An essential guide for every kind of artist that teaches them how to skip the gallery system, find their niche, and connect directly with collectors to profitably sell their art. For years, galleries have acted as gatekeeper separating artists and collectors. But with the explosion of the Internet, a new generation of savvy, independent artists is connecting with buyers and making a substantial living doing what they love. How to Sell Your Art Online shows any artist how to make a successful living from their work. Cory Huff dispels the myth of the starving artist and provides the effective business strategies necessary to make artistic creations pay. He helps individual artists find their niche; outlines the elements essential for an effective website; and provides invaluable advice on e-mail marketing, blogging, social media marketing, and paid advertising—explaining how to tie all these online activities into offline success. Most importantly, he shares the secret to overcoming the biggest challenge artists face when self-marketing: learning how to tell their unique stories. Every artist has a reason for making art, but can't always find the right way to express it. Huff provides exercises artists can use to clarify the intellectual and emotional process behind their art, and teaches them how turn that knowledge into stories they can tell online and in person—and expand their reach through blogs and social media to build their art business. Drawing from the stories of successful artists, thoroughly describing how art is sold today, and providing tips on how to build connections personally and electronically, How to Sell Your Art Online illustrates the countless ways artists can take control of their creative careers—and sell their work without selling out.

"Learn how easy and inspiring collage can be. [Y]ou can fashion great keepsakes like picture frames, montages, candles, and jewelry that loved ones will treasure."-back cover.

Explore mindful crafts as an effective and efficient therapy. Arts and crafts were one of the very first therapies employed by occupational therapists. Today, crafts are still employed as effective interventions for clients with mental health disorders, physical dysfunctions, cognitive issues, and sensory concerns in hospitals, outpatient clinics, veterans' centers, schools, skilled nursing facilities, or community settings. Step by step, the authors show you how to use a wide-range of novel, and highly engaging crafts. They explain how to connect the key tasks associated with an activity to functional outcomes, and how to modify them to meet the specific needs of individual patients. They also address the issues of documentation, and reimbursement.

This book brings together experts in the fields of art history, visual arts, music, cultural geography, curatorial practice and landscape architecture to explore the role of material memory in the post-industrial landscape and the ways in which that landscape can act as a site for many forms of creative practice. It examines the role of material memory in the siting of public artworks and politically inspired installation art within the socio-economic post-industrial landscape. The post-industrial ruin as a place for innovation in the curatorial process is also investigated, as are social memory and the complexities of inscribing memory into places. A number of chapters focus on photography and its important role in recording memory as transformation, abandonment and erosion. Artists and musicians present personal case studies examining the siting of permanent and temporary artworks which can invoke memory of both culture and place. The land itself and its associated histories of post-industry are explored in artistic terms investigating dislocation, wasted spaces and extinction. Landscape architects and cultural geographers explore the aesthetic of the urban ruin, its natural and human ecologies and the re-wilding of urban spaces. The volume provokes discussion by a group of diverse experts on a very contemporary subject.

This informative book brings together theory, research and practice examples of creativity in primary schools, providing a scholarly yet accessible introduction. The book offers an overview for teachers looking for a concise guide to current thinking about creativity, particularly if your school is thinking of introducing or extending its practice. The book considers recent developments in the creative curriculum, and techniques embedded in approaches such as Philosophy for Children, Mantle of the Expert and Enterprise Education. Ideas for personalising teaching and creating independent and motivated learners are incorporated. Other key features of the book include:Examination of the major theories of creativity How to develop your own creativity as a teacherFocus on the difference between developing group and individual creativity Innovative ideas for creativity in

subject teaching Practical examples and 'Creative Challenges' throughout The book draws on the author's many years of experience of working with children in schools, working on Creative Partnerships and Higher Education in the Arts (HEARTS) projects and ideas developed through working in initial teacher training. This book is essential reading for students in the early stages of their teacher training course as well as for practising teachers looking for innovative ideas and guidance on developing creativity in themselves and their classrooms. "This is an interesting book, which explores theory, practice and policy of creativity in the primary classroom. Jill Jesson links five key creative behaviours drawn together initially by (then) policymakers QCA, with what she identifies as six areas of creative endeavour. Primary teachers committed to developing a 'creative curriculum' will find much material in this lively book that supports their personal and professional creativity, as well as suggestions for classroom practice in developing individual and group work." Professor Anna Craft, University of Exeter and The Open University, UK "This is a compulsory read for all those interested in developing the creative potential of young people in primary schools. It includes a useful overview of previous thinking on creativity and makes a convincing case for its importance across the curriculum. Above all, this book is jam-packed with practical ideas. Whether you are interested in creative approaches to maths or modern languages, developing group or personal creativity, or the challenges of assessing creative endeavour, you will find a host of strategies that have been tried and tested in the classroom." Hilary Hodgson, Director, Ormiston Trust Presents techniques for creating mixed media art, with step-by-step, illustrated instructions and overviews of the required tools and materials, including drawing and painting techniques, stamping, stitching, collaging, and journaling.

Original essays offering fresh ideas and global perspectives on contemporary feminist art The term 'feminist art' is often misused when viewed as a codification within the discipline of Art History—a codification that includes restrictive definitions of geography, chronology, style, materials, influence, and other definitions inherent to Art Historical and museological classifications. Employing a different approach, *A Companion to Feminist Art* defines 'art' as a dynamic set of material and theoretical practices in the realm of culture, and 'feminism' as an equally dynamic set of activist and theoretical practices in the realm of politics. Feminist art, therefore, is not a simple classification of a type of art, but rather the space where feminist politics and the domain of art-making intersect. The Companion provides readers with an overview of the developments, concepts, trends, influences, and activities within the space of contemporary feminist art—in

different locations, ways of making, and ways of thinking. Newly-commissioned essays focus on the recent history of and current discussions within feminist art. Diverse in scope and style, these contributions range from essays on the questions and challenges of large sectors of artists, such as configurations of feminism and gender in post-Cold War Europe, to more focused conversations with women artists on Afropean decoloniality. Ranging from discussions of essentialism and feminist aesthetics to examinations of political activism and curatorial practice, the Companion informs and questions readers, introduces new concepts and fresh perspectives, and illustrates just how much more there is to discover within the realm of feminist art. Addresses the intersection between feminist thinking and major theories that have influenced art theory Incorporates diverse voices from around the world to offer viewpoints on global feminisms from scholars who live and work in the regions about which they write Examines how feminist art intersects with considerations of collectivity, war, maternal relationships, desire, men, and relational aesthetics Explores the myriad ways in which the experience of inhabiting and perceiving aged, raced, and gendered bodies relates to feminist politics in the art world Discusses a range practices in feminism such as activism, language, education, and different ways of making art The intersection of feminist art-making and feminist politics are not merely components of a unified whole, they sometimes diverge and divide. A Companion to Feminist Art is an indispensable resource for artists, critics, scholars, curators, and anyone seeking greater strength on the subject through informed critique and debate.

"This practical text helps student teachers develop their confidence, understandings and skills so that they can effectively and authentically teach arts in primary and middle school classrooms. Delivering Authentic Arts Education outlines the true nature of arts education and its importance in the curriculum, emphasising the arts as forms of creative activity, meaning-making and expression in a cultural context. Chapters discuss how to recognise and build on your existing artistic abilities and pedagogical skills, how to encourage children's creativity, how to lead arts appreciation experiences, and the general principles of planning and assessment. They then examine the five arts areas: dance, drama, media arts, music and visual arts. The final part of the text contains sample learning activities and resources that demonstrate how to plan an effective lesson within a unit of inquiry. Practical tips, classroom 'snapshots', starter ideas and suggestions for online resources show you the links between theory and practice so you can develop arts education experiences that are purposeful, stimulating and engaging for everyone"--Publisher's summary.
