The connections between culture and sustainability have been in the public agenda since the 20th century. However, whilst global sustainability programmes at international institutional levels are yet to recognise the role of culture in their sustainability policies, the bid (albeit failed) in the early 2000s to formally add “culture” to the trilogy of sustainability pillars (economic, social, and environmental) mobilised a new discourse for the reframing of cultural policy narrative, which in turn urged a reassessment of methods of cultural management reflecting the same concerns among the sector’s grassroots. The idea of sustainability and culture working together and their envisioned role in future-proofing society and human development captured the imagination of cultural commentators, policy makers and practitioners alike, keen to fulfil these principles “out there”—in cultural organizations and events mega and small, in cities and regions, local and global. The papers in this Special Issue reflect this appeal. This publication covers a wide selection of issues related to sustainable cultural management, which means that it can be recommended to a varied audience. First of all, it can be recommended to managers experienced in cultural management, where success is measured more by the degree of mission accomplishment and the social benefits achieved rather than by profit. Another group comprises the employees of cultural organizations who want to improve their knowledge of sustainable cultural management. This Special Issue can also be recommended to artists, researchers, students, state and local government employees, founders and patrons of art, and all those who want to understand the importance of sustainable cultural management.

When Fortune Magazine estimated that 70% of all strategies fail, it also noted that most of these strategies were basically sound, but could not be executed. The central premise of Strategic Project Management Made Simple is that most projects and strategies never get off the ground because of adhoc, haphazard, and obsolete methods used to turn their ideas into coherent and actionable plans. Strategic Project Management Made Simple is the first book to couple a step-by-step process with an interactive thinking tool that takes a strategic approach to designing projects and action initiatives. Strategic Project Management Made Simple builds a solid platform upon four critical questions that are vital for teams to intelligently answer in order to create their own strong, strategic foundation. These questions are: 1. What are we trying to accomplish and why? 2. How will we measure success? 3. What other conditions must exist? 4. How do we get there? This fresh approach begins with clearly understanding the what and why of a project - comprehending the bigger picture goals that are often given only lip service or cursory reviews. The second and third questions clarify success measures and identify the risky assumptions that can later cause pain if not spotted early. The how questions - what are the activities, budgets, and schedules - comes last in our four-question system. By contrast, most project approaches prematurely concentrate on the how without first adequately addressing the three other questions. These four questions guide readers into fleshing out a simple, yet sophisticated, mental workbench called "the Logical Framework" - a Systems Thinking paradigm that lays out one's own project strategy in an easily accessible, interactive 4x4 matrix. The inclusion of memorable features and concepts (four critical questions, LogFrame matrix, If-then thinking, and Implementation Equation) make this book unique.

SEMAR MBANGUN PERADABAN “Udu mbangun gedung, ning mbangun manungsone. Ora kok perkoro gedung sing magrong-magrong seko mas, jamrud, nanging wong sing ing Negoro ngamarta kui pie ben uripe kebak kanikmatan, pada rukun, tentrem, ayem atine, samat-sinamatan. Yen abot podo dipikul, yen enteng podo dicangkling bareng-bareng. Mujudake negoro sing adil, tyas bagyo mulyo, rukun; uripe podo dene neng kahyangan.” – Semar (Semar Mbangun Kahyangan; Ki Seno Nugroho) Indonesia memang sudah 75 tahun merdeka, tetapi dalam hal pembangunan, apakah kita sudah benar-benar mencapai titik kemerdekaan seperti yang diharapkan? Berbagai problematika yang ada, mulai dari ketimpangan pemerataan pembangunan, hingga kisruh mengenai penolakan dan penggusuran, hingga kini masih menjadi PR besar bangsa yang belum terselesaikan. Pembangunan masih menjadi isu primadona yang mendominasi perbincangan di berbagai forum terbuka dan media massa. Sebenarnya, apa masalahnya? Rupa-rupanya, selama ini kita terlalu terfokus pada proyek-proyek pembangunan yang bersifat materiil, dan masih bias pada pentingnya pembangunan spiritual serta moril; pembangunan manusianya. Padahal, dua substansi tersebut tidak kalah pentingnya dalam proyek pembangunan. Maka, kini saatnya kita memberi atensi pada hal fundamentalis tersebut. Ada banyak cara dan strategi yang dapat dilakukan. Namun, selama ini, strategi-strategi dalam proyek manajemen pembangunan sendiri, cenderung mengacu pada literatur barat. Padahal, sebenarnya kita memiliki sebuah local knowledge asli Indonesia yang dapat dijadikan sebagai sumber referensi dalam hal tersebut, yakni wayang. Wayang, sesuai dengan fungsinya sebagai tontonan lan tuntunan, piweling lan piwulang tidak hanya menyajikan hiburan lewat lakon-lakon yang dipertunjukkan, tetapi juga menyuguhkan berbagai nilai-nilai kehidupan yang adi luhung. Nilai-nilai yang sarat akan filosofi serta strategi yang dapat dijadikan sebagai sumber referensi dalam menghadapi berbagai tantangan dan persoalan dalam jagad proyek pembangunan. Salah satu contohnya seperti pitutur Semar yang tersemat di atas tadi, bahwa sekali lagi, “Udu mbangun gedung, ning mbangun manungsone.”

A number of developing countries, including small island states have common problems that have affected their development and growth. Knowledge Management (KM) initiatives can be used to address some of these issues, but these developing countries need to understand what is needed to implement them, in order to improve economic conditions. While many of these countries have access to technologies that can be used to assist in knowledge management, relevant and low cost KM initiatives need to be considered in improving their existing KM processes. Sectors critical to the growth of these developing countries include health care, crime management, disaster recovery management, small and medium size enterprise development. *Knowledge Management for Development: Domains, Strategies and Technologies for Developing Countries* highlights the opportunities in these sectors and provides advice as to how these countries should go about understanding, building and adopting the relevant KM strategies and technologies. This book identifies appropriate technologies which should be considered to increase productivity within the identified sectors in the developing countries and also sectors in where knowledge management initiatives can yield maximum value. It also considers the constraints of these territories, recommending appropriate technologies and strategies for KM initiatives. It provides advice on how these technologies should be adopted in these sectors of developing countries. Investing in these strategies should benefit these countries development and growth.
