analysis are all specifically and carefully devised throughout this book.

This textbook provides comprehensive yet concise coverage of all the topics covered in the new AQA GCSE Computer Science Specification 8520, written in a clear and understandable style with many in-text questions to test students' understanding of the material and their ability to apply it. This will be invaluable not only as a course textbook but also as a revision guide. Each of the eight sections cover one of the major topics in specification sections 3.1 - 3.7 for Paper 1 and Paper 2 of this course. Each subtopic contains sample examination questions from past examination papers, which can be set as homework. Answers to all these are available to teachers only, in a Teachers Supplement which can be ordered free from our website as a downloadable pack. This book has been approved by AQA.

This book is aimed at GCSE students. It provides comprehensive yet concise coverage of all the topics covered in the new AQA 8525 Computer Science specification, written and presented in a way that is accessible to teenagers. It will be invaluable both as a course text and as a revision guide for students nearing the end of their course. It is divided into nine sections covering every element of the specification. Sections 1, 2A and 2B of the textbook cover algorithms and programming concepts with a theoretical approach to provide students with experience of writing, tracing and debugging pseudocode solutions without the aid of a computer. These sections would complement practical programming experience.

Our Revision Workbooks help students develop vital skills throughout their course in preparation for the exam.
