Simplified Chinese edition of Frindle. A 5th grader named Nick is a little on the enterprising side mixed with mischievous, and the love for pushing his limits. To irk his tough teacher, he invented a word "frindle," and convinced everyone this is a real word. Years later when the word made it into the dictionary, Nick discovered that his teacher was secretly rooting for and helping him. Distributed by Tsai Fong Books, Inc.

Numerous studies have pointed to the key role of complement in the pathogenesis of retinal disease, particularly age-related macular degeneration (AMD). Reports about new gene associations and links to other physiological pathways are emerging almost on a weekly base. Several promising clinical candidates covering a wide area of potential treatment applications are in the pipelines of both industrial and academic groups. This indicates an increasing interest in complement as a therapeutic target. In view of these exciting discoveries, scientists from around the world convened at the

First Aegean Conferences Conference on Inflammation and Retinal Disease: Complement Biology and Pathology (June 10–17, 2007) in Crete, Greece, to discuss recent advances in this rapidly-evolving field. This volume represents a collection of topics on the functions of complement in eye diseases, pathophysiology, protein structures, and complement therapeutics discussed during the conference. Our sincere thanks to the contributing authors for the time and effort they have devoted to writing what I consider exceptionally informative chapters in a book that will have a significant impact on the complement field. We would also like to express my thanks to Rodanthi Lambris for her assistance in collating the chapters and preparing the documents for publication and I gratefully acknowledge the generous help provided by Dimitrios Lambris in managing the organization of this meeting. Finally, I also thank Andrea Macaluso of Springer Publishers for her supervision in this book's production. John D. Lambris Anthony P.
