

Robbins Basic Pathology With Student Consult Online Access 9e Robbins Pathology

Part of the trusted Robbins and Cotran family, Robbins Basic Pathology provides a readable, well-illustrated and concise overview of the principles of human pathology that's ideal for today's busy students. This thoroughly revised edition continues with a strong emphasis on pathogenesis and the clinical features of disease, adding new artwork and more schematic diagrams to further aid in summarizing key pathologic processes and expand the already impressive illustration program.

This book is open access under a CC BY 4.0 license.

This volume describes and explains the educational method of Case-Based Clinical Reasoning (CBCR) used successfully in medical schools to prepare students to think like doctors before they enter the clinical arena and become engaged in patient care. Although this approach poses the paradoxical problem of a lack of clinical experience that is so essential for building proficiency in clinical reasoning, CBCR is built on the premise that solving clinical problems involves the ability to reason about disease processes. This requires knowledge of anatomy and the working and pathology of organ systems, as well as the ability to regard patient problems as patterns and compare them with instances of illness scripts of patients the clinician has seen in the past and stored in memory. CBCR stimulates the development of early, rudimentary illness scripts through elaboration and

Read Book Robbins Basic Pathology With Student Consult Online Access 9e Robbins Pathology

systematic discussion of the courses of action from the initial presentation of the patient to the final steps of clinical management. The book combines general backgrounds of clinical reasoning education and assessment with a detailed elaboration of the CBCR method for application in any medical curriculum, either as a mandatory or as an elective course. It consists of three parts: a general introduction to clinical reasoning education, application of the CBCR method, and cases that can be used by educators to try out this method.

This is the story of how I unblocked my 90%+ blocked arteries in 2013. My cardiologist and Cardiac surgeon recommended open heart bypass surgery. I found the bypass surgery very invasive and feared that the blockages might recur. So, I scoured through the medical literature to find a solution which could reverse my heart blockages permanently. I found it! Basically the theory for my program was from the following four books and Dr Linus Pauling megavitamin C therapy concept. They are as follows: 1) "NO to Heart Diseases" by Dr Ignarro, Noble Prize for Medicine 1998 2) "Reversing Heart disease" by Dr Dean Ornish Strong Indian influence: Vegetarian food + Yoga 3) "Prevent and Reverse Heart Disease" by Dr Esselstyn : Vegan diet 4) "The China Study" by Dr Colin Campbell & Thomas Campbell. : Vegan diet Books 2,3 & 4 essentially talked about how a vegetarian diet can prevent and reverse heart diseases by itself. It did not mention L Arginine at all. Dr Ignarro did mention that a vegetarian diet helped but you could also indulge in a bit of meat/fish. He thought that L-Arginine could do the job by itself. For academic purity,

Read Book Robbins Basic Pathology With Student Consult Online Access 9e Robbins Pathology

they insisted on mutual exclusivity. My interest was to clear the blockages in my heart and not on academic purity. So I combined both their theories and come out with the WONG KAM LUEN'S Program for unblocking my 5 blocked arteries. The book detailed my agonising journey and the readings and tests I took along the journey. At the end, you could say that I have succeeded! The angiogram said so! I have also summarised my experiences and suggested a shorter way to achieve my results. From my results, you can surmise that within three months on my program, you will definitely see vast improvements on your blood pressure, lipid levels and general well being. I hope that you can learn something from my journey and achieve the same miracle for yourself.

“On 28th of February 2013, I was lying naked in the operating room at Mount Elizabeth hospital in Singapore. My cardiologist, Dr Ann Chan, was giving me an Angiogram. She discovered that five of my arteries were blocked. One was completely blocked while four others were at least 90% blocked. When she told me what she found, my heart sank. My whole world went upside down. The solution to my arterial blockages was a bypass operation. It was very invasive. It was a mechanical solution to my biological problem. A heart bypass solution would only give me temporary relieve but would not stop the arteries from becoming completely blocked and eventually for me to die. I was looking for a solution that would reverse my blockages. I found it! I combined the research findings of Dr Ignarro(LArginine), Dr Dean Ornish and Dr Caldwell B Esselstyn Jr(reversing heart

Read Book Robbins Basic Pathology With Student Consult Online Access 9e Robbins Pathology

Diseases) and came out with a program that could clear my blockages. After a year of following my program, my angiogram results showed that my blockages were reduced by about 20%. I could walk 7 km/day whereas before I could not manage 100 meters without severe pain in my chest. My blood pressure was lowered to 120/75/65 averagely and cholesterol level about 150 mg/Dl without medication. The solution was really quite simple. There are three important components in my program:(1) L Arginine,(2) oil and cholesterol free diet and (3)exercise. The detail dosages for the supplements are in the book. Basically, if we take the correct food, the body will heal itself. In other words Since the suggested food items are not drugs, they can be taken by the patients with their medication. However over time, those drugs can be reduced or done away with completely like If you are already suffering from heart diseases, strokes and Peripheral Arterial Disease(PAD), this book will definitely help. It would also help those people who have high blood pressure and high cholesterol levels. All the above diseases arise from blockages of the arteries in the brain, heart or leg. The unblocking processes are the same. If you follow the recommended way as detailed in the book, the unblocking of the arteries will occur. Dr Yu and his Cardiologist wife, Dr Wang Cuixia, explained in great detail the causes of the atherosclerosis(plaque forming) which resulted in heart diseases, strokes or Peripheral Arterial Diseases. He also delved into the details of the research on the trials for L Arginine and the different levels of LDLP, HDLP and lipids in the reversing process of atherosclerosis. In short, the programs listed

Read Book Robbins Basic Pathology With Student Consult Online Access 9e Robbins Pathology

in the book can and will reduce the plaque in the arteries. Julie, my wife, made the food that I consume daily which actually help clear my blockages. She wrote the recipes for the food that she fed me with. The book had all the above which together helped to clear my arterial blockages.

Dependable, current, and complete, Robbins and Cotran Pathologic Basis of Disease, 9th Edition is the perennially best-selling text that you'll use long after your medical student days are behind you. A world-class author team headed by Drs. Vinay Kumar, Abul Abbas, and Jon Aster, delivers the latest, most essential pathology knowledge in a readable, interesting manner, ensuring optimal understanding of the latest basic science and clinical content. High-quality photographs and full-color illustrations highlight new information in molecular biology, disease classifications, new drugs and drug therapies, and much more. Rely on uniquely authoritative and readable coverage, ideal for USMLE or specialty board preparation, as well as for course work. Simplify your study with an outstanding full-color, highly user-friendly design. Stay up to date with the latest information in molecular and genetic testing and mechanisms of disease. Consult new Targeted Therapy boxes online that discuss drug therapy for specific diseases. Gain a new perspective in key areas thanks to contributions from new authors at the top of their fields. Student Consult eBook version included with purchase. Further your understanding with access to a wealth of interactive ancillaries on the Student Consult site, including pathology case studies and videos and self-

assessment questions.

Unsurpassed in authoritative, focused content, Robbins & Cotran Review of Pathology, 5th Edition, covers all major topics in general pathology and organ system pathology, effectively preparing you for coursework and examinations. Part of the highly regarded Robbins & Cotran family of texts, this easy-to-use review contains 2,000 multiple-choice questions and answers to help you master the most important principles and facts in pathology. Questions and answers have been written, reviewed, updated, and explained by experts in the field, ensuring that your knowledge is up to date, thorough, and clinically relevant. Contains 1,500 vignette-style questions in print that reinforce clinical applications and incorporate key patient care and diagnostic strategies (history, physical examination, laboratory testing, and radiologic imaging). Online, 500 additional interactive questions cover more challenging topics and less common conditions. Uses single-best-answer and extended-matching formats to reflect levels of difficulty that prepare you for examinations. Questions are written in the style of USMLE and MCCQE questions that you will encounter for qualifying examinations. Covers the fundamentals of gross and microscopic pathology as well as the latest findings in molecular biology and genetics. Answers and detailed explanations for every question are found at the end of each chapter. Incorporates recent changes in the understanding of the pathophysiology underlying disease processes as well as the approach to workup and diagnosis of disease conditions. Reflects the breadth of content in the leading Robbins & Cotran
