

Rain On The Dead Sean Dillon 21 Jack Higgins

Undercover enforcer Sean Dillon tackles a new crisis as presidential skeletons threaten to burst from the closet. In the waning days of WW2, Hitler gave his diary to a young aide for safekeeping. Now it's threatening to resurface, with explosive contents. When a presidential visit to London is threatened by a fanatical mullah, Sean Dillon teams up with new intelligence recruit Sara Gideon, who discovers that the threat is linked to an even more menacing plot.

Rain Dogs, a stunning installment in the Sean Duffy thriller series, following the Edgar Award-nominated Gun Street Girl, is "another standout in a superior series" (Booklist). It's just the same things over and over again for Sean Duffy: riot duty, heartbreak, cases he can solve but never get to court. But what detective gets two locked-room mysteries in one career? When journalist Lily Bigelow is found dead in the courtyard of Carrickfergus Castle, it looks like a suicide. Yet there are a few things that bother Duffy just enough to keep the case file open, which is how he finds out that Bigelow was working on a devastating investigation of corruption and abuse at the highest levels of power in the UK and beyond. And so Duffy has two impossible problems on his desk: Who killed Lily Bigelow? And what were they trying to hide?

This work examines the waters of marine ports as unique integrated aquatic ecosystems. It regards marine ports as entities comprising components of natural and anthropogenic origin, including pelagic, periphytal and benthal subsystems. Using selected Black and Azov Sea ports as examples, the book discusses the hydrodynamics and water exchange, which are weakened in ports compared with open coastal zones. It reflects consequences of the presence of hydrobionts and the accumulation of organic matter, which are promoted by the variety of hard substrata and the absence of fishery. The book is divided into five main chapters. The first chapter describes the general characteristics of the marine ports at the northern coast of the Black and Azov Seas and their shipping channels. Chapters 2 to 4 discuss the main abiotic and biotic peculiarities of the pelagial, periphytal and benthal subsystems of those marine ports, and chapter 5 deals with tropho-dynamic processes in their ecosystems. A concluding section reflects recommendations how the ecosystems of ports in non-tidal seas may be ameliorated.
