

Racconti Del Fabbronnatale Le Avventure Magiche Di Enzino Un Regalo Di Natale Da Parte Di Mamma Pap E Vittoria

Tommaso, soprannominato «Tommi», nato lunedì 21 agosto 2006, è un bel ragazzo con gli occhi neri e i capelli neri. Il giorno 23 dicembre 2015, all'età di 9 anni, mentre sta giocando nel parco della sua città, insieme ai suoi amici Claudio, Gaia e Alice, trova una strana scopa nascosta fra i cespugli. Una scopa volante che da Guidonia, sorvolando magicamente verdi colline, alcuni graziosi borghi medievali italiani e la campagna romana, porta i quattro ragazzi a Follettopoli, un antico villaggio fatato nel centro dell'Italia, vicino Roma. Riuscirà Tommaso, con l'aiuto dei suoi amici e di HI-HO, a risolvere l'enigma del Burlon Folletto, dare una mano a Babbo Natale alle prese con una renna innamorata e ad aiutare la Befana bloccata dalla scopa massaia?

"Un regalo di Natale diverso. Un libro di avventure personalizzate che è possibile ordinare, compilando un breve questionario su www.fabbroscivano.com. Dopo qualche giorno sarà disponibile per l'acquisto direttamente sul sito di Amazon. Testi: Fabrizio Manili. Copertina e illustrazioni: Lea Cavallari. Edizione a cura di Florestano Fenizia-----Davide, soprannominato «Daviduccio», nato venerdì 3 agosto 2007, è un bel bambino con gli occhi marroni e i capelli castani. Il giorno 23 dicembre 2014, all'età di 7 anni, mentre sta giocando nel parco della sua città, insieme a Francio, Giulio e Stefano, trova una strana scopa nascosta fra i cespugli. Una scopa volante che da Napoli, sorvolando magicamente verdi colline, alcuni graziosi borghi medievali italiani e la campagna romana, atterra a Follettopoli, un antico villaggio fatato nel centro dell'Italia, vicino Roma. Riuscirà Davide, con l'aiuto di Stefano, Francio, Giulio a risolvere l'enigma del Burlon Folletto, dare una mano a Babbo Natale alle prese con una renna innamorata e ad aiutare la Befana bloccata dalla scopa massaia?"

Eve dared. . . Eve, with passion that overruled her total innocence, ran away from home to live in unrepentant sin; won stardom singing on the stage of the Parisian music halls before Worlds War I; married into the world of international diplomacy; and become the greatest lady Champagne. Eve's younger daughter, Freddy, inherited all of her mother's recklessness. Growing up in California, she became a pilot by sixteen; throughout World War II she ferried war planes in Britain--a glorious redhead who captured men with one humorous, challenging glance. Eve's elder daughter, Delphine, exquisite, gifted, and wild, romped through the nightlife of Hollywood of the thirties. On a whim, she made a screen test in Paris and soon found herself a great star of French films. She chose to risk her life in occupied France because of a love that transformed her frivolity into courage.

The brooding grey walls of the Tower of London circumscribe one of the most recognisable buildings on the planet. Over its thousand-year history the Tower stood as a symbol of the English monarchy and served as both a palace and a prison. It is a place where court intrigues, clandestine liaisons, unimaginable tortures and grisly executions took place with frightening regularity. Tales from the Tower of London is the factual history of the great building itself told through the true stories of the people, royal and common, good and bad, heroes and villains, who lived and died there. Including characters such as William the Conqueror, the Princes in the Tower, Jane Grey, Guy Fawkes, Colonel Blood and Rudolf Hess, the broad range of stories encompassed in Tales from the Tower of London present a microcosm of all human experience, from love and death to greed and betrayal, all played out against romantic period settings ranging from medieval knights in shining armour to the darkest days of World War II. Anyone who loves history and adventure will find Tales from the Tower of London a classic page turner.

"The first English translation of what has long been considered a classic in Europe...it is easy to see why the work has been held in such esteem abroad."—The New Yorker THE word 'revolution' may mean either the forcible overthrow of an established social or political order or any great change brought about in a pre-existing situation, even slowly and without violence. The word can be used in both senses for the upheaval that took place in France towards the end of the eighteenth century. In so far as it consisted in the violent destruction of the feudal and monarchical régime, the French Revolution may be said to have come to an end on September 21st, 1792, when the monarchy was formally abolished. But as the creation of a new social and political order it continued until the coup d'état of Brumaire, indeed, up to the time of the Consulate for Life, when nineteenth-century France appeared finally constituted. This book is concerned with the French Revolution as understood in the first sense. Its aim is to explain why and in what way the feudal monarchy was destroyed. In this endeavour it has been necessary to present the four revolutionary years in relation to a complex system of cause and effect the origins of which must be traced to former times, often centuries before the Revolution itself. A considerable part of the book, therefore, is devoted to social conditions, ideas and events chronologically remote from, but logically bound up with, the revolutionary period. The author's aim has been, not to bring new facts to light, but simply to put before his readers, in a rapid synthesis, the conclusions he has reached in the course of extensive study of the subject.

In the bestselling literary tradition of Lewis Thomas's *Lives of a Cell* and James Watson's *The Double Helix*, *Poetry of the Universe* is a delightful and compelling narrative charting the evolution of mathematical ideas that have helped to illuminate the nature of the observable universe. In a richly anecdotal fashion, the book explores the leaps of imagination and vision in mathematics that have helped pioneer our understanding of the world around us.

Gearing up for the AP Chemistry exam? AP Chemistry For Dummies is packed with all the resources and help you need to do your very best. This AP Chemistry study guide gives you winning test-taking tips, multiple-choice strategies, and topic guidelines, as well as great advice on optimizing your study time and hitting the top of your game on test day. This user-friendly guide helps you prepare without perspiration by developing a pre-test plan, organizing your study time, and getting the most out of your AP course. You'll get help understanding atomic structure and bonding, grasping atomic geometry, understanding how colliding particles produce states, and much more. Two full-length practice exams help you build your confidence, get comfortable with test formats, identify your strengths and weaknesses, and focus your studies. Discover how to Create and follow a pretest plan Understand everything you must know about the exam Develop a multiple-choice strategy Figure out displacement, combustion, and acid-base reactions Get familiar with stoichiometry Describe patterns and predict properties Get a handle on organic chemistry nomenclature Know your way around laboratory concepts, tasks, equipment, and safety Analyze laboratory data Use practice exams to maximize your score AP Chemistry For Dummies gives you the support, confidence, and test-taking know-how you need to demonstrate your ability when it matters most.

Content-based image retrieval is the set of techniques for retrieving relevant images from an image database on the basis of automatically derived image features. The need for efficient content-based image retrieval has increased tremendously in many application areas such as biomedicine, the military, commerce, education, and Web image classification and searching. In the

biomedical domain, content-based image retrieval can be used in patient digital libraries, clinical diagnosis, searching of 2-D electrophoresis gels, and pathology slides. I started my work on content-based image retrieval in 1995 when I was with Stanford University. The project was initiated by the Stanford University Libraries and later funded by a research grant from the National Science Foundation. The goal was to design and implement a computer system capable of indexing and retrieving large collections of digitized multimedia data available in the libraries based on the media contents. At the time, it seemed reasonable to me that I should discover the solution to the image retrieval problem during the project. Experience has certainly demonstrated how far we are as yet from solving this basic problem.

What happens on and after December 21, 2012? There has been much confusion and many predictions based on the Mayan calendar. Some people think time on Earth will end, but what if there was an intact and complete resource from the ancestors that will give us the wisdom we need for the shift and an understanding of the coming era? In "2012-2021: The Dawn of the Sixth Sun," Sergio Magana (Ocelocoyotl), mystic and teacher of the ancient Toltec/Aztec lineage of Mesoamerica, discloses an in-depth understanding from a rich and uninterrupted oral tradition, the meaning of the shift from the Fifth to the Sixth Sun, the possibilities presented to humanity at this time, and ancient teachings and practices designed to support this shift. The Toltecs knew how to interpret the mathematical or universal order that governs all of existence by measuring and observing cycles of time, and the impact they had on the Earth, human consciousness, and perception.

"Un regalo di Natale diverso. Un libro di avventure personalizzate che è possibile ordinare, compilando un breve questionario su www.fabbroscivano.com. Dopo qualche giorno sarà disponibile per l'acquisto direttamente sul sito di Amazon. Testi: Fabrizio Manili. Copertina e illustrazioni: Lea Cavallari. Edizione a cura di Florestano Fenizia-----Margherita, soprannominata «Marghe», nata giovedì 8 marzo 2012, è una bella bambina con gli occhi marroni e i capelli castani. Il giorno 23 dicembre 2015, all'età di 3 anni, mentre sta giocando nel parco della sua città, insieme a Rebecca, Giovanni e Sofia, trova una strana scopa nascosta fra i cespugli. Una scopa volante che da Roma, sorvolando magicamente verdi colline, alcuni graziosi borghi medievali italiani e la campagna romana, atterra a Follettopoli, un antico villaggio fatato nel centro dell'Italia, vicino Roma. Il giorno 23 dicembre 2015, all'età di 5 anni, mentre sta giocando nel parco della sua città, insieme a Max, Martina e Ruben, trova una strana scopa nascosta fra i cespugli. Una scopa volante che da Bolzano, sorvolando magicamente verdi colline, alcuni graziosi borghi medievali italiani e la campagna romana, atterra a Follettopoli, un antico villaggio fatato nel centro dell'Italia, vicino Roma. Riuscirà Thomas, con l'aiuto di Ruben, Max, Martina e di Oliver, a risolvere l'enigma del Burlon Folletto, dare una mano a Babbo Natale alle prese con una renna innamorata e ad aiutare la Befana bloccata dalla scopa massaia?"

Stress. Everyone is talking about it, suffering from it, trying desperately to manage it-now more than ever. From 1970 to 1980, 2,326 academic articles appeared with the word "stress" in the title. In the decade between 2000 and 2010 that number jumped to 21,750. Has life become ten times more stressful, or is it the stress concept itself that has grown exponentially over the past 40 years? In *One Nation Under Stress*, Dana Becker argues that our national infatuation with the therapeutic culture has created a middle-class moral imperative to manage the tensions of daily life by turning inward, ignoring the social and political realities that underlie those tensions. Becker shows that although stress is often associated with conditions over which people have little control-workplace policies unfavorable to family life, increasing economic inequality, war in the age of terrorism-the stress concept focuses most of our attention on how individuals react to stress. A proliferation of self-help books and dire medical warnings about the negative effects of stress on our physical and emotional health all place the responsibility for alleviating stress-though yoga, deep breathing, better diet, etc.-squarely on the individual. The stress concept has come of age in a period of tectonic social and political shifts. Nevertheless, we persist in the all-American belief that we can meet these changes by re-engineering ourselves rather than tackling the root causes of stress. Examining both research and popular representations of stress in cultural terms, Becker traces the evolution of the social uses of the stress concept as it has been transformed into an all-purpose vehicle for defining, expressing, and containing middle-class anxieties about upheavals in American society.

Leading experts give an overview of very low frequency radio astronomy. They present for the first time in a single conference the astrophysical need for and possible instrumentation for implementing ground-based, ground-to-space, space-based, and lunar-based observations. The papers cover a wide range of topics such as solar astronomy, planetary science, supernova remnants, pulsars, interstellar thermal material, interstellar plasma refraction and diffraction, cosmic rays, extragalactic radio galaxies and quasars, ancient "fossil" radio sources, and new, coherent emission mechanisms.

Many philosophers including Aquinas, Locke, Schopenhauer, and Kant have assumed that there is a link between cruelty to animals and violence to people. During the last 40 years, evidence for this view has steadily accumulated as a result of statistical analysis. In these stories we meet more of Amy Bloom's irresistible characters: a woman recovering from cancer while her best friend and husband face their loneliness and a new friendship; a mother coming to know that her wonderful little girl is a boy; a man and his stepmother in a complicated dance of memory, anger and forgiveness. These are stories on the frontiers of emotions, stories about the uncertain gestures of love, the betrayals of the flesh and the surprises of the heart. 'Connectedness, or the lack of it, is the theme of nearly all the stories . . . They are small masterpieces' Sunday Times 'Amy Bloom gets more meaning into individual sentences than most authors manage in whole books' New Yorker 'Any new book by Amy Bloom is a cause for celebration and this fabulously titled collection of stories is no exception... Bloom, already hailed as one of the best short story writers of her generation, is wickedly knowing with the sort of perfectly paced writing which can blow the reader away with the tiniest detail' The Times

Racconti Del FabbroNatale. Le Avventure Magiche Di Daviduccio... è un Regalo Di Natale Da Parte Di Giulio

"Un regalo di Natale diverso. Un libro di avventure personalizzate che è possibile ordinare, compilando un breve questionario su www.fabbroscrivano.com. Berlin's letters are marvellously accessible, and as entertaining. During the two decades covered here his personality and career grow and bloom. In America, during the war, he writes a regular telegram to his anxious parents, often saying just 'Flourishing'; the word fits not only his wartime experience, but the whole of his early life, vividly displayed in this book in all its multi-faceted delightfulness.

This book will be a revelation for you, here you will find all you have never read in a botanic or a gardening book, all you have never known - and never suspected - about seeds, herbs, flowers, vegetables, fruits, trees. The author tells their legendary origins, he recalls and recycles, for a large audience, episodes of the classic mythology, religious beliefs of the past, literary texts and traditions of ancient populations. You will discover that the first ones "tied like ivy" were the Etruscan pirates; that the aroma of the coffee was appreciated for the first time by goats not by men; that the pashas took the idea for their harems from the loves of the date palms; that Marathon, where Miltiades defied the Persians in a memorable battle, derived its name from a field of fennels. You will discover that in the history of plants green is not the predominant color. On the contrary, sometimes it is a noir... when it is not about a red light story! 1st edition: October 2003. 2nd edition: October 2007. 3rd edition: May 2020.

A tour of evolution's most inventive—and essential—creations: animal genitalia Forget opposable thumbs and canine teeth: the largest anatomical differences between humans and chimps are found below the belt. In Nature's Nether Regions, ecologist and evolutionary biologist Menno Schilthuizen invites readers to discover the wondrous diversity of animalian reproductive organs. Schilthuizen packs this delightful read with astonishing scientific insights while maintaining an absorbing narrative style reminiscent of Mary Roach and Jerry Coyne. With illustrations throughout and vivid field anecdotes—among them laser surgery on a fruit fly's privates and a snail orgy—Nature's Nether Regions is a celebration of life in all shapes and sizes.

"Un regalo di Natale diverso. Un libro di avventure personalizzate che è possibile ordinare, compilando un breve questionario su www.fabbroscrivano.com. Edizione a cura di Florestano Fenizia-----Lorenzo, soprannominato «Enzino», nato venerdì 25 gennaio 2008, è un bel bambino con gli occhi azzurri e i capelli castani. Il giorno 23 dicembre 2014, all'età di 6 anni, mentre sta giocando nel parco della sua città, insieme a Andrea, Antonio e Marco, trova una strana scopa nascosta fra i cespugli. Una scopa volante che da Roma, sorvolando magicamente verdi colline, alcuni graziosi borghi medievali italiani e la campagna romana, atterra a Follettopoli, un antico villaggio fatato nel centro dell'Italia, vicino Roma. Riuscirà Lorenzo, con l'aiuto di Marco, Andrea, Antonio e di Pinocchio, a risolvere l'enigma del Burlon Folletto, dare una mano a Babbo Natale alle prese con una renna innamorata e ad aiutare la Befana bloccata dalla scopa massaia?"

Charles II was thirty when he crossed the Channel in fine May weather in 1660. His Restoration was greeted with maypoles and bonfires, like spring after long years of Cromwell's rule. But there was no going back, no way he could 'restore' the old. Certainty had vanished. The divinity of kingship fled with his father's beheading. 'Honour' was now a word tossed around in duels. 'Providence' could no longer be trusted. As the country was rocked by plague, fire and war, people searched for new ideas by which to live. Exactly ten years later Charles II would stand again on the shore at Dover, laying the greatest bet of his life in a secret deal with his cousin, Louis XIV. The Restoration decade was one of experiment: from the science of the Royal Society to the startling role of credit and risk, from the shocking licence of the court to the failed attempts at toleration of different beliefs. Negotiating all these, Charles II, the 'slippery sovereign', played odds and took chances, dissembling and manipulating his followers. The theatres were restored, but the king was the supreme actor. Yet while his grandeur, his court and his colourful sex life were on display, his true intentions lay hidden. A Gambling Man is a portrait of Charles II, exploring his elusive nature through the lens of these ten vital years - and a portrait of a vibrant, violent, pulsing world, racked with plague, fire and war, in which the risks the king took forged the fate of the nation, on the brink of the modern world.

Fundamentals of Codes, Graphs, and Iterative Decoding is an explanation of how to introduce local connectivity, and how to exploit simple structural descriptions. Chapter 1 provides an overview of Shannon theory and the basic tools of complexity theory, communication theory, and bounds on code construction. Chapters 2 - 4 provide an overview of "classical" error control coding, with an introduction to abstract algebra, and block and convolutional codes. Chapters 5 - 9 then proceed to systematically develop the key research results of the 1990s and early 2000s with an introduction to graph theory, followed by chapters on algorithms on graphs, turbo error control, low density parity check codes, and low density generator codes.

Presents a biography of the young Korean woman who is breaking records on America's professional golf tour.

In this important book, you will learn: - The problems associated with NDE research - The religious impact of NDEs - The difference between Mormon NDEs and other NDEs - Why the LDS community has an inordinate interest in NDEs They Saw

Beyond Death will change the way you view death and help you look forward to the next life with faith and hope. By the author of Fingerprints of God: Evidences from Near-Death Studies, Scientific Research on Creation, and Mormon Theology.

Plentiful, diverse, and readily available, these animals—known in science as “herps”—are also perfect for teaching students about biology, ecology, and conservation. This highly readable resource melds rigorous science content with science research.

Ahoy, mateys! Set sail for fun and adventure on a pirate ship full of puppies. It's hide-and-seek . . . with a sea monster?! The puppy pirates are embarking on a quest to find a mysterious monster far out at sea. This epic adventure takes bravery and smarts—and no one suspects that their quiet new crewmate, Einstein, could be the hero of the day. But then again, you can't judge a pup by his fur!

"Un regalo di Natale diverso. Un libro di avventure personalizzate che è possibile ordinare, compilando un breve questionario su www.fabbroscivano.com. The first edition of Darryl Cunningham's Science Tales was published in 2012 and shortlisted for the British Comi Awards 'Best Book'. This new edition has been updated to include a clinical exposé of hydraulic fracturing, or fracking, and its political framework in the UK and USA. A graphic milestone of investigative reporting, Cunningham's essays explode the lies, hoaxes and scams of popular science, debunking media myths and decoding some of today's most fiercely-debated issues: climate change, electroconvulsive therapy, the moon landing, the MMR (Measles, Mumps and Rubella) vaccine, homeopathy, chiropractic, evolution, science denialism and, new for this edition, fracking. Thoroughly researched and sourced, Cunningham's clear narrative, graphic lines and photographic illustration explain complicated and controversial issues with deceptive ease.

Mussolini's march on Rome; Hitler's speeches before waves of goose-stepping storm troopers; the horrors of the Holocaust; burning crosses and neo-Nazi skinhead hooligans. Few words are as evocative, and even fewer ideologies as pernicious, as fascism. And yet, the world continues to witness the success of political parties in countries such as Italy, France, Austria, Russia, and elsewhere resembling in various ways historical fascism. Why, despite its past, are people still attracted to fascism? Will it ever again be a major political force in the world? Where in the world is it most likely to erupt next? In *Fascism: Past, Present, and Future*, renowned historian Walter Laqueur illuminates the fascist phenomenon, from the emergence of Hitler and Mussolini, to Vladimir Zhirinovskiy and his cohorts, to fascism's not so distant future. Laqueur describes how fascism's early achievements--the rise of Germany and Italy as leading powers in Europe, a reputation for being concerned about the fate of common people, the creation of more leisure for workers--won many converts. But what successes early fascist parties can claim, Laqueur points out, are certainly overwhelmed by its disasters: Hitler may have built the Autobahnen, but he also launched the war that destroyed them. Nevertheless, despite the Axis defeat, fascism was not forgotten: Laqueur tellingly uncovers contemporary adaptations of fascist tactics and strategies in the French ultra-nationalist Le Pen, the rise of skinheads and right-wing extremism, and Holocaust denial. He shows how single issues--such as immigrants and, more remarkably, the environment--have proven fruitful rallying points for neo-fascist protest movements. But he also reveals that European fascism has failed to attract broad and sustained support. Indeed, while skinhead bands like the "Klansman" and magazines such as "Zyklon B" grab headlines, fascism bereft of military force and war is at most fascism on the defense, promising to save Europe from an invasion of foreigners without offering a concrete future. Laqueur warns, however, that an increase in "clerical" fascism--such as the confluence of fascism and radical, Islamic fundamentalism--may come to dominate in parts of the Middle East and North Africa. The reason has little to do with religion: "Underneath the 'Holy Rage' is frustration and old-fashioned class struggle." Fascism was always a movement of protest and discontent, and there is in the contemporary world a great reservoir of protest. Among the likely candidates, Laqueur singles out certain parts of Eastern Europe and the Third World. In carefully plotting fascism's past, present, and future, Walter Laqueur offers a riveting, if sometimes disturbing, account of one of the twentieth century's most baneful political ideas, in a book that is both a masterly survey of the roots, the ideas, and the practices of fascism and an assessment of its prospects in the contemporary world.

The Third Eye provides a detailed and practical exposition of one of the most important but least documented skills required of those practising in the expanding discipline of group analysis. The relevance of the material, which is contributed from the dual perspective of both experienced practitioner and inexperienced trainee, extends far beyond its field of origin. It will be of significant interest to a wide readership of all those concerned with the training assessment and development of others working with groups. Terms such as "expanding Universe", "big bang", and "initial singularity", are nowadays part of our common language. The idea that the Universe we observe today originated from an enormous explosion (big bang) is now well known and widely accepted, at all levels, in modern popular culture. But what happens to the Universe before the big bang? And would it make any sense at all to ask such a question? In fact, recent progress in theoretical physics, and in particular in String Theory, suggests answers to the above questions, providing us with mathematical tools able in principle to reconstruct the history of the Universe even for times before the big bang. In the emerging cosmological scenario the Universe, at the epoch of the big bang, instead of being a "new born baby" was actually a rather "aged" creature in the middle of its possibly infinitely enduring evolution. The aim of this book is to convey this picture in non-technical language accessible also to non-specialists. The author, himself a leading cosmologist, draws attention to ongoing and future observations that might reveal relics of an era before the big bang.

Stink takes a star turn—and helps stave off cosmic calamity—in a new Judy Moody & Friends adventure just right for newly independent readers. Look up! Look out! A comet is coming, a comet is coming! Stink is camped out in the backyard with his sister, Judy, and he can't wait to lay eyes on P/2015 OZ4, also known as the Sherman-Holm Comet. But then news of an asteroid hitting Russia reaches Stink, and suddenly he's feeling squeamish (and squash-ish) about close encounters of the outer-space kind. Will donning an aluminum-foil cape and building a bunker in the basement help keep him safe? Can this fearless Asteroid Boy save Earth from disaster?

State of the World 2005 takes a new and deeper look at the theme that has dominated international politics since 9/11: security.

Not the armed conflicts that occur when it breaks down, but the underlying social, economic and environmental pressures which determine how threatened and vulnerable people feel. These include food, water, other natural resources, exposure to environmental change and health threats. Without equitable and sustainable management of these conditions, lasting security cannot be achieved. The result is a fascinating and illuminating volume that offers a new definition of security and the means to achieve it. [Published annually in 28 languages, each edition draws on the breadth of expertise of the Worldwatch Institute's team of writers and researchers. State of the World is relied upon by national governments, UN agencies, development workers and law-makers for its authoritative and up-to-the-minute analysis and information. It is essential for anyone concerned with building a positive, global future.]

Venice has always been a bustling trade city. Its cuisine is the most profound expression of a territorial identity and was not immune to contaminations by other cultures. The need to preserve food during long sea journeys and strong links with the Far East--the origin of the city's imported spices--generated recipes with unexpected flavours. Nonetheless, the flavour of Venetian dishes reveals something more than its commercial past. To discover its complexities you must sail to the lagoon's islands, where the restaurants offer authentic traditional Venetian cuisine. VENEZIA IN CUCINA captures the essence and inspiration of many of those native Venetian dishes, including everything from antipasti and entrees to wine pairings and delectable desserts.

Island Southeast Asia as a canvas for human migration -- Homo Erectus and Homo Floresiensis: archaic hominins in Island Southeast Asia -- The biological history of Homo Sapiens in Island Southeast Asia -- Late Paleolithic archaeology in Island Southeast Asia -- The early history of the Austronesian language family in Island Southeast Asia -- Neolithic farmers and sailors in Southern China, Taiwan and the Philippines -- The Neolithic of East Malaysia and Indonesia -- The early metal age and intercultural connections in Island Southeast Asia -- Island Southeast Asian prehistory: a comparative perspective

A renowned chef invites a mysterious man to his last majestic dinner... A fearless fisherman faces the most dangerous challenge for any human being... A time traveller tries to save humanity's destiny... A young lawyer finds himself involved in a supernatural plot. "Stories from strange worlds" collects a series of fantastic tales, sometimes surreal and dark, which can lead the curious reader to travel, to smile and sometimes even to meditate on the complex dynamics of the human soul.

Alice, soprannominata «Ying Ying», nata venerdì 15 marzo 2013, è una bella bambina con gli occhi neri e i capelli neri. Il giorno 23 dicembre 2015, all'età di 2 anni, mentre sta giocando nel parco della sua città, insieme ai suoi amici Tommi, Adelaide e Sofia, trova una strana scopa nascosta fra i cespugli. Una scopa volante che da Guidonia, sorvolando magicamente verdi colline, alcuni graziosi borghi medievali italiani e la campagna romana, porta i quattro bambini a Follettopoli, un antico villaggio fatato nel centro dell'Italia, vicino Roma. Riuscirà Alice, con l'aiuto dei suoi amici e di Gou-Gou, a risolvere l'enigma del Burlon Folletto, dare una mano a Babbo Natale alle prese con una renna innamorata e ad aiutare la Befana bloccata dalla scopa massaia?
