

Saint Paul The Foundation Of Universalism Alain Badiou

Examines issues surrounding the place of the Ten Commandments in American society and their application in secular law, covering such issues as the separation of church and state, capital punishment, and prayer in public schools. Expanded verses of a familiar song tell how a teapot dreams of visiting China, Mexico, the opera, a jungle, and other places while waiting to be used to serve tea. Music and lyrics on last page.

The much-acclaimed present-day philosophical turn to the letters of Saint Paul points to a profound consonance between ancient and modern thought. Such is the bold claim of this study in which scholars from contemporary continental philosophy, new testamentary studies and ancient philosophy discuss with each other the meaning Paul's terms *pistis*, faith. In this volume, this theme discusses in detail the threefold relation between Paul and (1) continental thought, (2) the Graeco-Roman world, and (3) political theology. It is shown that *pistis* does not only concern a mode of knowing, but rather concerns the human ethos or mode of existence as a whole. Moreover, it is shown that the present-day political theological interest in Paul can be seen as an attempt to recuperate Paul's *pistis* in this comprehensive sense. Finally, an important discussion concerning the specific ontological implications and background of this reinterpretation of *pistis* is examined by comparing the ancient ontological commitments to those of the present-day philosophers. Thus, the volume offers an insight in a crucial consonance of ancient and modern thought concerning the question of *pistis* in Paul while not forgetting to stipulate important differences.
