In this title, readers will find out if they have what it takes to become a technical project manager. They will learn what the job entails, what skills and personality are required for the job, the types of training and education needed, and what a typical day on the job is like.

Look around your organization: can you identify who owns project management? Would that person appreciate that they own responsibility for your projects? Project Leadership: Creating Value with an Adaptive Project Organization highlights the importance of these questions—underlining the importance not only of the project team but on the culture of executive leadership to the success of projects. It offers straight-forward takeaways and solutions to provide executives with the tools to implement an effective project environment. The

book begins with a discussion of the project environment and what it means for a project to succeed or fail in today's world. It introduces the Adaptive Project Management Model followed by a review of the systems and tools that give firms increasing ability to maintain priority on strategic projects and manage their associated uncertainty. Working through the book, you can progressively apply tactics from each chapter to increase your project leadership capability and improve your process so that your projects adapt as required depending on the nature of the portfolio itself. Ask yourself this—what is my customer buying? What do they really want? The one element that all organizations have in common is that customers are buying execution, and not much else. Therefore, ultimately, this book is about execution—getting things done and making things happen. It details methods and tactics that help you execute projects more effectively and give your organization the edge in the current, fast-paced marketplace.

Cape Town, South Africa, 7 Sept. 2016 – 8 Sept. 2016. Theme: Sustainable economies in the information economy. Purpose: To share the quality academic papers presented at the International Conference on Business and Management Dynamics (ICBMD) held from 7 to 8 September 2016 at African Pride Crystal Hotel and Spa in Cape Town. As grey literature, the proceedings are the contributions made by researchers at the conference and are considered the written record of the work that was presented to fellow conference delegates. Methodology: The methodology used varies from researcher to researcher but are suitable for the studies conducted. Thus, on the one hand, studies that were subjective in nature used the interpretive paradigm, where the qualitative approach adopted made use of the interview method to collect data. On the other hand, studies that were objectively inclined adopted the positivist philosophy and used survey questionnaires to collect data. However,

Download Free Project Management Managerial Process 5th Edition Bing

there were some academic papers which used mixed methodology because of the nature of the study. Whatever methodology used adhered to the ethos of the philosophies underpinning the methodology. Contribution made to scholarship: The articles come from individual researchers and each article in the proceedings is unique. Mostly, there is no general argument leading from one contribution to the next. However, it is interesting to note that in the area of economic performance it was evident that real exchange rate and net foreign direct investment contribute more towards innovations in economic growth. With regard to human capital development, papers presented evidence that there exists a definite need to explore the phenomenon of personal branding as limited scientific academic research has been done within the field of personal branding or on elements of the topic. Thus, the outcome argues that personal branding has an influence on leadership style which in turn impacts on organisational performance and related hygiene factors. Furthermore, it was demonstrated that current methods or strategies for enforcing institutionalisation of knowledge sharing within an organisation have not been successful, and, as such, new strategies are needed to reinforce efforts to nurture and invigorate the institutionalisation of knowledge sharing within an organisation. With regard to technology and big data impact on

Download Free Project Management Managerial Process 5th Edition Bing

organisational performance, it was evident that system performance, memory consumption and CPU utilisation can be used as criteria to compare and evaluate big data technologies to improve organisational performance. Most of the articles' contribution reemphasised technology education and training as a means of digitising business and improving effectiveness. Target audience: The target readership is academic researchers and business leaders who require access to the latest developments in the fields of economics, information management, business, education, development studies, social sciences and technology. It is also for policymakers and other stakeholders who need a better understanding of the impact of new developments on existing policies and regulations for their review or amendment.
