There's a new trend towards stylized, comic-style art, with the latest wave of 3D movies (a la Pixar). Max users can do this kind of thing, and they want to learn how. Andy Gahan is building on the success of his Focal book, 3ds Max Modeling for Games (which covers realistic style art) with this new VOLUME II, covering stylized comic-style art. Forum members are asking for this treatment, and we are delivering. We are linking up to original book branding and titling, and offering the same robust portal for both books - the art on the cover will show the distinction of this volume. The book will offer new modeling techniques, specifically cartoon style - think Pixar, offering new challenges to people who bought Volume I (which focused on more realistic art). Website (www.3d-for-games.com) is unique - an online forum where readers can post and answer questions about their work. In terms of developing a portfolio, online peer critiques are invaluable, and current readers have made use of this feature, in fact some have happily become the forum responders (along with Andy) to coach and develop new artists at work. Also included: step-by-step project files for each chapter; all the relevant texture files and source photos; panoramic skies, small scene objects, bonus texture maps & models so that artists can create whole scenes very quickly without starting from scratch each time; countless examples of what's hot and what's not in 3D modeling and also enough support images and photos to keep the budding artist busy for months. Unrivalled support in over 10,000 current posts - backing up the book with a lively forum and community of readers from all over the world, ready to help your work.
