This new book looks at the application of "Save and Grow" practices and technologies to production of the world's key food security crops – maize, rice and wheat. With examples drawn from developing countries worldwide, it shows how eco-friendly farming systems are helping smallholder producers to boost cereal yields, improve their incomes and livelihoods, conserve natural resources, reduce negative impacts on the environment, and build resilience to climate change. Vedanta provides the ultimate answers regarding our real nature, this life and the world we are in, and thus guides us in leading a life of peace and happiness. Bhaja Govindam reveals the subtle and profound message of Vedanta (the wisdom of the Upanishads) in a simple, direct and concise manner, and that too through exquisite poetry. Importantly, it presents practical ways to apply Vedanta to daily life, cutting through the numerous terms and concepts in spirituality. For most people, Bhaja Govindam – authored by Adi Shankaracharya – is just a beautiful song, ever filling their hearts with devotion towards Lord Krishna. But, in reality, every verse presents us with an understanding of life and shows us how to lead a life that is filled with peace and happiness, and finally leading us to fulfilment. Bhaja Govindam shows us how we suffer in life because of the wrong perceptions (delusions) regarding ourselves and life in this world. That is why this text is formally referred to as Moha-mudgara? (literally meaning: 'the hammer that destroys delusion'). It helps us remove the wrong perceptions so that we can be free from suffering and be endowed with ever-lasting happiness. This book is a translation and commentary (in English) on Bhaja Govindam and
