"Maggie is earthy and real, full of love and knowledge, especially on raising sons." - Steve Biddulph "Maggie's perspective on raising boys is spot on. She writes with humor and depth, providing insight and strategies for many of the most important issues facing moms. There is a lovely ease to her writing and a powerful honesty. I hope every mother of a son (and everyone else!) will read this book. The future of the world, to a great extent, depends on how we raise our boys." - Michael Gurian, New York Times Bestselling Author of *The Wonder of Boys* and *Saving Our Sons* If we can see the world through boys' eyes a little better, we will make different choices in the way we mother them... and we will find them less confusing, and love them more deeply. Mothers of sons are worried about raising their boys in a world where negative images of masculinity are front and centre of our media, almost every day. Not only that, but statistically our boys are still struggling in many ways. Even though we live in a time where we recognise that nothing in gender is fixed, it remains a fact that the influence of a mother on her son is massive. A mother of four sons herself, Maggie Dent draws on her personal experience - and over four decades work as a teacher, counsellor and now author and speaker - to help build understanding, empathy and compassion for our boys. Maggie shares her five key secrets that every mum needs to know and uses the voices of men she has worked with and surveyed to reveal what really matters in a

Why does Britain and its former colonies send children to school as young as four and five, when in eighty-eight per cent of the world the starting age is six or seven? Sue Palmer, author of bestselling *Toxic Childhood*, uncovers the truth: it's not because of what's best for children, but historical accident and economics. Palmer examines research ranging from neurological science to educational data, and shows that under-sevens gain most -- educationally, physically, socially and psychologically -- from not being stuck behind a desk. Upstart puts forward a passionate case for Britain adopting a proper 'kindergarten' stage that recognises what under-sevens really need. With

clarity, ease and vigour, Palmer describes a different way of doing early years education that would have huge benefits both for individual children, and for our nation. 'A refreshingly healthy take on social media and particularly good on body image' Lorraine Candy, Sunday Times The teen years are tough - for teens and for parents. Many parents dread the moodiness, dishonesty, preference of friends over family, exam stress, and the push for greater independence. Mothers have a pivotal role to play; this is a guidebook for parents and mothers of girls in particular as they navigate the rocky teenage landscape with their daughters aged 8 to 18. It aims to help them embrace the potential of their child's teenage years by marking this time of growing maturity for girls and celebrating it with them. We celebrate birth, marriage and death, but this important life-transition from child to young adult is nowadays rarely acknowledged within an appropriate community. With mental health issues in young people on the rise, and social media, reality television and smartphone culture serving to exacerbate these problems, it is no surprise that parents are looking for help in raising their daughters through these tricky years. From Daughter to Woman is the indispensable guide to doing just that.
