Harry Callahan (1912-1999) was one of American photography's great innovators. During a career that spanned six decades, Callahan pursued an individual and experimental approach and investigated a wide range of themes, techniques, and materials. Yet he cherished no photographs more than the images of his wife, Eleanor, which form an intimate visual diary of a lifestyle and a relationship. This is the definitive publication of Callahan's photographs of Eleanor. For almost two decades from the early 1940s to the early 1960s, Callahan photographed his wife in countless ways; nude and clothed, indoors and outdoors, in public parks and city streets, at the beach, in a tent, in the woods, among sand dunes, and in the privacy of the family home. Reproducing many previously unpublished images, Harry Callahan: Eleanor offers an in-depth presentation of a single subject over many years, providing a new understanding of Eleanor as a subject and Callahan's lifelong exploration of the creative potential of photography.

What is the job of a "criminal profiler" really like? We see these roles played out nightly on tv shows and in the news, but how does law enforcement today actually use empirical data to correctly assess behaviour and help solve crimes, particularly serial crimes? Criminal and Behavioral Profiling, written by well-established authors Curt and Anne Bartol, presents a realistic and empirically-based look at the theory, research, and practice of modern criminal profiling, or, as it's more professionally termed, behavioural analysis or behavioural investigative analysis. Designed for use in a variety of criminal justice and psychology courses, the book delves into the process of identifying distinctive behavioural tendencies, geographical locations, demographic, and biographical descriptors of offenders, and personality traits, based on characteristics of the crime. Timely literature and case studies from the rapidly growing international research in criminal profiling help students understand the best practices, major pitfalls, and psychological concepts that are key to this process.

Covering the principles of three-dimensional design, Launching the Imagination: Three-Dimensional Design, is the ideal text for instructors seeking a colorful and inexpensive introduction to design elements, composition, and organization. The material in volume two is enhanced by a thorough discussion of creativity, critical thinking, and concept development that guides students through the often-challenging process of applying the principles of design to achieve practical goals. A free student CD-ROM that provides a hands-on design tutorial, as well as helpful self-test and review features to ensure student mastery of the text material further supports Launching the Imagination: Three-Dimensional Design.

Cavaiola and Colford's CASES IN CRISIS INTERVENTION explores key topics in crisis intervention with practical cases, serving as an excellent, application-oriented tool for students in the helping professions. Topics and settings in CASES IN CRISIS INTERVENTION include domestic violence, child maltreatment, bereavement, school crises and workplace crises. The range of examples will help prepare students with the information they need to succeed in professional practice. Each chapter begins with discussion questions to help foster critical thinking in students. In addition, the text

contains an overview of recent crisis data and research, helping to contextualize the case featured in each chapter. CASES IN CRISIS INTERVENTION can be used as a stand-alone text for any crisis intervention course, or it can be used as a companion to Cavaiola and Colford's A PRACTICAL GUIDE TO CRISIS INTERVENTION. Eight separate teams of art teachers, curriculum specialists, museum educators, and art discipline specialists worked together to create this stimulating collection of sample curricula. These distinctive approaches integrate art production, art history, art criticism, and aesthetics, the foundation of elements of discipline-based art education (DBAE).

These curricula provide examples of DBAE in practice for teachers who want to create their own curricula tailored to the needs of their schools and multicultural classrooms. Combining the time tested classical work of Earl Babbie with the insights of one of the most recognized and respected names in speech communication research,

THE BASICS OF COMMUNICATION RESEARCH is the book for the Communication research methods course. With the authors' collective experience teaching research methods and as active researchers themselves you will find this text to be the authoritative text for your course. The authors

frame research as a way of knowing, and provide balanced treatment to both quantitative and qualitative research traditions in communication research and present it in a student friendly and engaging format. It provides in-depth treatment of the role of reasoning in the research enterprise and how this reasoning process plays itself out in planning and writing a research proposal and report. With the rise of multi-core architecture, parallel programming is an increasingly important topic for software engineers and computer system designers. Written by well-known researchers Larry Snyder and Calvin Lin, this highly anticipated first edition emphasizes the principles underlying parallel computation, explains the various phenomena, and clarifies why these phenomena represent opportunities or barriers to successful parallel programming. Ideal for an advanced upper-level undergraduate course, *Principles of Parallel Programming* supplies enduring knowledge that will outlive the current hardware and software, aiming to inspire future researchers to build tomorrow's solutions.

First edition published in 1980.

Accompanying interactive CD-ROM contains video demonstrations of studio processes, a virtual image gallery and information about visiting museums. *PRINCIPLES OF MANAGEMENT, 12E, International Edition* takes a practical, student-oriented approach toward teaching management with an emphasis on current topics, including issues of diversity, ethics, and technology. The student-friendly content features references to pop culture and cites current publications of interest to students. In addition to providing the management framework and introducing students to contemporary management topics, the text provides experiential activities to get students thinking and acting like real-life managers. A robust network of supplements helps students to understand the hands-on, real-world application of chapter concepts.

With the aid of numerous illustrations, this book defines and explains the techniques, processes and materials used in works of art on paper. It is useful not only to those who wish to increase their understanding and enjoyment of prints, drawings and watercolours, but also to those who are thinking of starting a collection.

For sophomore-level courses in Assembly Language Programming in Computer Science, Embedded Systems Design, Real-Time Analysis, Computer Engineering, or Electrical Engineering curricula. Requires prior knowledge of C, C++, or Java. This text is useful for Computer Scientists, Computer Engineers, and Electrical Engineers involved with embedded software applications. This book is intended to provide a highly motivating context in which to learn procedural programming languages. The ultimate goal of this text is to lay a foundation that supports the multi-threaded style of programming and high-reliability requirements of embedded software. It presents assembly the way it is most commonly used in practice - to implement small, fast, or special-purpose routines called from a main program written in a high-level language such as C. Students not only learn that assembly still has an important role to play, but their discovery of multi-threaded programming, preemptive and non-preemptive

systems, shared resources, and scheduling helps sustain their interest, feeds their curiosity, and strengthens their preparation for subsequent courses on operating systems, real-time systems, networking, and microprocessor-based design.

Bringing together sixty-five primary documents vital to understanding the history of art in Latin America since 1900, Patrick Frank shows how modern art developed in Latin America in this important new work complementing his previous book, Twentieth-Century Art of Latin America, Revised and Expanded Edition. Besides autobiographies, manifestos, interviews, and artists' statements, the editor has assembled material from videos, blogs, handwritten notes, flyers, lectures, and even an after-dinner speech. As the title suggests, many of the texts have a polemical or argumentative cast. In these documents, many of which appear in English for the first time, the artists themselves describe what they hope to accomplish and what they see as obstacles. Designed to show how modern art developed in Latin America, the documents begin with early modern expressions in the early twentieth century, then proceed through the avant-garde of the 1920s, the architectural boom of midcentury, and the Cold War years, and finally conclude with the postmodern artists in the new century.

This groundbreaking text is the most complete and detailed book devoted to middle-range theories and their applications in clinical nursing research. The book thoroughly explains the process of selecting an appropriate theory for a particular nursing research study and sets forth criteria for critiquing theories. Each chapter includes examples of research using middle-range theories, definitions of key terms, analysis exercises, reference lists, and relevant Websites. Instruments are presented in appendices. New features of this edition include analysis questions for all theories; new chapters on learning theory and physiologic middle-range theories; "Part" introductions to frame the selection process for each middle-range theory chosen; and a glossary of terms.

Text and accompanying photographs present art theory, practices, and history from ancient Egypt through the early twenty-first century.

Packed with current examples you can easily relate to, Tischler's INTRODUCTION TO SOCIOLOGY, 11E delivers comprehensive, up-to-date coverage in a succinct and affordable format. The author begins by equipping you with tools for success, including tips for how to read, study, and take tests more effectively. A built-in study guide and

The Truth About Managing People offers real solutions for the make-or-break problems faced by every manager. Readers will discover: how to overcome the true obstacles to teamwork; why too much communication can be as dangerous as too little; how to improve hiring and employee evaluations; how to heal layoff survivor sickness; even how to learn charisma. This isn't someone's opinion; it's a definitive, evidence-based guide to effective management: a set of bedrock principles to rely on throughout an entire management career. The Rules of Management: They're surprisingly easy to learn and live by. Now, Richard Templar's brought them all together in one place. Templar covers everything from setting realistic targets to holding effective meetings; finding the right people to inspiring loyalty. Learn when and how to let your people think they know more than you (even if they don't) -- and recognize when they really do. The first edition of The Rules of Management became a global phenomenon, topping bestseller charts around the world. This new, even better edition contains 10 brand new rules to take you further, faster. In Wired to Care, top business strategist Dev Patnaik tells the story of how organizations of all kinds prosper when they tap into a power each of us already has: empathy, the ability to reach outside of ourselves and connect with other people. When people inside a company develop a shared sense of what's going on in the world, they see new opportunities faster than their competitors. They have the courage to take a risk on something new. And they have the gut-level certitude to stick with an idea that doesn't take off right away. People are Wired to Care, and many of the world's best organizations are, too.

Krugman's Microeconomics for AP\* combines the successful storytelling, vivid examples, and clear explanations of Paul Krugman and Robin Wells with the AP\* expertise of Margaret Ray and David Anderson. In this exciting new AP text, Ray and Anderson successfully marry Krugman's engaging approach and captivating writing with content based on The College Board's AP Economics Course outline, all while focusing on the specific needs and interests of high school teachers and students.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been

kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public."

This popular, readable text presents the basic concepts underlying professional nursing and seeks to prepare students for the realities of contemporary issues affecting the profession and overall delivery of health care. Fully updated to cover today's evolving topics, this edition has a completely revised table of contents to help students better understand the nurse's role in health care. The text addresses key needs of today's instructors, particularly with the addition of a new chapter on safety concerns as well as new information related to evidence-based practice, coverage of health care reform, and more! Example inserts assist students to see the concepts applied in the work situation. Critical thinking exercises allow students to apply concepts through class discussion, small group work, or other interactive classroom activity. Communication in Action models assist students in developing their expertise in communicating with the health care team. First person approach engages students so they actually read this book. Colorful illustrations catch student interest and provide a learning opportunity for those who learn best from visual aids.

"The phrase "prevalence of ritual" was first used in relation to this and three other 1964 collages: *Conjure Woman as an Angel*, *Tidings*, and *Baptism*. The conjure woman (which Bearden consistently spelled "conjure"), a spirit figure in southern African-American culture, moved north as part of the Great Migration and reappears frequently in Bearden's work. She is called upon to prepare love potions, cure illnesses, and assist with personal problems."--Text from [nga.gov](http://nga.gov) (see link).
