Now in an increasingly complex, media-overloaded, maze-like world, parents need to know the essentials of truly successful parenting more than ever. Based on her specialized training and professional practice in psychology as well as her hands-on experiences as a parent, Dr. Alice Licata presents her positive approach, unique in its simplicity, eschewing formulaic for a fresh, highly readable, and widely applicable strategy. Dr. Licata emphasizes a fundamental principle which can offer answers to nearly every parenting concern and challenge. With engaging chapters such as "Be a Pachyderm," "It's Not You, It's Me," and "You Too Can be a Supermodel," this book is replete with practical examples and advice as well as touching anecdotes--a must-read for all parents wanting to avoid the too common pitfalls of today's childrearing.

The book's title *Knowing Why They Lied; Apologetics for Dummies* is intended to convey that the average churchgoing Christian might benefit by a handy evangelism tool that anyone, Christian or non, can evaluate, share, or use. Hence the "for Dummies" application, not suggesting that anyone is dumb, but that many are handicapped in their ability to define or answer false criticisms, even sometimes believing falsehoods to be true. Ignorance is never dumb but is always correctable. The "WHY" aspect concerns the fact that sincere people, sometimes especially within our schools, are not aware of the false doctrines often delivered as fact. Being sincere, yet mistaken, is not being truthful. Not being truthful is in fact lying. Through no fault of their own, many are even now speaking erroneously in classes to our children. This author believes that this can lead to bad behaviors even as deep as suicide and school shootings. Hopefully, we can turn such behaviors around, by addressing issues in more accurate ways, and by using more honest information in our school systems.
