Excellent reproduction of rare catalog describes 86 different houses and bungalows in over 300 photographs, illustrations, and floor plans. Text provides complete descriptions.

Excellent reproduction of rare catalog illustrates and describes 86 different types of houses and bungalows still in evidence across America. Over 300 photographs, illustrations and floor plans with full descriptions comprise an invaluable sourcebook for study, authentication or restoration of antique articles or architecture.

The house of your Dreams does not have to be expensive. The key is all in the planning. How much a house costs, how it looks, how comfortable it is, how energy-efficient it is--all these things occur on paper before you pick up even one tool. A little extra time in the planning process can save you tens of thousands of dollars in construction and maintenance. That is time well spent! Living Homes takes you through the planning process to design an energy and resource efficient home that won't break the bank. Then, from the footings on up to the roof, author Thomas J. Elpel guides you through the nuts and bolts of construction for slipform stone masonry, tilt-up stone walls, log home construction, building with strawbales, making your own terra tile floors, windows

and doors, solar water systems, masonry heaters, framing, plumbing, greywater, septic systems, swamp filters, concrete-fly ash countertops, painting and more. Living Homes was completely re-organized and revised for the new sixth edition, based on five additional years of building experience with low-cost, high efficiency construction methods. Get the latest ideas on how to build a high-performance house that will stand the test of time! The sixth edition includes fifteen pages of new material covering the latest stone masonry tips, plus revised and expanded tips and techniques throughout the book.

This Code is applicable to the design of water supply and drainage systems for residential sub-districts, public buildings, and civil buildings; it is also applicable to the design of domestic water supply, sanitary waste drain as well as roof rainwater drainage systems for industrial buildings.

This book offers a comprehensive overview of energy sectors in emerging African and Latin American nations, providing a one-stop source of information and analysis of energy sectors that differ radically from those of developed countries. It focuses on how indigenous energy sources can be used within a systems framework to enhance each nation's economic prosperity, secure their energy future and reduce global carbon emissions. It begins by examining the current energy trends in Africa and Latin America, and the constraints that current practices place on meeting future energy needs. Further chapters present a deeper analyses of each technology adapted to these regions and a description of 94 selected case

examples recently published in the scientific literature (2014-2016) and covering almost all countries to highlight energy experiences that could serve as engines for developing low-carbon energy technologies across the two regions. These issues are elucidated by a large number of illustrations and tables to offer valuable insights into the topics and technologies discussed. The book enables students, researchers and professionals in energy to better understand the energy context in Africa and Latin America, and helps define strategies for supporting these regions in introducing low-carbon energy technologies that supplement indigenous sources in a manner that enhances long-term economic prosperity. It is also intended for consulting companies and government agencies involved in the energy sector, as well as environmental science and energy management students.

Calendar Giving Details of the Course of Instruction for Each Class in the Sydney Technical College  
Domestic Sanitary Drainage and Plumbing  
Lectures on Practical Sanitation Delivered to Plumbers, Engineers, and Others in the Central Technical Institution, South Kensington, London, Under the Auspices of the City and Guilds of London Institute for the Advancement of Technical Education  
Building Services Theory  
Notes and Sketches from Lectures on Sanitary Drainage and Plumbing, Cold and Hot Water Services, Pretreatment of Liquid Trade Wastes
