Each volume of the Dictionary of World Biography contains 250 entries on the lives of the individuals who shaped their times and left their mark on world history. This is not a who's who. Instead, each entry provides an in-depth essay on the life and career of the individual concerned. Essays commence with a quick reference section that provides basic facts on the individual's life and achievements. The extended biography places the life and works of the individual within an historical context, and the summary at the end of each essay provides a synopsis of the individual's place in history. All entries conclude with a fully annotated bibliography.

The book offers insight into the publication history of eighteenth-century English grammars in unprecedented detail. It is based on a close analysis of various types of relevant information: Alston's bibliography of 1965, showing that this source needs to be revised urgently; the recently published online database Eighteenth Century Collections Online (ECCO) with respect to sources of information never previously explored or analysed (such as book catalogues and library catalogues); Carol Percy's database on the reception of eighteenth-century grammars in contemporary periodical reviews; and so-called precept corpora containing data on the treatment in a large variety of grammars (and other works) of individual grammatical constructions. By focussing on individual grammars and their history a number of long-standing questions are solved with respect to the authorship of particular grammars and related work (the Brightland/Gildon grammar and the Bellum Grammaticale; Ann Fisher's grammar) while new questions are identified, such as the significant change of approach between the publication of one grammar and its second edition of seven years later (Priestley), and

the dependence of later practical grammars (for mothers and their children) on earlier publications. The contributions present a view of the grammarians as individuals with (or without) specific qualifications for undertaking what they did, with their own ideas on teaching methodology, and as writers ultimately engaged in the common aim presenting practical grammars of English to the general public. Interestingly - and importantly - this collection of articles demonstrates the potential of ECCO as a resource for further research in the field.

In this time of proliferating scholarship, one of the most welcome publications is [this] intelligently selected and annotated bibliography of secondary material. . . . Understanding the value of selectivity, Spector has limited his entries to books and significant articles. Perhaps because of his avowed interest in redefining the period, he has been careful to include articles on historiography and critical method which apply to the eighteenth century. He has not, however, slighted the older works of twentieth-century scholarship. . . . A valuable resource not only to students of literature and related fields but to anyone interested in learning about the eighteenth century. The complete history of Jansenism will probably never be written because to write it would involve the study of a movement that grew and changed constantly for more than two hundred years and found a different expression in many countries, especially France, Holland, and Italy. Of course the ordinary Frenchman of any education would think that he knew something about Jansenism. For him, and for many Englishmen of some French culture, Jansenism is a heresy about grace and predestination that found expression in the Augustinus of Cornelius Janssens or Jansenius, Bishop of Ypres and at one time professor in the university of Louvain. 1 The theological position of Jansenius was adopted by his friend, Jean Duvergier de Hauranne, commonly known as the Abbe de S. Cyran, a director of the monastery of Port Royal des Champs. Through its relations with S. Cyran and with Antoine Arnauld, brother of Angelique Arnauld, Abbess of Port Royal, the monastery entered into the theological controversies of the time, especially after Arnauld's severe moral work - De frequente Communion. 2 But to the ordinary Frenchman, Port Royal, besides its quarrels about predestination, is chiefly memorable for its great literary names, Pascal, Racine, Boileau, and to some extent La Fontaine and Mme de Sevigne. What Jansenism really stood for and what became of its ideal after the brutal demolition of Port Royal in 1709 by Louis XIV is but little known.
