Manipulation has been around for a long time, and it is not a new or imaginary concept. Understanding what the art of persuasion is really about is vital to help you deal with it. We like to believe that we are individuals who make sensible choices. We do not always have full control of our life journey, and we don't always realize this. As children, we are influenced by our parents and have little control over how we are raised. Once in the education system, teachers will tell us all about the social norms and what is expected of us in society. As adults, we are lured in by politicians trying to get their share of votes. This gives such power to politicians, and their decisions will affect our lives. As for commerce, companies can persuade customers to buy their goods and services. Are we really in control of our lives, or are we merely influenced by those who know all the persuasion tricks? In this book, we will look briefly at the psychology of manipulation. This allows us to see where it might occur in our lives. It will also allow you to identify those who might attempt to manipulate you. It is not only about people who like to dominate. Manipulation starts with understanding someone's personality. If you are interested in this important life process, then you should read this book. Manipulation can simply mean instilling fear. While manipulation might be easier, it is going to cause a lot of more difficult things in the end that you will have to clean up afterwards! There are common types of manipulators out there and you might be able to sense this personality trait in another person right away. Similarly, you will also recognize that there are hidden qualities that won't always emerge at first. Not all manipulative behaviors presented by an individual indicates that she is a malicious person. Having manipulative parents or long-term partners can rub off on our behavior, so we might sometimes say and do things that aren't meant to be manipulative but can come off that way. Always look at intention when determining if someone is really being manipulative or not. Body language can play a huge role in how someone will be perceived. You can start to see persuasive body language in others more often than you did before as soon as you become aware of what this kind of body language looks like. Ensure you are aware of your own body language as well so as not to be manipulated by others. This book reveals that manipulation is generally a way for a person to get the things that they desire most. We all have basic human needs and instincts that drive our behavior. If we are not careful with how we go about getting these things, we can hurt others. The more equipped we are with the skills needed for positive influence, the easier it will be to achieve our deepest desires in a healthy way that benefits many. To continue to grow your level of influence, remember that it starts with small moments of persuasion. Don't tell people what to do, encourage them from personal experience and stories learned from others. Don't try and trick someone into doing the things they don't want to do. Be honest with reward and consequence so that they can properly make the decision for themselves. While it might be hard to do the right thing in times where what is easiest will also benefit you the most, remember to be empathetic towards others. Though it might be challenging, you will still ultimately get the things you desire most when you are doing so in a fair and rewarding way. This book gives a comprehensive guide on the following: What is manipulation and how does it work? Historical background Manipulation and the question of morality Managing situations and emotions Emotional manipulation How to modify your behavior Difference between manipulation and persuasion Mind control Victims of manipulation Common traits of a manipulator How to manipulate people Subliminal psychology Manipulation in relationship 10 tips how to deal with manipulative people... Are you looking for an effective way to manipulate any human being? Then keep reading... What is the first thing that comes to mind when you hear of the term manipulation? For many people, manipulation is a faraway phenomenon that happens to other people, and not to themselves. It is highly unlikely that you will be going about your day thinking about manipulation or worrying that others are manipulating you. Yet the truth of the matter is, manipulation is everywhere around us. It is in sales adverts that try to entice you to buy something that you do not need by convincing you that you do need it. It is in the puppy eyes of a lover or child trying to get something out of you. Manipulation is also at play when a passenger is trying to charm a flight attendant into getting a first-class upgrade. In short, manipulation is everywhere in your daily life. There are several ways you can use to get people to proceed the way you desire or require them to. You have to know their true yearnings, then reverse this towards the goal you want to achieve. Manipulation is more of a psychological scheme since it aims at changing the thought process of an individual through indirect and underhanded tactics. If the manipulator advances his or her interests, then such tactics are considered as manipulative and devious. It has been established that men are easily manipulated through mastery and the individuality accompanying improvement since all they want is perfectionism. On the other hand, women tend to have balanced life relationships with their families and friends. Therefore, overpowering influences on precise interactions create a scorching longing to bring it up. In simple terms, this means that while women lean towards balance, men lean towards their emphasis on fastidiousness. The point here is that when it comes to manipulation, context really matters. While the above definitions of manipulation are all correct and self-explanatory, psychological manipulation is the main focus of this book. To borrow from our earlier definition, psychological manipulation is the ability to manage and utilize people's minds or psyche skillfully. This book covers the following: What Is Manipulation How To Manipulate Your Mind And Others With NLP The Power Of Persuasion Signs of a Manipulative partner or spouse Non-Verbal Communication Mind Control Techniques Combining Hypnosis and NLP in Communication Deception Advanced Manipulation Methods: Love Bombing, Foot-In-The-Door, NLP Mirroring Combatting Manipulation.....AND MORE!!!
