For fans of Jeff Zentner and Katie Henry comes a thrilling and funny debut about a teen raised in a doomsday community who plots her escape with the boy from the bunker next door. Always be ready for the worst day of your life. This is the mantra that Becca Aldaine has grown up with. Her family is part of a community of doomsday preppers, a neighborhood that prioritizes survivalist training over class trips or senior prom. They're even arranging Becca's marriage with Roy Kang, the only eligible boy in their community. Roy is a nice guy, but he's so enthusiastic about prepping that Becca doesn't have the heart to tell him she's planning to leave as soon as she can earn a full ride to a college far, far away. Then a devastating accident rocks Becca's family and pushes the entire community, including Becca's usually cynical little sister, deeper into the doomsday ideology. With her getaway plans thrown

into jeopardy, the only person Becca can turn to is Roy, who reveals that he's not nearly as clueless as he's been pretending to be. When Roy proposes they run away together, Becca will have to risk everything—including her heart—for a chance to hope for the best instead of planning for the worst.

How should I use technology in my courses? What impact does technology have on student learning? Is distance learning effective? Should I give online tests and, if so, how can I be sure of the integrity of the students' work? These are some of the questions that instructors raise as technology becomes an integral part of the educational experience. In *Quick Hits for Teaching with Technology*, award-winning instructors representing a wide range of academic disciplines describe their strategies for employing technology to achieve learning objectives. They include tips on using just-in-time teaching, wikis, clickers, YouTube, blogging, and GIS, to name just a few. An accompanying interactive website enhances the value of this innovative tool.
