The automobile industry is evolving rapidly on a worldwide basis. Manufacturers are merging, component design and manufacture are now frequently outsourced instead of being created in-house, brands are changing and the giant auto makers are expanding deeper into providing financial services to car buyers. The skyrocketing price of gas spurs developments in hybrid technology and clean diesel, as manufacturers look for ways to improve fuel efficiency. Meanwhile, all of the biggest, most successful firms have become totally global in nature. Plunkett's Automobile Industry Almanac will be your complete guide to this immense, fascinating industry. On the car dealership side, giant, nationwide holding companies have acquired the best dealers in major markets. Even the used car business is being taken over by national chains. E-commerce is having profound effects on the car industry. Consumers use the Internet to become better informed before making a purchase. Online sites like Autobytel steer millions of car buyers toward specific dealers while the same sites deliver competing bids for cars, insurance and financing in a manner that lowers costs and improves satisfaction among consumers. Meanwhile, auto makers are using the latest in e-commerce methods to manage their supply chains and replenish their inventories. When Rebecca arrives at the nearby meadow, she does not find her friend – instead, she finds what seems to be a UFO. Curious, she climbs inside to explore, kicking off the adventure of a lifetime. Her journey leads her not only to Hawaii and Paris but also to a new boyfriend and into the arms of her Lord and Savior, Jesus Christ. Everything goes perfectly until Rebecca is tested. Will her newfound love, and her faith in God, prevail? Car Troubles central premise is that the car as the dominant mode of travel needs to be problematized. It examines a wide range of issues that are central to automobility by situating it within social, economic, and political contexts, and by combining social theory, specific case studies and policy-oriented analysis. As U.S. and Canadian automakers and dealers face bankruptcy and Toyota battles unprecedented quality-control problems, Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. Phil Edmonston, Canada's automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler's days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz – rich cars, poor quality. There's only one Saturn you should buy. Toyota – enough apologies: "when you mess up, 'fess up."

Goodman's debut novel takes us on a mesmerizing journey of linked narratives that speak to the richness and rawness of the human experience. Through unusual circumstances, three unlikely and uniquely different people come together in the small desert community of Lunden, Arizona. All three are products of their turbulent pasts, possessing deep flaws as well as remarkable qualities. The bond they form is of the intensity most people are lucky to experience once in a lifetime, if ever. Tom is a forty-one-year-old college professor from Kingston, New York. He teaches English Literature as does his wife. With their marriage crumbling, Tom takes a sabbatical to reevaluate his life. He is brilliant, but often socially awkward. Seeking a completely new environment in which to sort himself out, he finds Lunden, Arizona. Tom's immense intellect and personal evolution drive the novel

forward. Mae is a thirty-nine-year-old accountant and part time singer from Tennessee. She married her high school sweetheart soon after graduation. The marriage ends tragically, but Mae puts herself through college and then leaves Tennessee behind. Some years later, after quitting an accounting job in Tucson, Mae's car overheats on a back road leading to the Grand Canyon. Without cell phone service, she is stranded until a Native American in an open yellow Jeep happens by, arranges for a tow and brings her to Lunden, Arizona. Joseph is a twenty-nine-year-old part-Crow Indian from Montana. Soon after his birth Joseph's single, teenage mother abandons him and leaves the state. Her older sister and white husband raise Joseph on their ranch. He is educated away from the reservation, and after college graduation, the young and idealistic Joseph returns to the reservation of his birth to teach high school. His optimism quickly changes to disillusionment and then disappears altogether when a violent altercation in the classroom ends his teaching career. Joseph leaves Montana for a warmer climate where he intends to lead a solitary, primal existence. He rents a simple house in the desert outside Lunden, Arizona. As the small desert town of Lunden gradually reveals its darker underbelly of sex, violence and racism, the novel's realism intimately captivates us. With diverse characters brought to life through a mixture of sometimes emotional, humorous, moving, shocking and heartbreakingly tragic developments as well as flashback revelations, *Desert Sundays* unfolds like an ingenious jigsaw puzzle. Propelled toward an explosive finale, the novel compels us to reexamine concepts of legal versus moral justice, loyalty, degrees of personal loss, prejudice and even the possibility of metaphysical predetermination. *Desert Sundays* strikingly showcases the complexities of contemporary America, and with masterful insight, the novel vividly captures life's intensity, touching our hearts, our hopes and our fears. "My mother used to tell me that we are all born pulling a cart. As life progresses we fill the cart with our experiences - some good, some bad. This becomes our baggage cart. Certain people use it to build fortunes and empires, while others are crushed under the weight of their own baggage and never create anything." - Joseph Curly of *Desert Sundays* -

For more than half a century, marketers have bombarded customers with more and more choices in products and services. What is the result? Unprecedented anxiety. Our mental circuit breakers are on overload. In fact, pioneering brand strategists Steven M. Cristol and Peter Sealey assert that we have reached our manageable threshold for making decisions -- and a watershed in product proliferation. In this pathbreaking book, the authors argue with compelling evidence that the next generation of marketing successes will belong to those brands that simplify customers' lives or businesses in ways that are inextricably tied to brand and product positioning. They contend that if a brand is not reducing customer stress, it is creating it -- and it is vulnerable to losing market share to more customer-empathetic competitors. Writing especially for product or brand managers who are struggling to simplify their portfolios, Cristol and Sealey have created a breakthrough framework that is itself a lesson in simplicity. After presenting two essential guideposts for managers to assess where their brand sits on the stress spectrum, the authors turn to the heart of Simplicity Marketing -- the 4 R's of simplification: Replace, Repackage, Reposition, and Replenish. Using scores of real-world company examples, Cristol and Sealey show how each of the 4 R's interacts with the others in powerful ways to relieve customer stress and how these strategies may be executed individually or in combination to build brand loyalty. Here for the first time are ten specific strategies to relieve customer stress through consolidating, aggregating, or integrating products and services, repositioning brands for more relevance to stress reduction, and decluttering customers' decision-making requirements. The final pages of this brilliant manifesto for a simplicity revolution provide a guide to managing simplicity strategies, leveraging information technology to simplify rather than complicate customers' lives, and integrating all the tools in the book into an executional blueprint.
