This title is directed primarily towards health care professionals outside of the United States. It is the essential practice companion to Watson's Clinical Nursing and Related Sciences and is designed to be carried in the pocket whilst on duty. It is invaluable for quick access to the key facts needed during clinical practice. By incorporating care from the primary health perspective, it

is equally useful as a rapid read in community settings. Each chapter follows the same structure for each body system and is well supported by diagrams and charts. The inclusion of anatomy and physiology in each section assists the student to make links between the relevant systems, diagnosis and patient care. Each section contains a list of signs and symptoms of the most common and serious conditions indicating possible complications thereby assisting students in the development of vital assessment skills. Medical management explains what the doctors are doing. Pharmacology focus summarises the main medications in use. Nursing care priorities outline the important elements of care. Ten top tips list the things you should never forget in caring for patients with the conditions described in each chapter. The user-friendly size, layout and design makes it quick to access to the relevant information.

Research has shown that a range of adult psychiatric disorders and mental health problems originate at an early age, yet the psychiatric symptoms of an increasing number of children and adolescents are going unrecognized and untreated—there are simply not enough child psychiatric providers to meet this steadily rising demand. It is vital that advanced practice registered nurses (APRNs) and primary care practitioners take active roles in assessing behavioral health presentations and work collaboratively with families and other healthcare professionals to ensure that all children and adolescents receive appropriate treatment. Child and Adolescent Behavioral Health helps APRNs address the mental health needs of this vulnerable population, providing practical guidance on assessment guidelines, intervention and treatment strategies, indications for consultation, collaboration, referral, and more. Now in its second edition, this comprehensive and timely resource has been fully updated to include DSM-5 criteria and the latest guidance on assessing, diagnosing, and treating the most common behavioral health issues facing young people. New and expanded chapters cover topics including eating disorders, bullying and victimization, LGBTQ identity issues, and conducting research with high-risk children and adolescents. Edited and written by a team of accomplished child psychiatric and primary care practitioners, this authoritative volume: Provides state-of-the-art knowledge about specific psychiatric and behavioral health issues in multiple care settings Reviews the clinical manifestation and etiology of behavioral disorders, risk and management issues, and implications for practice, research, and education Offers approaches for interviewing children and adolescents, and strategies for integrating physical and psychiatric screening Discusses special topics such as legal and ethical issues, cultural influences, the needs of immigrant children, and child and adolescent mental health policy Features a new companion website containing clinical case studies to apply concepts from the chapters Designed to specifically address the issues faced by APRNs, Child and Adolescent Behavioral Health is essential reading for nurse practitioners and clinical nurse specialists, particularly those working in family, pediatric, community health, psychiatric, and mental health settings.
