Rubank Intermediate Method - Cornet Or Trumpet

One of the most widely used series of methods for individual or like-instrument class instruction. Using a very well-rounded approach including scales, arpeggios, technical studies, studies for musicianship, articulation studies, solos, duets, and studies devoted to the special needs of each instrument, this series provides a fantastic wealth of material for all student musicians.

Designed as a core text for college level courses in percussion methods and pedagogy, Teaching Percussion is a comprehensive, up-to-date introduction to teaching methodology and performance techniques. Now updated, Teaching Percussion helps students and performers develop musical understanding and performance skills on some fifty percussion instruments. The Second Edition includes coverage of new developments in world music instruments and performance. In addition, Norman Weinberg, cofounder of the PAS World Percussion Network, has contributed a discussion of electronic percussion and new technology. The outstanding exercises, musical examples, photographs, illustrations, practical advice, and bibliographies - popular features in the first edition - have been retained and enhanced. Teaching Percussion, Second Edition, is an invaluable resource for students, faculty, and performers alike. (Brass Method). The next step for students who have completed the advanced level method for their instrument. The full-page etudes in this series, key-centered and supported by scale and arpeggio exercises, take the student to that next level of performance wherein their accumulated skills allow them to play full-length performance pieces with a high level of musicianship and competence. As such, many states include these pieces in their all-state audition lists.
