What did ordinary people believe in post-Reformation England, and what did they do about it? This book looks at religious belief and practice through the eyes of five sorts of people: godly Protestant ministers, zealous Protestant laypeople, the ignorant, those who complained about the burdens of religion, and the Catholics. Based on 600 court and visitation books from three national and twelve local archives, it cites what people had to say about themselves, their religion, and the religions of others. How did people behave in church? What did they think of church rituals? What did they do on Sundays? What did they think of people of other faiths? How did they get along together, and what sort of issues produced tensions between them? What did parishioners think of their priests and what did the clergy think of their people? Was everyone seriously religious, or did some people mock or doubt religion? If these questions have been tackled before, it has usually been by way of claims about what the common people believed in books written by members of the educated ranks about their contemporaries. In contrast, by going directly to other sources of evidence such as court records and parish complaints, this book illuminates what ordinary people actually said and did. Written by one of our leading historians of early modern England, it is a lively and readable account of popular religion in England under Elizabeth I and the early Stuarts, dealing with the results of the Reformation, reactions to official policy, and the background to the Civil Wars of the mid-17th century.

Brainy People's Guide To PMP(r) Credential is based on a powerful strategy: It summarizes and presents the whole PMBOK(r)Guide (5th Edition) and relevant concept in 255 points and it often discusses same point from various angles to help you with interpreting the concept properly. You can either use this as a pocket guide, or just as a reading material for the PMP(r) exam. This book has the following advantages over other existing books on PMP(r) credential:1. It presents the whole materials in 255 points!.2. It has been prepared and adjusted as much as possible keeping in mind that readers can use kindle, Smartphone, PC, Mac to read the book with easy navigation between chapters, from formula to chapters, chapter to relevant formula section etc.3. It has a specific section for all the formulas you need.4. It provides ITTOs in each relevant knowledge area chapter, and then it provides all the ITTOs again in process group order that would be tremendously useful in real life.5. It provides example on how to document project working hour experience for PMP(r) Exam application.6. It provides online resources and help through forum. But the main strength of the book is, again, the summarizing and the various angles techniques. While trying to avoid using too much text, this book gives excellent example and illustration of critical factors such as EVM, Cost Budget calculation, Quality Tools etc. It presents goals of process groups and processes in a simple yet powerful graphical way in each of the relevant knowledge area section. Colorful post-it type process area mappings, filterable ITTOs, some illustrations/ resources/templates used

in the book are available to download from the author's website.\*\*\* NEW \*\*\* : The latest edition now discusses both current exam content outline and the changing exam content outline.
