

Ross And Wilson Anatomy Physiology 12th Edition

Ross & Wilson Self-Assessment in Anatomy and Physiology is aimed at readers who are starting their study of human biology. Containing over 500 MCQs, this handy paperback will be ideal for students of nursing and allied health professions, biomedical and paramedical science, operating department practice, complementary therapy and massage therapy, as well as trainee Health Care Assistants and those studying A' level or BTEC (or equivalent) human biology. Designed to be used as part of exam preparation, or just as a simple means of evaluating how far readers have got mastering a given topic, this handy paperback can be used by an individual student or by a group of students as a ready means to motivate and test each other. Although designed for use with Ross & Wilson Anatomy and Physiology in Health and Illness, the book will be suitable for use with any foundation-level human biology textbook. Over 500 MCQs support revision and learning Ideal for individual use or in an informal group setting Perfect prior to exams and/or for use during 'placement breaks' or 'on the move'!

Workbook to accompany: Ross and Wilson anatomy and physiology in health and illness. 9th ed.

The new edition of this essential resource covers core areas of respiratory care in a convenient outline format that makes it a great quick-reference guide, a handy review tool for credentialing examinations, and a comprehensive reference guide for clinical practice. Key topics include basic science; anatomy and physiology of the respiratory, cardiovascular, renal, and neurological systems; and therapeutic aspects of neonatal, pediatric, and adult respiratory care. Also features extensive coverage of pharmacology and infection control.

Online Library Ross And Wilson Anatomy Physiology 12th Edition

The convenient outline format breaks information down into manageable bits of information that make it ideal for study, review, and quick reference. The comprehensive coverage of key topics - from introductory material through therapeutic care - consolidates the full spectrum of respiratory care into one essential resource. Completely updated to reflect the significant advancements in the field of respiratory care. Reflects the required core content of the most recent National Board for Respiratory Care (NBRC) examination matrix, ensuring the most up-to-date competency requirements for certification. Features new chapters on ventilatory management for obstructive pulmonary disease, adult respiratory distress syndrome, NIPPV, tracheal gas insufflation, prone positioning, and liquid ventilation. A redesigned format provides easier navigation through the text. Carefully refined, clear and unambiguous text which omits the unnecessary detail that can confuse the student new to the subject. Highly illustrated with clear colour diagrams and photographs. Regular sequences of headings, lists and bullet points help with learning and revision. Learning outcomes related to the sections within each chapter. Common prefixes, suffixes and roots commonly used in anatomy and physiology. Appendix containing useful biological values for easy reference. Access to additional electronic resources, including high-quality animations, colouring exercises, case studies, self-testing questions, an audio pronunciation guide and weblinks. An accompanying Colouring and workbook that facilitates structured learning and revision of the material in this book. Fully revised and updated text, with a focus on the most commonly occurring disorders. New sections on the implications of normal ageing on the structure and function of the body systems to reinforce the core material and reflect today's ageing population. A new, easy-to-use colouring feature has been added to the extensive and varied selection
