HOPEFUL MONSTERS Roger McKnight's debut collection depicts individuals

hampered by hardship, self-doubt, and societal indifference, who thanks to circumstance or chance, find glimmers of hope in life's more inauspicious moments. *Hopeful Monsters* is a fictional reflection on Minnesota's people that explores the state's transformation from a homogeneous northern European ethnic enclave to a multi-national American state. Love, loss, and longing cross the globe from Somalia and Sweden to Maine and Minnesota as everyday folk struggle for self-realization. Idyllic lake sides and scorching city streets provide authentic backdrops for a collection that shines a flickering light on vital global social issues. Read and expect howling winds, both literal and figurative, directed your way by a writer of immense talent. **ROGER MCKNIGHT** Roger McKnight hails from Little Egypt, a traditional farming and coal-mining region in downstate Illinois. He studied and taught English in Chicago, Sweden, and Puerto Rico. Roger relocated to Minnesota and taught Swedish and Scandinavian Studies. He now lives in the North Star State. "There's an interesting fusion within the stories. Larger, universal and global issues such as poverty, race and injustice are picked apart, but from a Minnesotan point of view. Wherever you are in the world, this pedestal will provide a fresh take on opinion and assumption, and definitely leave readers understanding themselves and the world that little bit better. Ultimately we learn that all humans, wherever they live and whatever their circumstance, exist according to a series of common threads. It's a sobering read and is ideal for large group discussion settings such as book clubs and universities. There really

is something here for everyone.” – PR for Books –
“What I adored most about Hopeful Monsters was the fact that Roger highlighted the plight of several vulnerable groups within his stories. He wasn’t afraid to discuss sensitive topics such as suicide, homelessness, addiction, and mental health, creating an array of intriguing characters and scenarios to give a voice to the forgotten in our society.” – Dan Stubbings – The Dimensions Between Worlds

interdisciplinary inquiry and practice informed by a range of responses to actor network theory. It brings together a rich body of current work by researchers in the social sciences, technology, material culture, cultural geography, information technology, and systems design, and design theory and history. This collection will be invaluable to students and researchers in many areas of design studies and to design practitioners receptive to new and challenging notions of what constitutes the design process. Over ninety essays are thematically organised to address five aspects of the expanded notions of mediation, agency, and collaboration posited by network theory: Ideas, Things, Technology, Texts, and People. The collection also includes an important new essay on rethinking the concept of design by Bruno Latour, one of the most influential figures in the philosophy and sociology of science and technology and a pioneer of actor network theory, and essays deriving from forum discussions involving designers and designer-makers responsive to actor network theory. Rather than an anthology of previously-published essays, *Networks of Design* presents work in progress on design theory and its applications. It is the outcome of a live and vigorous debate on the possibilities and actualities offered by actor network led conceptualisations of the relationships and processes constituting design. All the essays, many

collaborative, derive from papers presented at the international conference of the Design History Society held at University College Falmouth, UK in the Autumn of 2008.
