Quintilian, born in Spain about 35 CE, became a widely known and highly successful teacher of rhetoric in Rome. The Orator's Education (Institutio Oratoria), a comprehensive training program in twelve books, draws on his own rich experience. It is a work of enduring importance, not only for its insights on oratory, but for the picture it paints of education and social attitudes in the Roman world. Quintilian offers both general and specific advice. He gives guidelines for proper schooling (beginning with the young boy); analyzes the structure of speeches; recommends devices that will engage listeners and appeal to their emotions; reviews a wide range of Greek and Latin authors of use to the orator; and counsels on memory, delivery, and gestures. Donald Russell's new five-volume Loeb Classical Library edition of The Orator's Education, which replaces an eighty-year-old translation by H. E. Butler, provides a text and facing translation fully up to date in light of current scholarship and well tuned to today's taste. Russell also provides unusually rich explanatory notes, which enable full appreciation of this central work in the history of rhetoric.

An edition, with a new Latin text and full commentary, of Book 2 of Quintilian's Education of the Orator. Education and the conceptualization of technical disciplines are now focal points of research into Graeco-Roman antiquity, and Quintilian's work is central to both areas. Following the treatment of elementary education in Book 1, Quintilian proceeds to the discussion of the second stage of instruction, provided by the teacher of rhetoric. He gives important insights into the way teaching was conducted in a rhetorical school in Rome in the first century AD, and discusses the various elementary rhetorical exercises one by one. The second half of the book is concerned with Quintilian's theoretical conception of rhetoric. Rhetoric is seen as an 'art', a technical discipline grounded in rules and organized like medicine or seafaring, and - less obviously - as a virtue. The section as a whole provides an argument for Quintilian's celebrated claim that the perfect orator is 'a good man, skilled in speaking'.

Quintilian was born in Spain about A.D. 35; he became a well-known and prosperous teacher of rhetoric in Rome, probably the first to receive a salary as such from public funds. His Institutio Oratoria (Training of an Orator), a comprehensive training program in twelve books, draws on his own rich experience. Here Quintilian gives guidelines for proper schooling (beginning with the young boy); analyzes the structure of speeches and recommends devices for engaging listeners and appealing to their emotions; reviews a wide range of Greek and Latin authors of use to the orator; and counsels on memory, delivery, and gestures. This practical guide, in lucid style, provides valuable insight on Roman education. The work also yields many a memorable comment on the styles of various writers.

This is the first single-volume English translation of the "Institutio Oratoria," a treatise on all stages of the orator's education that was written in Latin under the emperor Domitian (81-96 CE) by the Roman rhetorician and teacher Marcus Fabius Quintilianus, commonly known as Quintilian. In the course of twelve books Quintilian discusses the education of young children, rhetorical theory (including discussion of invention of arguments, arrangement, style, memory, and performance), literary criticism and history, gesture, rhythm, the ethics of persuasion, and much more. It is a treatise that has had a profound influence on education from Late Antiquity through the Renaissance and into the present day. This translation is based on that of the Rev. John Selby Watson, originally published in 1856 in two volumes and now in the public domain. For this edition the editors have updated Watson's widely admired and already very readable translation to reflect 21st century usage. Several other editions of Watson's translation of Quintilian's "Institutes" are available, but these are unrevised scans (often of low quality) of out-of-copyright editions and usually include only half the work, even if the title states "in twelve volumes" (this designation is copied from the title page to Watson's original edition in two volumes). This completely re-typeset edition is the only edition of Watson's translation to include Quintilian's complete text in one volume.

Institutes of OratoryOr, Education of an Orator

A contemporary approach to a classic text from one of ancient Rome's master educators Quintilian on the Teaching of Speaking and Writing offers scholars and students insights into the pedagogies of Marcus Fabius Quintilianus (ca. CE 35-ca. CE 95), one of Rome's most famous teachers of rhetoric. Providing translations of three key sections from Quintilian's important and influential *Institutio oratoria* (Education of the Orator), this volume outlines the systematic educational processes that Quintilian inherited from the Greeks, foregrounding his rationale for rhetorical education based on the interrelationship between reading, speaking, listening, and writing, and emphasizing the blending of moral purpose and artistic skill. A contemporary approach to one of the most influential educational work in the history of Western culture, this book provides access not only to translations of key sections of Quintilian's educational program but also a robust contemporary framework for the training of humane and effective citizens through the teaching of speaking and writing.
