary texts discussed in the articles are in the original language. Each one of the four volumes is devoted to a special research topic.

Abstract: Rationalization and stabilization following the Asian financial crisis of the late 1990s combined with the expansion and liberalization of regional and global trade to create significant parts industries in China, Indonesia, and the Republic of Korea. Conventional policies of stabilization and liberalization, however, cannot fully explain growth patterns. Japan and Korea grew into major players before liberalizing trade and investment, while even after extensive liberalization Indonesia has yet to move from extensive to intensive growth. These anomalies suggest that to explain success in the auto parts industry we need to move beyond liberalization to look at policies and institutions promoting economies of scale, skill formation, quality upgrading, supplier-linkage cooperation, and innovation. In Japan, the regional and global leader, innovative assemblers led industrial development and supported key suppliers, but the government also supported diffusion of quality control techniques and new technology to small and medium enterprises, and encouraged stable employment among core employees. Korea remains weaker on both small and medium enterprise and employment fronts, but government-encouraged consolidation around a small number of business groups, an extended period of protection, and support for export promotion led to economies of scale. Liberalization of foreign investment after the financial crisis helped ameliorate the excessive statism of earlier policies and strengthened the parts industry. In China, liberalization for WTO entry, rapid expansion in demand, and strong support by local governments encouraged a wave of foreign investment in both assembly and parts. In contrast, institutional weaknesses continue to constrain development opportunities in Indonesia.

' Amid the current, protracted recession in Japan, new corporations — termed global excellent companies by the authors of this book — have been rising since the end of the 20th century. They are not yet in the spotlight but have a huge market share worldwide with regard to their specialized products and services. These corporations have climbed to the top of the global market while many other large Japanese companies have fallen into a slump. The authors highlighted their corporate policies and strategies for achieving high earnings — the secret of “producing something from nothing” and “enabling the lesser to win against the greater”. They have long focused on specific niches, improved the speed of their business undertaking, and effectively used information technology. The authors set out to study these companies and analyze their practices so as to gain insight into the way companies should be managed in the 21st century. Twenty-one authors from a variety of backgrounds analyse the global competitiveness of the Asian firm in different parts of the world and at different phases of their internationalisation process. They find that the Asian firms' emphasis on 'soft' skills such as networking, organisational learning and sharing stands in sharp contrast to the economic rationality of Western firms, which stress individual performance measurement, clearly defined responsibilities and accountability. Asian firms face serious problems in adjusting their systems to the Western environment without losing their competitiveness.

This collection of critical essays investigates the intersections of the global and local in literature and language. Exploring the connections that exist between global forms of knowledge and their local, regional applications, this volume explores multiple ways in which literature is influenced, and in turn, influences, movements and events across the world and how these are articulated in various genres of world literature, including the resultant challenges to translation. This book also explores the way in which languages, especially English, transform and continue to be reinvented in its use across the world. Using perspectives from sociolinguistics, discourse analysis and semiotics, this volume focuses on diasporic literature, travel literature, and literature in translation from different parts of the world to study the ways in which languages change and grow as they are sought to be 'owned' by the communities which use them in different contexts. Emphasizing on interdisciplinary studies and methodologies, this collection centralizes both research that theorizes the links between the local and the global and that which shows, through practical evidence, how the local and global interact in new and challenging ways.

In recent years, historians across the world have become increasingly interested in transnational and global approaches to the past. However, the debates surrounding this new border-crossing movement

have remained limited in scope as theoretical exchanges on the tasks, responsibilities and potentials of global history have been largely confined to national or regional academic communities. In this groundbreaking book, Dominic Sachsenmaier sets out to redress this imbalance by offering a series of new perspectives on the global and local flows, sociologies of knowledge and hierarchies that are an intrinsic part of historical practice. Taking the United States, Germany and China as his main case studies, he reflects upon the character of different approaches to global history as well as their social, political and cultural contexts. He argues that this new global trend in historiography needs to be supported by a corresponding increase in transnational dialogue, cooperation and exchange.

Although many firms label themselves 'global', very few can back this up with truly global sales and operations. In *The Regional Multinationals* Alan Rugman examines first-hand data from multinationals and finds that most multinationals are strongly regional, with international operations in their home regions of North America, the US or Asia. Only a tiny proportion of the world's top 500 companies actually sell the same product and deliver the same services around the world. Rugman exposes the facts behind the popular myths of doing business globally, explores a variety of regional models and offers an authoritative agenda for future business strategy. *The Regional Multinationals* is the essential resource for all academics and students in International Business, Organization and Strategic Management, as well as those with an interest in finding out how multinationals really work in practice and how future strategy must respond.

The volatility of climate change is increasing. It is bad news, and many climatologists, policy analysts and environmental groups regard the West as the largest contributor to the problems caused by climate change. This book raises questions concerning the systemic and cultural reasons for Western countries' unwillingness to bear full responsibility for their carbon emissions. Is the Western paradigm failing? Can other cultures offer solutions? Are there alternatives for designing a better future? Just as the roots of the problem of climate change are cultural, the solution must be too. The contributors to *Global Ethics on Climate Change* explore cultural alternatives. This differs from conventional climate ethics, which tends to address the crisis with utilitarian, legalistic, and analytic tools. The authors in this volume doubt whether such paradigm patches will work. It may be time to think outside the box and consider non-Western insights about the good life, indigenous wisdom on being-in-the-world, and new ideas for civil evolution. This book is an examination of candidates for a Plan B. This book was published as a special issue of the *Journal of Global Ethics*.

A nation's economic success depends on the capacity of its companies and trading organizations to develop business relationships, trade and do business in the international arena. Doing business across borders subtly changes the processes and skills the successful manager needs. Cultural, social, geographic and legal factors serve to complicate the picture. The mantra for managers today is think global, act local. In this handbook the authors concentrate on the big developments that currently are happening at an international level. They consider how managers operating in the global business landscape must change what they do to create advantages and remain competitive. *The Global Business Handbook* is based on the structure of the very successful IÉSEG International School of Management's programme on international management. It includes a global focus, backed by the latest research on different aspects of international business carried out in different parts of the world.

Argues that leaders of international corporations need to understand themselves, their employees, their business, and the cultures in which they are working, and offers profiles of countries and cultures *Global and Culturally Diverse Leaders and Leadership* explores diverse cultural leadership styles and paradigms that are dynamic, complex, globally authentic and culturally competent for the 21st century. An outstanding group of scholars considers how the different worldviews and lived experiences of leaders influence their leadership styles. Redefining leadership as global and diverse, this book imparts a new understanding of the criteria for selecting, training and evaluating leaders in the 21st century.
